Tours in the Rocky flountains

A mountain tourist in search of grand and beautiful scenery finds an embarrassment of riches in Colorado and Utah, but if the names of the Denver & Rio Grande and the Rio Grande Western railroads are borne in mind when planning a trip there is little chance of making a mistake or meeting with disappointment.

This is the only route having two distinct lines through the Rocky mountains, thus affording the tourist the advantage of going via one line and returning via the other. manner the trip from Deaver, Colorado Springs or Pueblo to Grand Junction may be made via the main line, through the Royal Gorge, Leadville, over Tennessee Pass, through Eagle River Canon, Canon of the Grand River and Glenwood Springs returning via the Black Canon of the Gunnison and Marshall Pass, or vice versa, all through tickets being available viv office route. Tourists to and from Salt Lake City, Ogden, Fortland or San Francisco, will find it to their advantage to have their tickets read in both directions via "The Scant". I line of the World, and "The Great Sait Lake floure thus some the priviler to 5, the one of the above these going and the other returning The above severe by a (eneral way

HAIL INSURANCE LAW

Takes Effect July 8th United Mutual of Lincoln-First to Submit Bond of \$50,-000,00 - Wild Cat Companies not Yet Shut Out

We have had quite a number of inquiries of late regarding the new law affecting hail insurance companies; also as to which is the most reliable company now doing business. We therefore give the following in answer to these queries: does not take effect until July 8, but in the meantime most of the business for the year will be written. Farmers therefore should use care to get insured in a company that will comply with the law and therefore be prerected against loss because the fact that the new law is not yet in effect the new law requires that a guarantee bend of fifty thousand dollars be given by the efficers having charge of the money belonging to the members for the payment of losses, said bond must run to the state of Nebrooka and he deposited with the auditor of pulit, accounts having charge of the insurance department of the state The first company to sufficients bond of der the new law is the Louis-Land Marial Half Insurance as a session of the can The found which is for \$ seren to acceptable to the accuracy and will for duly Highest firth S. Railroad Taxes

But the strongest evidence against the contention of Mr. Tibbles is found in the action of railroad companies in keeping their taxes down to the lowest possible limit both by fair means and foul. Surely these men are not such fools as to waste time and money avoiding something directly which could be done indirectly so nearly by a mere raise in rates.

The fact is, that legislative interference with rates has scarcely amounted to anything and that the roads are now-and all the time have bear," which simply means that a further raise of rates at the given time would result in a loss of net returns. Whatever tax is paid at such a time must come out of divi-dends, and, hence out of the stock-holders, C. Q. DE PRANCE.

The May number of the International Socialist Review is in many respects, the scroncest minister ever usual.
