god. Thespis added to the choros an actor to fill in the intervals of singing and dancing. The Roman origin is quite similar to that of Greece.

The Middle Ages brought forth a new type of drama known as morality drama, in which a lesson was taught. This was done because all the churches had been destroyed and short plays for Easter, Christmas and various holidays were written.

The Renaissance brought back the promises of the classical drama. It was mainly religious in theme, but gave good suggestions of acting. The people opposed, but the drama continued to spread.

Spain and England began dramatic work about the same time and quite similar to each other. Marlowe and his poetry, Lyle and Greene and their comedy and Shakespeare with his Elizabethan drama swept the world.

America had its theatre, but no drama. The first dramatist in America was William Dunlap, who translated and produced plays from Ketzuebe English companies came to America presenting their works and thus influencing America.

Drama (By Miss Lula Mae Hall) Council Bluffs, Ia

A Greek term meaning action, and applied to that form of literature which is suited for performance, or action, before an audience. A drama tells a story by means of which the dialogue, dialogue, speech, gesture, facial expression makes pantomime stage "business" music, dancing, scenic painting are some of the theatrical accompaniments by means of which the dialogue has been made to imitate scenes from life.

Although in modern times dramas have frequently been written in prose, the drama in classical times was regarded as one of the three divisions of poetry, and so differentiated from epic, the narration of events, and lyric, the expression of emotion. Another distinction due to the Greek is the division of drama into two species, tragedy and comedy; the former dealing with the more serious themes of life and especially with suffering and death; the latter with life's follies and absurdities, fun and sentiment.
