

INDUSTRIAL NEWS REVIEW

TAXES COST MORE THAN FOOD

By E. Hofer & Sons

Last year, according to the United States News, the American people paid \$1,035,000,000 for medical services, \$2,160,000,000 for fuel and light, \$3,600,000,000 each for clothing and for home rental, \$7,650,000,000 for the most basic necessity of all, food—AND \$9,000,000,000 FOR TAXES!

The increase in taxation—local, state and national—is the most startling and menacing economic development since the world war. It was not so long ago that we used to pity overtaxed European countries, in the belief that we were escaping their experience. Today, with the cost of all forms of government soaring in the face of diminishing taxable assets and earnings, we are very close to the European level. Recently England, one of the heaviest taxed countries, enjoyed a general tax reduction, made in the interest of industrial recovery. The United States, unhappily, has no such prospect.

A great part of the tax money does nothing to encourage industry—some of it is actually used for projects and experiments which discourage and throttle private initiative, retarding employment, rather than increasing it. It is a bar, not a spur, to purchasing power. It stands in the way of investment, industrial expansion, farm and home ownership. It is creating a vast, wasteful and inefficient bureaucracy which waxes fat while the public which supports it starves.

Industrial recovery and employment are inextricably bound up with the tax problem. Until government retrenches, all our efforts to go forward will be largely futile.

Every insurance policy written symbolizes thrift, foresight, wisdom—characteristics that are typical of the American people. Every policy written means that still another citizen has guarded himself against some potential exigency. Every policy written represents another stone in the bulwark we are erecting against the occurrence of future depressions. It is no exaggeration to say that American ideals and the institution of life insurance are inseparably linked together.

IN THE INTEREST OF ALL

The farm cooperative movement is, first and foremost, designed to help the agricultural producer—to obtain for him a larger share of the final selling price of his product, and to make his production methods more profitable and efficient.

In carrying out this purpose, the consumer is not "stung," he is, on the contrary, immensely benefited. It is necessary to him that a constant supply of first-grade farm products be always at his beck and call. He wants food of quality, sold at a fair price. And that is what the cooperatives strive to give him. When a farmer gets more for what he raises it does not mean that the consumer is the victim of profiteering—it simply means that the money he pays to the retailer has been fairly distributed between those who produced the products, those who handled them between farm and market, and those who sold them to the public.

From another aspect, the farm co-op is aiding the urban resident. Armies of the country normally provide the largest single consuming source for the products of our factories. The drop in farm in-

come is one of the most burning problems of depression. As the crops gradually make progress, and farm income rises, all classes of American citizens will reap the benefit of stimulated buying and increased purchasing power.

Today farm cooperation is one of the greatest social and economic forces in our national life. It has done much in its brief lifetime and its period of greatest achievement still lies in the future.

JOBS—TAXES—SAVINGS

FACE DESTRUCTION

The National Coal Association has issued a highly important booklet concerning the billion-dollar water power development of the federal government. On its first page, the booklet says: "The coal industry opposes the grandiose program and ruinous policy of federal water development because its consummation is calculated to destroy the market for millions of tons of coal, to put hundreds of thousands of men out of employment permanently, to further impair railroad revenues permanently, to duplicate and in many instances to destroy existing facilities for the production and distribution of electricity, to inflict incalculable injury upon both capital and labor in public utilities, in mines, in railroads, and upon those engaged in the distribution and sale of coal, gas, lumber, ice and sundry other lines, to lay further heavy burdens, both unwarranted and unnecessary upon the American taxpayer by adding a billion dollars or more to the public debt."

The facts indicate that no federal program was ever less justified by the public need. In every case utilities now serving the areas adjacent to TVA, Boulder Dam, Grand Coulee, Bonneville, Verde, Caspar Alcoa, Fort Peck & Loup River projects, can produce 47 per cent more power than is needed. When the federal plants are in operation, the excess will be jumped to 66 per cent.

In this case, the interests of the country face the unnecessary expenditure of almost one billion dollars—a sum which will be increased, it still other proposed projects are endorsed by congress. Your tax money, your job, your savings are directly or indirectly affected.

SCHOOL AHEAD—SLOW DOWN

During the summer months those warnings you see on country roads and in city streets—"School Ahead—Slow Down" or "School Ahead—Watch Out" means little to you. You know the buildings are closed and the youngsters scattered to all points of the compass, and you continue your speed without slackening.

Now, however, those signs have a grave significance. Throughout the country, thirty million children have again picked up their text books and readers and are busy at their schoolwork. The signs are a vital warning to all motorists to watch out for the youngsters.

In spite of the efforts of school

Eat Anything You Like

HAVE A "CAST IRON" CONSTITUTION

Do you have to be careful about what and how much you eat? Are you "run-down", constipated, nervous and feel "all in" most of the time? WHEN INDUSTRY STARVES
In 1913 the cost of all government in the United States was

GODEFROY'S LARIEUSE French HAIR Coloring

authorities and safety workers, automobile casualties still account for more child fatalities than any other accidental cause. Last year, 4,100 boys and girls of school age were killed in such mishaps, and many thousands more were injured, according to figures supplied by the National Bureau of Casualty and Surety Underwriters.

Statistics appear to place the blame heavily on motorists, for the youngsters have shown a remarkable ability to watch out for themselves by observing safety rules and principles. In five-years, for example while motor vehicle accidents involving adults have increased 34 percent those involving children have decreased 20 percent.

It has been said that the achievement in the schools is the brightest spot in the entire safety movement. Children can be taught to respect and obey the rules governing their own conduct in traffic, but they are helpless if careless motorists refuse to cooperate.

Motorists, take care for school children. The sign: "School Ahead—Slow Down" is a driving commandment.

WAGNER COSTIGAN BILL

By Stuart News Service

The Bristol, Tenn., Herald-Courier, August 15, 1934, stated that there had been a double lynching in Benton County, Mississippi, by two separate mobs, but the victims were hanged to the same tree, accused of the murder of a white man. The trial was to start in the circuit court at Ashland. In each case the officers were stopped by a dozen or more masked men. The prisoners taken and killed; for these lynchings, as for all others, there was no defense or excuse. If they were guilty, there could have been no doubt as to their fate.

If they were not guilty, that had as much right to live as other innocent men. The sheriff and the district attorney says, every effort will be made to bring the lynchings into court. The statement sounds familiar. Two more accused persons have been deprived of life without process of law, in violation of all the principles of justice; that is why Congress will enact a Federal lynch law. It is said that this bill will infringe on state rights. But states have no right to bow to mob rule. If the officers of the states are opposed to Federal Laws, they should punish the offenders and make it unnecessary as well as undesirable.

While the Knoxville, Tenn., News-Sentinel, Aug. 22nd, says that since January to June 1st, there have been two lynchings. Since June 1st, there have been 12. Prior to this date the Costigan-Wagner Federal Anti-Lynching Bill was a live issue in Congress. This threat was removed about the first of June, when the bill was pigeon-holed. Since that date more than one person a week has been lynched, and in no instance has any of the lynchings been punished. The N. A. A. C. P. has appealed to the President Roosevelt to insist on an anti-lynching bill at the next session of Congress. It is indeed hopeful sign for fairness and justice when two leading newspapers published in the heart of the south, makes such a statement for law and order. It is clear that an anti-lynch bill is absolutely necessary. There is an election and every Negro that is

approached for their support should find out how the candidate stands on this bill. This must apply to all candidates local or national.

By Andrew T. Stuart

Whether we realize it or not, it is never the less a fact, that the political campaign is on, an dit seems at this time that there are several Negro Democrats making bids to control the campaign set-up. Mr. Stanley Hale, who was one of the most active workers for Congressman Edward R. Burke for the SeSnatorial nomination in the primaries feels that he is due first consideration. Mr. Hale has a group of workers who understands the political situation among the Negro voters, and believes that if he is given the chance that he had during the primaries, he would be able to wage a successful campaign among this group.

Mr. Harry Leland, late Oil Inspector and President of the Nebraska Negro Democratic Club, feels that it is his rightful honor to be the mouth-piece for anything of importance coming from the ranks of the Democratic party for Negroes, in this state and particularly Douglas County. But the mere fact of his attack upon Congressman Burke and his supporters, who worked night and day for Governor Bryan in the primaries, made his selection impracticable. Representative Johnny Owen, who is up for re-election would like to see some of his friends get this privilege as he knows that his chance of support is slim with any of the old crowd.

Well what about the Non-Partisan organization, composed of both Democrats and Republicans, of which Sgt. Isaac Bailey is president, and Miss Gertrude Lucas is secy. To my knowledge it is the first time that a place has been set-up and financed by Negroes in this state, and offered a candidates of both parties; and if we are rightfully informed there is sufficient space for each party to conduct their own business set up and if it is the aim of the central committee to keep down expenses and at the same time wedge an effective campaign. It would do no harm to look into this matter. What ever the central committee decides it will receive the support of all the Negro democrats and a large number of the old rock-ribbed republican.

POLITICAL OUTLOOK

The wise ones along the stroll is saying that this will be a keen political battle fought between the two great parties. We are concerned greatly about the action of the men who are to manage the ship of state. Looking backward at the achievements of the present administration we are interested in electin men who will support the President's program. Nor can we see any hope for the country should the Republicans win this fall. It is fully realized by the people of this nation that there is not a man to be found in the ranks of the Republicans party that has the vision of President Roosevelt. Nor is there a man in this state with the ability, honesty, and fairness as Congressman Edward Burke, unless it is Senator Norris. The situation so far as we are concerned calls for much thought and self-reliance on our part less we make a mistake. We are told by political leaders of the republican party that their chance for victory this fall is good. This in spite of the favorable attitude towards the democratic party throughout the nation and the most thriving group of candidates that have been presented by the democratic party to the voters of the state.

However the chances can be taken, the Negro voters will be an interesting factor in the coming election. Therefore if we are to get the desired benefit in this state, we must not divide our vote. The present administration has been fair to our people. While in many of the sections of the country, there has been some unfairness, but this is not the fault of the administration, and in order to retain the prosperity and confidence that has been made, men must be elected who will support the President's program.

DRILLS INSTEAD OF BRICKBAT

New reports of increased mining activity, affecting metal mining states, are constantly appearing.

How long it will be before real progress is made toward normalcy is a matter of conjecture. But it is a fact that mining districts which have been deserted for years are being opened up once more, and that the sound of drills is echoing from diggings that have known only the wing beat of the bat since depression began.

This revival does not give cause for unrestrained jubilation because it relates largely to gold as the result of its artificially high price. Few industries are of such basic national importance as is mining—few, in good times contribute as much to the national welfare. Any change for the better in the mining situation is thankfully received by thinking citizens.

LOST 57 POUNDS OF FAT—DIDN'T CUT DOWN ON FOOD

"I lost 57 lbs. by taking Kruschen Saita and it had no ill effect on me. I didn't cut down on a single food—I recommend it to anyone who is overweight." Mrs. A. Ropke, So. Milwaukee, Wis.

To win a slender, youthful figure take a-half teaspoonful of Kruschen Saita in a glass of hot water first thing every morning. While fat is leaving you gain in strength, health and physical charm—look younger. Many physicians prescribe it and thousands of fat folks all over the world have achieved slenderness. A jar lasts 4 weeks and costs but a trifle at any drugstore. But protect your health—make sure you get Kruschen—it's the SAFE way to reduce and money back if not satisfied.
