

The Long Winter Nights

May be made bright and cheerful by illuminating the home with either Gas or Electricity. And the disposition of the housewife may be sweetened by relieving her of the drudgery of filling "smelly" kerosene lamps and cleaning smoky chimneys. Nothing is so well calculated to make home happy as bright lights and cheerful dispositions. We will furnish the illumination—and the cheerful dispositions will follow as a natural result.

If It's a Question of Cost

Let us prove to you—as we can—that it is cheaper, more convenient and far better to illuminate with gas or electricity than it is to illuminate with kerosene amps. Counting cost of kerosene and chimneys, to say nothing of the drudgery connected therewith—it costs no more to use gas or electricity. And as for the results—dollar for dollar you get immensely more and better light—always ready, no cleaning, no breakage—by using our illuminants.

Equipping a Modern Kitchen--

Mr. Mechanic, you insist upon having the best and most up-to-date tools. Why deny your good wife the same conveniences for her trade. If you think housewifery is not a trade, just try it. Equip the kitchen with labor saving devices—first a gas range, then electric irons, toasters, etc. Come in and let us show you a few things.

Lincoln Gas and Electric Light Co.

OPEN EVENINGS

GENERAL MENTION.

Brief Bits of Labor News Picked and Pilfered from Manywhere.

Polishers' Union No. 111, in Quincy, Ill., has lately made agreements with most of the foundries.

The 250 girl strippers who were on strike in the Pollack stogie factories in Wheeling, W. Va., have won a victory.

Missouri supreme court knocked out the law which prohibited the working of employees in bakeries more than six days, of ten hour each, a week.

Patternmakers are organized in Lorain, Ohio, which embraces Elvira as well. About 75 per cent of the mechanics in that district are in the new union.

The legislative committee of the Brotherhood of Railroad Trainmen is taking steps to fight for the passage through the New Jersey legislature of a bi-weekly pay day.

A famine in Easter bonnets is now threatened. Word comes from New York City that the 5,000 members of the Millinery Workers' Union are organizing for a general strike.

After two strenuous nights of negotiating, the Niles, Ohio, Typographical Union had its scale boosted \$2 per week for job and ad journeymen and \$6 a week for foremen, or 20 and 40 per cent.

The strike of union building tradesmen on the Brandeis theater building in Omaha, Neb., has been settled, and the "scab" sheet metal workers brought from Chicago are getting home the best way they can.

No organization, either in the railroad industry or outside of it, has grown as rapidly as has the Railway Trainmen in the past two years, the average increase being in the neighborhood of 1,000 members a month.

A Boston firm of building wreckers has brought out a circular saw that will cut through nails and bolts as well as through wood, enabling them to cut into regular sizes of second-hand lumber that otherwise would be valueless.

Accused of being a spy and "spotter," Robert Sewell of Akron, O., who joined the Auto Tire Builders' Union a few weeks ago, during the present strike at the Hartford, Conn., Rubber Works, was ejected from a trades union meeting Sunday.

The Oil Exchange cafe and Bartenders' Association in Toledo has settled all differences. President Thos. J. Smith of the joint executive board reports 21 reinstatements and 17 applications last week, and three applications this week.

Six thousand members of the House-smiths and Bridgemen's Union in Greater New York have been granted an increase from \$4.50 to \$5.00 a day. Thirty cents a day will be added at once, while the additional 20 cents will be come effective on July 1.

The Union Pacific compels its day watchmen to work thirteen hours per day, for which they pay the magnificent sum of \$1.50. The night watchmen are more fortunate, as they only work ten hours and draw \$1.60 for same. Just how the company manages to "stem the tide" with such a draw on its treasury, is a mathematical problem.

The American Brotherhood of Cement workers, writes International Secretary Henry Ulmer, contemplates the issuing of an official paper at an early date. The headquarters of the cement workers is at San Francisco, and has functioned as an international union for seven years. It has issued 132 charters and has a membership of 9,000. Its territory covers Canada, the United States and Mexico.

HERE'S GOSPEL TRUTH!

The union man who spends part of his week's wages for cigars that were made in a pest ridden non-union shop is ten times bigger fool than the fellow that tried to lift himself by his boot straps.—Duluth Labor World.

EDUCATIONAL LEAGUE.

Sunday, Feb. 27th, will be Woman's Day at the Lincoln Economic Educational League.

Chas. A. Wickes will lecture on "Woman's Struggle for Economic Equality." The music will be in charge of Prof. Franta, who made such a decided "hit" with the audience last Sunday. Seats are free. Don't forget the time, Sunday, 3 p. m., Feb. 27. Don't forget the place, A. O. U. W. hall 1007 O street.

THIS IN CEDAR RAPIDS.

The retail clerks have renewed contracts with a majority of the retailers, the contracts to run for another year. In Lincoln? No, in Cedar Rapids, Ia., where the clerks have nerve enough to organize and have some part in the disposition of their own labor. Up to date Lincoln retail clerks have failed to show themselves to be the possessors of any such nerve.

Notice of Incorporation.
