Ans: Well what husband in this world wants his wife to travel around over the country as you wish to do and leave him at home? There is no need to be married if you. live apart. Why not talk your husband into moving to New York City where you can put your talent to use, but don't try talking him into allowing you to travel around, for he won't agree to it. Will I make the trip that I have planned for next month?
