WORKING FOR A NATIONAL LAW

Food Manufacturers' Association Is Meeting With Success

Developments in the affairs of the National Food Manufacturers' association since the recent meeting in Chicago, at which a new board of directors was elected, and later the general publicity given to the bill now under consideration by the association, and which has elicited very favorable comments from various sources, proves that there is a widespread and increasing interest in the movement

for the enactment of a national food law.

Both moral and financial support of the association have been general from the various branches of the food industry, bringing a very substantial increase in the membership. Altogether the progress of the work has been greatly encouraging to the officers and members who have kept in close touch with the movement.

Mr. James A. Yerington, who was elected chairman of the board of directors of the association at the last meeting, is taking an active part in bringing together in harmony all

branches of the industry, unifying their interests and giving directness to the work.

The impetus given the movement during the last two weeks has made it necessary to engage additional quarters in the First National Bank building, Chicago, and increase the force in order to properly handle the increasing correspondence and business of the office. These largely increased facilities will permit the officers to prosecute the work with vigor and to give a good account of the lively interest already awakened in the subject of the enactment by congress of

an equitable food law.

The plans for the future with reference to the organization of forces to accomplish the objects of the association, are well defined, and while the officers realize the amount of work ahead, and the brief time in which it is to be done, they are nevertheless sanguine of success, basing their confidence on the recent general awakening of food manufacturers, jobbers, retailers and all interested in the bill to the importance of immediate action and the prevailing opinion that some food measure will be passed during the next session of congress.
