## In Labor's Realm

Matters of Especial Interest To and Concerning Those Who Do the Work of the World

Indianapolis, Ind.—The United Mine Workers had a membership of 246,652 September 1, a gain of 51,654 during the fiscal year, according to the annual report of Secretary Edwin Perry, made to Secretary Frank Morrison of the American Federation of Labor. The report covers the year from September 1, 1908, to September 1, 1909, and appears in the current issue of the United Mine Workers' Journal. It shows that the number of charters issued to locals since September 1, 1908, was 163, and the number of charters surrendered was 167. The number of strikes during the year was between thirty and forty, and two-thirds of all strikes were won. The number of persons involved in the strikes ranged from 300 to 6,000. The cost of strikes during the year is shown to have been \$472,189.09. Six local and two general injunctions were issued against members of the organization during the year.

Chicago.—Suit for \$25,000 damages against the W. B. Conkey Company was begun in the superior court by Edward E. Bessette, a member of the Chicago Typographical union. Bessette alleges that the concern libeled him in a circular published recently at Hammond, Ind., warning striking bookbinders that if they interfered with the operation of the defendant company's plant they might expect to receive the punishment meted out to Bessette, who was "fined and sent to prison." According to Attorney John J. Sonstey, Bessette was fined on a contempt citation eight years ago before Judge Baker in the United States district court at Indianapolis.

Butte, Mont.—As a result of a jurisdiction fight between the Western Federation of Miners and the hoisting engineers four-fifths of the mines of the Butte district were closed. A majority of the members of the engineers' union have seceded from the Western Federation of Miners and organized a new union. The Butte Miners union ordered its members not to go to work in mines employing members of the new engineer body. Unless the men settle their differences soon all the smelters at Anaconda and Great Falls and in this city will close and more than 18,000 men will be out of employment.

Pittsburg, Pa.—Representatives of the Glass Bottle Blowers' association and the manufacturers reached a wage agreement which with slight modifications is practically the 1908 scale. This agreement came after a four-days' conference. The manufacturers opened their plants at once, and most of the 10,000 men out of employment in this industry resumed work. At the conference in July the manufacturers demanded a large reduction, but the blowers refused to accept, with the result that all the factories have since been closed.

Helsingfors, Finland.—In textile trades two-thirds of the work is done by women; in the paper trade one-third of the labor is female. In the sawmills one-tenth of the hands are female. Forty per cent. of the bakers are women, and so are 25 per cent. of the brewers. Women represent 85 per cent. of tobacco factory hands. During the last ten years female labor in Finland has increased by 20 per cent., partly due to the great surplus of women, and partly to the emigration of men.

New York.—The International Typographical union was organized in 1850; the haters, finishers, stonecutters and tuckmakers' unions, 1854; iron molders, 1859; Brotherhood of Locomotive Engineers, 1893; cigar makers, 1864; bricklayers and masons, 1865; railway conductors, 1876; locomotive firemen, 1873; horsehoers, 1875; iron and steel workers, 1878; window glass blowers, 1877; granite cutters, 1887; and railway trainmen, 1888.

Hammond, Ind.—The 200 bindery girls employed by the W. B. Conkey Company, who agreed to strike in sympathy with the men who walked out for eight-hour shifts and the same wages as paid in Chicago, were dissuaded from their course by the men themselves, who said that no good could come of a walk-out. Seventy-one of the men sued the company for pay alleged to have been due before the strike started.

Chicago.—John L. Sullivan of the Sullivan Boiler and Tank works asked the superior court for an injunction restraining labor officials, who recently called a strike at his plant, from interfering with his business. Several of the Sullivan employes were not union men and a strike was called September 16. Sullivan charged Doherty attempted to intimidate the workmen who remained loyal to the company.

New York.—The Retail Clerks' International Protective association has decided to put on an extra assessment on the members for the purpose of creating a defense fund. The growth of the clerks' association has been phenomenal. A referendum vote will soon be taken to elect a national secretary to occupy the chair recently vacated by the death of Max Morris.

Amsterdam, Holland.—The Holland trade unions are organizing those workers whose occupation and numbers offer a field for union action. The unions have already done much in the cities of Holland to raise wages.

Cleveland, O.—The official result of the referendum election held by the International Association of Machinists has just been announced. All of the present officers and members of the general executive board were re-elected for another term. The highest vote, 10,708, was polled by D. Douglas Wilson, the blind editor and manager of the official organ, Machinists' Monthly Journal. He was unopposed. The vote resulted as follows: General president, James O'Connell, 9,582; general secretary-treasurer, George Preston, 10,012; first vice-president, P. J. Conlon, 7,585; second vice-president, Louis Beulon, 9,868; third vice-president, J. D. Buckalew, 7,567; fourth vice-president, T. L. Wilson, 10,386; fifth vice-president, J. J. Kepler, 9,716; sixth vice-president, William Hannon, 8,420; seventh vice-president, Walter Ames, 5,580; general executive board, Hugh Doran, Chicago, 7,401; James A. Reynolds, Warrensville, O., 7,198; R. G. Cook, Bremerton, Wash., 7,182; Arthur E. Ireland, Pittsburg, Pa., 7,006; E. L. Tucker, Washington, 6,894; delegates to American Federation of Labor, four to elect, J. J. Handley, 7,231; P. W. Buckley, 6,997; J. J. Keegan, 5,532; H. W. Churchill, 5,038. During the year just closed the association had 51 new lodges, with a membership of 1,295, organized. The association is affiliated with the American Federation of Labor. At the convention just closed in Denver President O'Connell made a strong plea for the formation of ladies' auxiliaries.

Cincinnati.—The question of holding a convention this fall of the Brotherhood of Painters, Decorators and Paper Hangers of America, which was recently submitted to a referendum vote, was carried by the decisive vote of 16,276 for to 2,410 against. The convention will assemble in this city in December, and will be the first in several years. A great many important questions are to be considered, among them the establishment of a home for aged and infirm members, and the matter of creating a pension scheme, in addition to the death and disability benefits already paid. The latter fund expended during May the sum of \$11,650 in the international jurisdiction.

St. Louis.—According to a telegram from Frank Morrison, secretary of the American Federation of Labor at Washington, the charter of the Central Trades and Labor union, with which practically all local labor bodies are affiliated, had been revoked. The trouble grows out of the refusal of the Central Trades and Labor assembly to obey an order from the national organization to expel delegates of the Brotherhood of Electrical Workers, which has been outlawed by the American Federation of Labor.

New York.—The first union of sheet and plate glass glaziers, cutters and setters to be formed in New York has been organized. There are 700 men in the trade in this city. One hundred and fifty members in the new body enrolled and decided to apply for a charter to the American Federation of Labor. The enrollment is preparatory to a general demand for higher wages and better working conditions to be enforced by a strike if it is refused.

Indianapolis, Ind.—As a valuable contribution to the warfare against consumption President George L. Berry of the Printing Pressmen and Assistants' International union has issued a pamphlet under the caption, "Tuberculosis Printer," in which he reviews various pressroom conditions which predispose the workers of his craft to becoming inoculated with the white plague. Sanitation and ventilation are explained fully and in a manner to be easily understood by the pressman.

Minneapolis, Minn.—The four railroad organizations of Minnesota, the Order of Railway Conductors, the Brotherhood of Railroad Trainmen, the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen, have started a movement in the state of Minnesota to form a joint legislative board, consisting of a representative from the State Federation of Labor and the four railroad brotherhoods.

Quebec, Que.—A sensation was created in the session of the trades and labor congress by the unanimous adoption of a resolution calling for the removal of Lieut. Gov. Gibson of Ontario for his public endorsement at a recent banquet given by the Canadian Manufacturers' association at Hamilton of President Hobson's attack on the international officers of trade unions.

San Juan, Porto Rico.—Judge B. S. Rodey denied the injunction sought by the unionists to restrain Gov. Post and the treasurer and auditor of Porto Rico from dispersing the insular funds in accordance with the Olmstead act. He holds that the law has been interpreted properly by the attorney general, Harry M. Hoyt.

Birmingham, Ala.—Organized labor fraternized with the farmers of Alabama at the annual convention in Birmingham of the Farmers' Educational and Co-Operative union, two prominent labor delegates making addresses.

Come and select a stove from us and you will be prepared. We have a line of heaters and base burners that are winter chasers. Our stoves meet the requirements of the most exacting trade. Made of the best material and absolutely guaranteed. Our Department store price cannot be duplicated anywhere in the city.

Pipe Joint .....9c  
Elbows, each .....9c  
If you are in need of a stove of any kind don't fail to see us.

### Sewing Machines

We ought to sell all of the sewing machines sold in Lincoln and vicinity, you will say so when you see the machines and get our prices. Guaranteed for 10 yrs \$14.75 to \$27.50

Heaters and Ranges, the best designed, best decorated and best constructed Heaters on the market.

### FURNITURE

at department store prices is getting the business. Investigate.

NEW PREMIUMS HAVE ARRIVED

WE SOLICIT MAIL ORDERS

#### CHID FALLS FROM A SWING.

Pastor's Daughter Dangerously Hurt While at Play.

Ruth, little child of Rev. and Mrs. S. Z. Batten, was seriously injured Monday evening by falling from a swing while at play with several other children in the back yard of the family home, 1332 K street. The little one fell on her head and was in an unconscious condition until a late hour Monday night. Her head and spine were injured.

The attending physician fears that her injuries may prove serious.

#### DON'T FORGET THEM.

There's a chill in the air, and you'll need coal. When you order it do not forget that there is a Teamsters' Union in Lincoln. If the dealer can not furnish a union driver, seek another dealer. The way to boost is to boost.

#### CAN YOU BEAT IT?

A prize was offered by the Peoria central body to the person taking part in the Labor Day parade who had the most label goods. A cigar-maker won the prize. The winner in the contest had the following labels on: Hat, coat, vest, pants, shirt, necktie, collar, two collar buttons, two sleeve buttons, cuff buttons, belt, suspenders, Sox, shoes and pocket knife.

#### WILL KEEP TAB ON JUDGES.

Chicago Federation of Labor to Make Record of Labor Cases.

The Chicago Federation of Labor decided at a regular meeting to keep

hereafter a complete record of judicial decisions in labor cases adjudicated in Cook county, injunctions issued, names of judges giving the decisions and their political affiliations. It was explained that the object of keeping such a record was to guide the officials of the affiliated labor organizations in making political endorsements of judicial candidates at elections. The action of the Federation follows its fight against so-called "injunction" judges in the recent judicial election.—St. Paul Union Advocate.

#### CAPITAL AUXILIARY.

Capital Auxiliary No. 11 will meet with Mrs. Will Bustard, room 27, Salisbury block, at 2 o'clock next Tuesday afternoon. Election of officers.

#### STRIKES WITHOUT UNIONS.

Labor Troubles Infrequent Where Written Agreements Exist.

The strike of the unorganized labor in the Pressed Steel Car plant, at McKees Rocks, Pa., has been settled through concessions made by the employers. Concessions made because of pressure of public opinion when the facts were learned, and yet among the mottoes of the Employers' and Manufacturers' association is this: No sacrifice of the independent workingmen to the labor union. No, they should stand alone to be plucked as the evidence shows they were in this open plant.

There are many good people who seem to believe that if there were no labor organizations there would be no strikes. The history of labor strug-

gles for decent treatment for the past 100 years in America, as well as the Pressed Steel Car strike, shows how absurd such notions are. The fact is, that the most lasting peace is where the laboring men are best organized and working under

written agreements for the sale of their services, and those agreements which have been longest in force insure best relations between employer and employe, and best conditions in every sense.—Locomotive Engineers' Journal.
