Race prejudice must go. The Fatherhood of God and the Brotherhood of Man must prevail. These are the only principles which will stand the acid test of good citizenship in time of peace, war and death.

The intelligent white people of the South are well aware of the fact that only 100 ofen the law officers themselves are a party to the lynchings. They know that officials for public office in certain Southern states are elected to office because of their attitude and their favorable consideration of lynchers and lynchings. This is all known to the intelligent and cultured while people of the South.

Unfortunately for the South the political status of most of the states is shaped and controlled by the descendants of the poorest type of the slave holding class.. The politics of the South and shaping of the laws of the South is in control of the descendants of that type of Southern white men who were, during slavery the holders of such positions in the social and economic life of the South as plantation overseers and paddy-rollers.

This class of Southern white men, by virtue of their responsibility during the slave era, developed a brutalizing instinct, in fact a sadistic mind in that the agony and misery of others became a joy and happiness to them. The supporters and defenders of lynching are the heirs apparent to the throne of

But to every black man of the South we are sending this message: "You are supposed to be freemen; the Constitution of your country says that no freeman shall be taken, or imprisoned, or diseased, or outlawed, or banished, or in any way injured, unless by the legal judgement of his peers or by the law of the land. This law came down to you in common with other men from England's highest legal authorities.

In view of the repeated infringements upon your rights and privileges by mobs with no authority of law and without any legal sanction for their action, it now becomes your imperative duty as men to defend yourselves. You have observed the refusal of the United States senate to enact into law a bill which would have sustained you in your citizenship rights. In view of its refusal you have no other alternative but to exert every possible effort to resist the murderous mob when they attempt your home or your person.

When the law enforcing agenceis of your counties refuse your aid, in fact connive with the mob to destroy your life and property, your only refuge is to stand up and die like men. No man is violating any law when he defends himself against a mob. Mobs are both cowardly and criminal at heart; if you must go, then take somebody with you. Answer terror with terror; you can die only once; this is the message to the South.
