NAACP; CALLS VOTERS TO ACTION

New York, Mar. 10—Without making any open threats or disclosing any immediate plans of action, the National Association for the Advancement of Colored People today issued a statement urging all citizens who are qualified to vote to register and be ready for the coming elections.

"We have important tasks ahead of us," the statement said. "In the 1938, 1940 and later elections and we cannot perform those tasks unless Negroes are qualified to vote."

The association emphasized that it is not interested in what political parties Negro citizens join, but in their registration so that they can vote when the time comes.

In reply to a question as to whether or not the NAACP will direct any political action as an aftermath of the anti-lynching bill failure, association executives avoided giving any comment. It was learned from other quarters, however, that the NAACP is by no means taking the anti-lynching bill defeat lying down. It has merely retired to a perfect strategy which is certain to be announced and to be followed up in the spring and fall.

Some hint of the attitude of the association may be secured from the comment of Walter Winchell, widely syndicated columnist, who declared in his column of February 28: "The National Association for the Advancement of Colored People is taking the defeat of the anti-lynching bill grimly, but patiently. The abrogation of the two-thirds rule (for nomination in the Democratic National Convention) breaks the hold of the Solid South. The Negro vote, they believe, controls the destiny of 17 states."

For the present the association is urging a heavy registration of colored voters throughout the North and West and in all those southern states where they have the least chance of voting. The letter sent today to NAACP branches by Walter White, secretary, urging registration states:

"Stress that the NAACP is not interested in what party ticket or candidates are voted for, but in the registration of every qualified Negro. Get ministers, civic groups, women's organizations, labor groups, and others to stress unceasingly this important matter. Particularly important is this in states where the Negro vote potentially holds the balance of power, and in southern states. There are several of the latter like Virginia, North Carolina, Kentucky, and Tennessee where more Negroes could register and vote if they would only do so. It will mean a sacrifice for some to pay accumulated poll taxes but that sacrifice should be urged. We have important tasks ahead of us in the 1938, 1940 and later elections and we cannot perform those tasks unless Negroes are qualified to vote. Obtain from the secretary of state of your state election laws and a statement of qualifications required and the procedure to be followed in registering."

Commercial Club To Map Out Campaign

The Negro Commercial club will hold its regular meeting at the Urban League Thursday evening at 8 p. m. at which time the committee composed of Messrs. Dillard Crawford, Chairman, Paul Holliday, A. Mamelet, C. Coeman and F. Carter will make their report as to the outlined program which shall be followed in the launching of a Better Home, Better Yard campaign. All Negro men interested are urged to attend.

Gives Library to Fisk College

A library of one thousand volumes which Dr. Robert E. Park has collected, because these special books have been found useful to him and his sociology students at the University of Chicago, has just been given to Dr. Charles C. Johnson with the understanding that they be held in trust for the use of the Social Science Institute at Fisk University. Dr. Park hopes that they will form the nucleus of a larger collection available to students interested in the broader studies of race.

When Dr. Johnson decided to give up his work as editor of Opportunity to direct the department of Social Science at Fisk, he did it with the advice of Dr. Park. Three years ago, Dr. Park joined the Fisk faculty, and together they have set up a Race and Culture Seminar which is attracting widespread notice. Only two other such courses are offered, one at the University of Honolulu where Dr. Park lectured four years ago, and one at the University of Chicago. This year the group at Fisk has

centered its attention on problems of acculturation involving the Negro, Indian, and Latin peoples of Brazil where social, economic and cultural aspects of racial problems are similar to those in America.

Dr. Park's library is made up of books and magazines containing much source material throwing light on the history of the Jewish people and on racial situations in Hawaii, Japan, China, Africa, South America and the United States.
