

A Paris Designer

Miss Rubia Washington of San Diego, Cali.

Miss Rubia Washington who was reared in the home of the late Booker T. Washington, and a graduate of the Tuskegee Institute of Tuskegee, Alabama is in our city. She is the house guest of Mr. and Mrs. Edward Childs, 1105 South 13th St. Miss Washington specialized in cutting and designing in Paris. She is from San Diego, California, where she has resided for the past twelve years. Miss Washington was the designer in the Chiparesian, San Diego's finest cutting and designing establishment, who did designing for the largest department stores and many of the finest seamster shops of San Diego, California. Miss Washington will be in Omaha for an indefinite

papers and magazines advertise the New Analytical Bible over their own name because the advertising done by the Publishers has created a universal demand for this Book. Full page advertisements appeared in more than a hundred and fifty religious magazines and newspapers last year.

In this connection I might mention the fact that Mr. Buxton asked me to supply him with the names of the various colored publications as their firm is willing to give the colored publications the same advertising proposition as handled by the white publications.

The New Analytical Bible comes in a great variety of styles and bindings. There is a price to fit every pocketbook. All are beautifully printed on genuine India paper and many of them are bound in the finest imported leathers.

In addition to the selling of Bibles they have a complete Bible Study Course which is conducted under the name of the Student's Bible Institute.

This Course covers a period of two years and entitles the purchaser to two additional volumes namely the Student's Bible Guide and Helps and Through the Bible in Two Years. The Course and text books including a New Analytical Bible and two years' correspondence privileges are sold on a convenient installment payment plan and is sold also through advertising in publications and through direct representatives.

Complete literature on all of the above including fifty important Bible Questions and Answers will be forwarded free to all those writing direct to John A. Dickson Publishing Chicago.

Commercial Opportunities

An Opportunity to Build a Repeat Business!

The Casterline Candy Company, manufacturers of candies novelties and toys, for the past five years have authorized me to advise my readers that they are putting on a campaign to secure a specialty salesman in each community in the country. This firm wants only one representative in each community and if such representative qualifies the Casterline Candy Company will protect the agent on all business coming from that community. The agents' qualifications are that he should be well known in the community and be able to contact the merchants as well as the consumers. This proposition appears to be a rapid seller, with large profit to agent and merchant and with an enormous repeat possibility and it is on this repeat business that the agent will "cash in" on a protected exclusive territory. Write to the Casterline Candy Company, 4541 Ravenswood Avenue Chicago immediately as only one agent in a community will be placed. I might mention the fact that their candy is a penny seller with an opportunity of securing free prizes on each penny purchase including a large box of O. H. Henry caramels and many other novelties and specialty items.

Another Exclusive Territory Opportunity!

For men and women agents I have run across an opportunity that a real live go getter can make an independent and profitable living handling the Nu-Way Later Bandage "that breathes" which sells at a low popular price and to consumers direct professional people stores hospitals schools factories first aid stations aid stations B&S shrdl cmfwy cmv etc. While at the office of the Nu-Way Manufacturing Company 3817 West Harrison Street Chicago I personally investigated the records of several of their agents throughout the country. One man I recall started with a small capital of \$7-20 last November and during the months of November December January and February the poorest season of the year this man in Indiana has purchased close to \$300 worth of Nu-Way Latex Bandages at wholesale prices on which he was able to make from one hundred to four hundred per cent on his investment according to the class of sales he made. Many other agents are doing and have done even better than this one who started with only \$7-20 I would recommend that every interested prospective agent write at once to the Nu Way Manufacturing Company 3817 West Harrison Street Chicago for full particulars on this wonderful money making opportunity and how to become an exclusive distributor in your district.

An Opportunity not requiring a single penny of Capital!

The Kay Products Company 502 South Wells Street Chicago manufacturers of raincoats; leather coats; sport blouses etc. for over twenty years are now lining up their spring and summer campaign through agents. They have never attempted to use colored agents particularly but are quite willing to allow their colored prospects the same agency proposition as they give the whites

and to all prospective agents who write at once before their sample outfits have become exhausted the Kay Products Company will send absolutely free with transportation charges prepaid their sample selling kit and full instructions as to how the agent can with only one or two orders a day make a living with earnings greater than any ordinary job would likely pay in salary and with out one single penny of investment on the part of the agent. This proposition should be acted on at once for the company has only a limited number of these free selling kits to send out and also because their agents must be assigned now at the beginning of their most profitable sales season.

An Opportunity For Every City

Many municipal administrations of the United States have taken advantage of the opportunity offered to them by the C. W. A. to start intensive surveys and investigations into local traffic conditions with the aid of competent staffs provided by the Federal Administration to find out what causes automobile accidents.

This series of traffic surveys is one of the most interesting developments of the present day Federal aid plan. They will show not only what kind of accidents happened and what the cost was in death injury and property damage but also what physical conditions and human failures helped to bring them about. These will include anything from misplaced traffic signal lights and improperly banked turns to violations of the speed laws. When the surveys are finished city officials will know where they when and how automobile accidents are occurring in their communities.

With the information obtained improvements can be made on the basis of actual facts and no waste of material or man power will be involved.

Sidney J. Williams vice president of the National Safety Council is Director of Safety for the C. W. A. and is head of the clearing house for technical information on these projects. According to Maxwell Halsey Traffic Engineer of the National Bureau of Casualty and Surety Underwriters who is Mr. Williams' assistant in charge of the area for New England New York and New Jersey "Traffic surveys can be made profitably in any city of the United States. No city is too small or too large. If the studies are made and their conclusions followed a 50 per cent accident reduction is entirely possible."

Postal Employees Met

The Omaha Branch of the Postal Employees held their regular monthly meeting March 3rd at the Mid City Community Center. The meeting was called to order at 8:30 p. m. by our president Mr. Malcolm Austin of Council Bluffs Iowa. Business was soon transacted. All communications were received and adopted. He was also a vet in the Civil War and was buried with military honors. Rev. Burckhardt and Mr. Englehardt had been friends for the past 30 years.

Chicago — And Chicagoans

By CLIFFORD C. MITCHELL Visiting a Bible House!

Recently in other columns I have mentioned the letter and the gift of a Bible from a large Bible Publishing House. I shall use this space in recording my impressions after my visit to their plant which is at the corner of South Jefferson and Polk Street in Chicago a three story brick building almost wholly occupied by this Bible industry. In this building are the general sales department the editorial department the printing department and the stock and shipping rooms. At this plant the New Analytical Bible about the receipt of which last week is published.

The binding is done by the A. J. Cox Company master book binders of Chicago and the distribution is handled through the John A. Dickson Publishing Company with Mr. A. W. Cox president of both companies.

Mr. G. C. Buxton is in charge of Sales and Advertising and has direct supervision of the distribution of the hundreds of thousands of Bibles.

Dr. James R. Kaye one of the outstanding Bible scholars of the country is the director of the Student's Bible Institute which is under the supervision of the Dickson Publishing Company. Dr. Kaye is the author of many religious books; we will consider these at a later time.

The New Analytical Bibles are marketed through several different channels mostly through individual representatives in each community or through newspaper and display advertising placed in hundreds of publications.

Many religious and secular news-
