Diseases and accidents incapacitate. In slaughter houses and damp cellars workers are exposed to cold in the winter and excessive heat in the summer. The inevitable results of these conditions are broken health, much suffering and premature death. But the food we eat, the houses we live in, the clothes we wear, and the many things we must use in this complex civilization must be supplied. So we should be deeply grateful for these things which cost their producers so heavily. And we should not forget to give credit to these to whom we are indebted for so much.

could easily be prevented. Second, in a great many fires damage is much larger than it should be, because of failure of fire fighting organizations to handle the blaze quick-

ly and efficiently The first problem is largely up to the individual. The community can pass good building codes and enforce inspections of property - but these will be successful to only a small degree without public interest and cooperation. Fires arising from misuse of heating plants, from the careless disposal of waste matter, from inferior wiring, cause damage to the extent of millions a year. Every one of these fires could be prevented if the property owner would go to the small trouble and expense necessary

to assure safety.

The second problem, to most of us, seems to lie in the province of municipal governing authorities. They make fire department appropriations. appoint fire marshals, hire the personnel, and buy equipment and apparatus. But the influence of the individual citizen can be extremely potent here, too. He should demand that marshals be appointed on the basis of fitness, instead of political consideration, that discipline and that apparatus be of strictly standard

to help the millions of men and women who have lost or are losing their vital physical power. In his 35 years of practice and research, however, he realized that the weakening of man's glands was also responsible for other troubles: High blood pressure, hardening of the arteries, physical exhaustion after work or exercise, dizziness, depression, neurasthenia, etc.

All these troubles can be removed with Titus-Pearls. Numerous cases were treated by Dr. Hirschfeld in his Berlin Institute. L. S. (State Official; 60 years old, married) complained of physical exhaustion, dizziness and tremors. Was easily tired. Mental power dull and slow moving. Physical powers had been incomplete for previous 5 years. Blood pressure too high. Given 2 Titus-Pearls 3 times a day. 2 weeks later the medical report on this man was:—general health better, more vigor; dizziness much less and returning of power. Treatment continued and 2 weeks later L. S. reported again, this time to say that all weariness and exhaustion had gone; he felt fresh and buoyant. His blood pressure had fallen, and at 60 vears of age he had regained the physical power and virility that had known in the prime of his life.

Start regaining your youthfulness now! To-day! In 2 weeks time you will be aware of the new, virile force within you. Send \$5.00 (cash registered or money-order) for 2 weeks treatment. C. O. D. Orders accepted. Write for Booklet.
