

GAS FOR HOUSEHOLD FUEL

ing wrong with coal," its the way you use it. Gas is the heating part of coal. The gas com-
the gas works, blocks away, delivering to you the vital part, through a small pipe, out of sight,
in advance. In a gas range all the fuel is utilized, whereas in a coal or wood stove a large
of modern gas ranges is a matter of record. **"COOK WITH GAS."**

ation of lighting a gas range. "Strike a match and turn a lever"—that's all. In about a half
on a gas range boils. In twenty minutes from the time you light the match a good breakfast,
longer sleep in the morning, if your range is a modern one, **"Cook With Gas--Begin Now."**

especially in summer? He would soon realize that necessity and justice calls for the substitu-
ul coal stove. If he chooses a modern gas range his gas bills won't bother him—they'll be low
on a modern gas range without the burning and scorching incident to a coal fire. All lever
re's no more necessity for burning the fingers than when lighting a lamp or the the gas.

S--BEGIN NOW!"

a Fine Art

ve Free Practical Demonstra-
serving dinners, luncheons and
Vawter, of Domestic Science
, Chicago; Mrs. Elizabeth O.
n in Demonstration Hall---
ce.
