

A PROUD PAIR.

"What makes that peasant so proud to-day?"
"Oh, he has the biggest rooster in town—and his wife the biggest hat."
—Fliegende Blätter.

Not Lacking in Dignity.

There was once upon a time a country lawyer who was noted for his sedate manners and his judicial bearing. In the course of time he was elevated to the bench, where he conducted himself and the court with becoming demeanor, and where he won a reputation for sagacity based nearly altogether upon his solemn accents and his corrugated brow.

One who knew him well was asked by a stranger who saw the judge pass upon the street whether he was really an efficient arbiter.

"Well," said the acquaintance slowly, "I think I may say that John presides with more dignity and less ability than anyone else I ever knew."
—Louisville Courier-Journal.

Foretold.

"Well, Mrs. Dennis, what are you going to give Pat for Christmas this year?" Inquired the recipient of Mrs. Dennis' regular washday visits, one day at the beginning of the festive season.

"Deed thin, ma'am, I don't know," replied Mrs. Dennis, raising herself from the washbasin and setting her dripping arms akimbo. "I did be thinkin' I'd give him a pair of pants, but, Lord bless ye, ma'am, only last night didn't he come home wid a pair on."—Success Magazine.

Laundry work at home would be much more satisfactory if the right starch were used. In order to get the desired stiffness, it is usually necessary to use so much starch that the beauty and fineness of the fabric is hidden behind a paste of varying thickness, which not only destroys the appearance, but also affects the wearing quality of the goods. This trouble can be entirely overcome by using Defiance Starch, as it can be applied much more thinly because of its greater strength than other makes.

Great Improvement.

The patient told the doctor all his symptoms. At the end of the recital the medical man looked severe. "My dear sir," he said, "you must gradually give up whisky and soda."

Some months later he met the patient and inquired whether the advice had been followed.

"To the letter," replied the patient, beaming. "Why, I've already given up soda completely!"

Evidence.

"His wife married him to reform him."
"And she succeeded, didn't she?"
"I don't know; I didn't know him before he was married."

"Neither did I; but you can see that he don't amount to anything now."

WHY HE LIKED TIGHT SHOES

Little Remark That Threw Great Light on the Home Conditions of Amos Dore.

"We always wondered a little how Amos Dore and his wife got along—really," "Aunt Em" Macomber said, frankly. "Some in the neighborhood said they'd never overheard a single loud or cross word on either side, but Life Daniels always stuck to it that Amos was as mis'able at home as a man could be."

"He never spoke right out till Amos died and Mrs. Dore went back up-country to her folks. Then he let out."

"What?" queried Aunt Em's visitor. "Well, Amos worked logging along-side of Life every winter, and summers they hayed together most all ways, and it seems," said Aunt Em, impressively, "that Amos complained of his shoes hurting him about all the time. Finally Life asked why he wore tight shoes."

"Why don't you get a pair big enough?" says Life, one day.

"Well, I'll tell you," Amos says. "When I wear tight shoes I forget all my other troubles."—Youth's Companion.

NEVER DONE.

Slimkins—I-I hope you didn't mind my putting that little matter of \$5 in the hands of the bill collector yesterday?

Podger—Not at all; I borrowed a dollar from him.

Tuberculosis Afflicts Japanese.
Consumption among Japanese laborers is increasing to such a degree that the figures are becoming a source of anxiety to Japanese merchants and officials. A large percentage of laborers who are sent back to Japan by the Japanese charity associations are consumptive. It is claimed by the Japanese newspapers commenting on this matter that through the lack of hospital accommodations in the Japanese labor camps tuberculosis increases at an alarming rate. They suggest that a new system be employed in dealing with the sick in these camps, as the Japanese are quite ignorant of even the most simple health safeguards.

Starch, like everything else, is being constantly improved, the patent Starches put on the market 25 years ago are very different and inferior to those of the present day. In the latest discovery—Defiance Starch—all injurious chemicals are omitted, while the addition of another ingredient, invented by us, gives to the Starch a strength and smoothness never approached by other brands.

A Natural Mistake.

"I thought you said that you were home early last night and didn't drink a drop."

"So I was, my dear."

"Well, it doesn't look like it. This morning I found your dirty rubbers in the fireless cooker."

"Great Scott! I thought that was the shoe box."

No, Not Nervous.

"They say he has degenerated into a panhandling bum."

"That's true. He is now nothing but a nerry wreck."

THIRD OPERATION PREVENTED

By Lydia E. Pinkham's Vegetable Compound

Chicago, Ill. — "I want to tell you what Lydia E. Pinkham's Vegetable Compound did for me. I was so sick that two of the best doctors in Chicago said I would die if I did not have an operation. I had already had two operations, and they wanted me to go through a third one. I suffered day and night from inflammation and a small tumor, and never thought of seeing a well day again. A friend told me how Lydia E. Pinkham's Vegetable Compound had helped her, and I tried it, and after the third bottle was cured."—Mrs. ALYSSA SPERLING, 11 Langdon Street, Chicago, Ill.

If you are ill do not drag along at home or in your place of employment until an operation is necessary, but build up the feminine system, and remove the cause of those distressing aches and pains by taking Lydia E. Pinkham's Vegetable Compound, made from roots and herbs.

For thirty years it has been the standard remedy for female ills, and has positively restored the health of thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration. Why don't you try it?

NO WEDDING BELLS

FOR THE JUNIOR PARTNER AND THE STENOGRAPHER.

Mr. Branscombe Was Wealthy and Handsome and All That, But Miss Hawtrey Clung to Her Little \$12 Per.

"But," urged Mr. Branscombe, the junior partner, after Miss Hawtrey, the beautiful stenographer, had said that she could not become his wife, "I can't understand why you refuse me. I am not an old man—that is, I hope I'm not old. Of course, some men are very old at my age; but I've tried to keep young, and at 35 no man has the right to feel that he is getting old. As for my financial standing, I can say that I am rich enough to insure you not only a comfortable home, but many of the luxuries that are dear to a woman."

"I haven't the least doubt about that," the lady replied. "If I were going to marry I should not wish my husband to be any younger than you are. A man of 35 ought to know his own mind. But, really, I wish you would not urge me any more."

"I—I perhaps it is rather undignified for me to say so, but I hope I am not altogether unattractive as far as my personal appearance is concerned."

"Indeed, you are not, Mr. Branscombe. You are, if you will excuse me for saying so, a very handsome man."

"Thank you—I thank you with all my heart, my dear Miss Hawtrey. And I hope my treatment of you has always been gentlemanly."

"If it had not been I should not have remained here."

"If you have any doubts concerning my past I can assure you that there is nothing in it which I should be ashamed to have you know about."

"That is a great deal for a man to be able to say to a woman."

"Yes, I am glad you take that view of it. May I hope that I shall be able in time to make you change your mind? I do not insist on a hasty marriage. If you will only give me any reason to feel encouraged I will wait and try to convince you that I am worthy of you."

"Really, I must say at once that I do not desire you to go on treasuring any hope. I am sure that I shall not change my mind."

"Have you thought how much it would mean to you to be the mistress of a splendid home? To never have to bother about money? To have servants to do your bidding? To, in short, be the wife of a man of high standing in the community?"

"Yes, I've thought about all that. I prefer to remain as I am."

"I confess that I can't understand you. Your salary here is never likely to be any higher than it is at present, and you must often find it exceedingly difficult to get along on your income—to get the things that a woman naturally wishes to have in the way of clothes and that sort of thing, and then there is the necessity of coming into the city, rain or shine, to work among a lot of men who are not at all ways, I fear, as respectful or as gallant as men ought to be in their dealing with ladies. Think how much better it would be to have a splendid home to reside over; to—"

"That's the very thing I don't want. If I had a home to reside over I should have to stick there day after day, with no chance to get out and be among people—to see the world—to be a part of it. Not for me, Willie."

"Miss Hawtrey, will you kindly return to your typewriter and get off the letters I dictated to you this forenoon? And don't forget that they are to be sent out to-day even if you have to remain at work till eight o'clock to-night. I have noticed recently that you have been taking three-quarters of an hour off at luncheon. Remember that you are to be absent only half an hour."

"The horrible old grouch," Miss Hawtrey muttered, as she returned to her work, "he wants the earth for \$12 a week."

A Manhattan Scheme.

On the first warm day of the week a wagon went the rounds of the downtown district, and from the front of it a raucous-voiced youth bellowed a summertime song of the tinpan variety. While he sang, other youths bored their way through the crowds selling copies of the melody—if such it could be called. A bystander on the edge of the throng was surprised at the briskness of the buying. A man darted up to the wagon, deposited ten cents, and vanished with the song. There would be a pause, and then another man would plunge forward and grab a copy.

Presently the onlooker noticed that all these men looked alike. One-half of them had a cigar; the other half wore a felt hat. He studied them intently, and the closer he studied the more certain he became that the apparently many buyers were in reality but two. But by the time he had worked this out satisfactorily the crowd was hypnotized, and man after man went meekly up to the wagon and paid ten cents for the music that was being lauded through a megaphone.—New York Evening Post.

Just a Novice.

"I see," said the veteran husband, "that Parisian advice indicate women's hats will be much smaller next summer."

The other man looked pleased. "That's good," he said. "The women can cut their big hats down."

For he was a very young husband, you understand, and knew very little about the ways of women—and milliners.

JOB WOULD KEEP HIM BUSY

Greenhorn Sailor Realized the Captain Had Given Him a Big Contract.

In the height of the recent wheat tumult Broker Patten, discussing the government's wheat estimates with a reporter, said calmly:

"But some of the men the government takes its figures from are greenhorns. Perfect greenhorns. As bad as the Dutch sailor, you know."

"The captain said to the sailor, when the ship came to port: 'Take a boat, run ashore and buy two dollars' worth of vegetables.'"

"The sailor didn't know what vegetables were, so as soon as he struck land he said to a longshoreman: 'What is vegetables, mate?'"

"Oh, dried peas, for instance," the longshoreman answered.

"So the Dutch sailor spent his two dollars on a huge sack of dried peas. When he drew near the ship again with his load the captain called him from the bridge: 'Well, have you got those vegetables?'"

"Aye, aye, sir," said the sailor. "Then," said the captain, "hand them up to cookie one at a time."

"Shiver my timbers!" said the sailor, "I've got a job before me now, and no mistake!"

SORE EYES CURED.

Eye-Balls and Lids Became Terribly Inflamed—Was Unable to Go About—All Other Treatments Failed, But

Cuticura Proved Successful.

"About two years ago my eyes got in such a condition that I was unable to go about. They were terribly inflamed, both the balls and lids. I tried home remedies without relief. Then I decided to go to our family physician, but he didn't help them. Then I tried two more of our most prominent physicians, but my eyes grew continually worse. At this time a friend of mine advised me to try Cuticura Ointment, and after using it about one week my eyes were considerably improved, and in two weeks they were almost well. They have never given me any trouble since and I am now sixty-five years old. I shall always praise Cuticura. G. B. Halsey, Mouth of Wilson, Va., Apr. 4, 1908." Potter Drug & Chem. Corp., Sole Props., Boston

ACCENT ON THE "PUS."

Teacher—Now, Jimmy Green, can you tell me what an octopus is?
Jimmy Green—Yes, sir; it's an eight-sided cat.

A Rich Error.

"Printers' errors are always funny," said Gen. P. P. Parker of the Arizona G. A. R., "and I'll never forget one that was made over a Memorial day sermon some years ago in Phoenix."

"The Monday morning report of this sermon began: 'The Rev. Dr. John Blank greased the pulpit on the occasion'—and so on. 'Graced,' of course, is what was meant."

Absent All Around.

The absent minded professor returned home one evening, and after ringing his front doorbell for some time to no effect, heard the maid's voice from the second story window: "The professor is not in."

"All right," quietly answered the professor; "I'll call again." And he hobbled down the stone steps.—Lippincott's.

FOR NURSERY DINNER TABLE

Mixture of Rice and Cheese the Children Will Enjoy—Healthful and Satisfying.

Quarter pound of rice, one tablespoonful butter, one onion, one cupful milk, two cupfuls of water, one egg, one tablespoonful of cornstarch, salt, pepper, two tablespoonfuls grated cheese.

Wash the rice well, and put it into a saucepan with the butter, onion finely chopped, a pinch of salt and pepper, and the water. Let it cook slowly for half an hour, with the lid quite close.

Now beat up the egg well, dissolve the cornstarch in the milk, add to it the egg, and stir all among the rice.

Mix in one tablespoonful of the cheese, and pour into a buttered pudding dish. Strew the remainder of the cheese on the top, and brown in the oven.

This makes an excellent children's dinner with some green vegetable.

The issue of Thursday, March 25, of the Evening Bulletin of Honolulu, territory of Hawaii, is acceptable evidence that American energy follows the flag. It is an issue of 74 pages, including an illustrated "Industrial Section" on book paper, setting forth the development and magnitude of the Hawaiian sugar industry. Hawaii is a land of promise for the agriculturist and horticulturist, and she is to come to her own through the influence of American enterprise in every field of endeavor.

Rejected One—"Tis wishing I was a gerri, I am, Biddy, the way I'd marry myself, an' show ye ye're not the only gerri wid a purty face.—Punch.
