There are more than 3 and one-half times more criminals than there are students in our colleges and universities; for every school teacher in America, there are nearly 4 and one-half criminals."

This is a great challenge to the welfare of American society with its thousands of religious and social workers. We have tried all kinds of schemes to reduce the advance of lawlessness. Much good has been done through education, conference, strong law enforcement, recreation and moral rearmament. It is true that we need a resurrection of "fireside training" as suggested by Mr. Hoover but this resurrection must be promoted by regenerated hearts of those parents and leaders who control these firesides. Before there can be an effective reformation, there must be a definite transformation.

HAIL DISCOVERER OF HAY FEVER REMEDY

Minneapolis, Minn. Aug. 3 (AN P)—The foundation of what appears to be an excellent business is being laid by John P. Douglass of this city, who several years ago discovered a remedy which usens say is sure cure for the annoying ailment, hay fever. Mr. Douglass, who has been in Pullman service for a number of years, was a chronic sufferer from hay fever developed the remedy which he named Sea Foma in an effort to cure himself of the disease. Recovering gradually until he was completely free, Douglass shared his formula with others, finally being persuaded to patent the remedy which is now sold by the Public Drug Co., chain stores in Montana and is handled by many drug stores here in Minneapolis.

A GLOBE TROTTER'S SKETCH BOOK

By HI WATTS During my rambles in the old Bohemian quarter of Prague, now a part of Greater Germany, I arrived in front of the old town hall just in time to witness one of the most amazing clocks in the world toll the hour. It's really quite a show. First a procession of the 12 Apostles pass by the two small windows as the hour is tolled. Mechanical figures at the sides spring into action. A miser shakes his money bags, a Turk strums a mandolin and a skeleton rings a bell—all this while a cock crows vigorously! The venerable caretaker of the town hall told me after I had sketched the clock (known as a Horologe) that the mechanism was constructed in 1480 by a man named Hanus. Jealous city officials then ordered that the genius should be blinded so that he could never construct a similar or finer clock in any other town. Years later, on his deathbed, the sightless Hanus begged to be taken to the tower to give his masterpiece one final career. The request was granted, but once inside the control room, Hanus reached for the most vital spot in the delicate mechanism and smashed it to bits! For many years the best mechanics in Europe were not able to mend the damage the revengeful Hanus had done. It was finally restored in 1550 and has been running continuously ever since. Women's Clubs Parley Urges Aid For Youth

New York, August 10 (CNA)—The thirty-first annual conference of the Empire State Federation of Negro Women's Clubs, Inc., opened here yesterday in a three day session at the Harlem YWCA.

The first day's session was devoted to a discussion of the "education of youth in a changing world, education for effective living, and the importance of the study of Negro history and its effect upon inter-racial relations."

Miss Amelia Anderson, New York vice-president, urged the delegates to prepare themselves to meet "the changes that are taking place today more rapidly than ever before in the world's history. Our country demands of the Negro woman and every citizen, a one hundred per cent efficiency. Only the efficient count in the present walk of life."

She strongly advised the women of the race to acquire all the technical training possible in order to help effectively train a healthy young generation that will be mentally and physically strong in facing the new condition of life.

Through its scholarship awards, the Federation has aided many high school graduates in their efforts to obtain higher education and recognition in the field of art.

Calvin's Newspaper Service TESTED RECIPE By Frances Lee Barton

GOOD old-fashioned plums, turned into jam by using the most modern recipe, will assure you an excellent "spread" for your winter bread and biscuits. Can and preserve plenty of fruits and berries as they are in season. Today it's "plum time." Here is a "Plum Jam" recipe that is "plumb timely."

Plum Jam 4 cups (2 lbs.) prepared fruit; 7 1/2 cups (3 3/4 lbs.) sugar; 1/2 bottle fruit pectin.

To prepare fruit, pit about 2 1/2 pounds fully ripe fruit. Do not peel. Cut in small pieces and crush thoroughly. Add 1/4 cup water, bring to a boil, and simmer, covered, 5 minutes. (Sour, clingstone plums give best color and flavor.) If sweet plums or freestone prunes are used, substitute 1/4 cup lemon juice for 1/4 cup of prepared fruit specified.)

Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Skim; pour quickly. Paraffin hot jam at once. Makes about 11 glasses (8 fluid ounces each).
