OUR COUNTRY'S CALLING LIST

— if printed in one book — would
be much larger than all telephone
directories in Europe combined

UNITED STATES 125,000,000 People
17,500,000 Directory Listings

EUROPE 550,000,000 People
12,500,000 Directory Listings

If your telephone directory and the telephone directories of all other places in the United States were combined in one book, it would be about one and one-half times as large as the combined telephone directories of all Europe . . . even larger than the combined telephone directories of all the rest of the world.

In proportion to population, the people of the United States have six times as many telephones as Europeans and make nine times as many telephone calls. Such great and widespread use of telephone service in the United States is evidence of its high quality, its great value and its low cost to telephone users.
