HANDKERCHIEF TEST THRILLS SMOKERS How a New Kind of Tooth Paste Dissolves and Removes Ugly Tobacco Stains BOST Tooth Paste is more than a clean-tasting, refreshing dentifrice. It is the only tooth paste specifically created to remove the unsightly yellow stains from smokers' teeth. Go to your druggist today, buy a tube of BOST Tooth Paste and make the famous "handkerchief test." It is this: Inhale a mouthful of tobacco smoke and blow it through your handkerchief. The brownish, yellow stain on the cloth is the same "Smoke Screen" that cigarettes deposit on your teeth. Now squeeze enough BOST Tooth Paste on the handkerchief to cover the stain. Then rub the spot briskly with your wet tooth brush and see how quickly the discoloration disappears. Make this same test with any other tooth paste and you will find that the stain remains on your handkerchief. In like manner, BOST Tooth Paste, and no other, will remove from your teeth the stubborn chemical deposit of tobacco. BOST contains no acid, no abrasive, and is as safe and beneficial for the teeth of children as for adults. It sweetens the breath and refreshes the mouth. Brush your teeth with BOST Tooth Paste regularly. Consult your dentist periodically. And you will be doing all that you possibly can do to protect your teeth and keep them spotlessly clean. BOST Tooth Paste is sold at leading drug counters everywhere. Or in liberal trial tubes at your nearest chain store. If your dealer is out of stock, send 10c (to cover postage and handling) for a generous 14-day supply. BOST Tooth Paste Corp., 9 East 40th St., New York City.
