Series 1)-43

1. Public ownership of natural resources and basic in-engineers, so as to ensure maximum employment,-with labor and consumer representation.

2. Paying most costs of war by current taxation, based on ability to pay, and benefits received from-Government exempting the minimum income essential to heafth.

3. Government direction of farm production, and control of processing and distribution of farm products with direct payments where needed to marginal farmers.

Effective government control of prices and of quality of essential consumer goods.

5. The initiation and participation of the United States Government in international arrangements, such as the control of atomic energy, money, credit, trade, natural resources and cartels, to prevent depressions and wars.

6. Opposing peacetime universal compulsory military training.

1. The Surplus Property Administration stated Dec ember 30, 1945:- "By July 1, 1946, it is estimated that over \$35 billion of property will have been declared surplus.

"This is fice times the surplus resulting jrom World War I."

The Government now owns about half the nation's machine tool factory facilities, a tenth of its steel production capacity. nearly all the synethetic rubber industry, and three-fifths of aluminum capacity.

Ownership is Government, and unless the people own the productive and distributive agencies, they can neither

own the Government,-nor have an economy of abundance 2. There are about 60 million people in families receiving a family income of less than \$2,500; many famil- mens' strike. ies have less than \$1,000.

The Federal Government can raise \$35 billion a year, for a few years, without taxing people with incomes below Smelting Co. and the Bernis Bag a health minimum.

Corporation profits after taxes were \$9 billion in 1945; will be baout as much in 1946.

husbands in Philly early Monday In 1942,-78.2 percent,-nearly four-fifths,-of the morning. She told police he would \$8,911 million net income received by 380,5550 persons not wake him for he suffered from having incomes over \$10,000,-was from ownership or heart trouble. control of property.

In 1945, net savings of individuals were \$35 billion. The larger the income, the larger the proportion from

tional controls.

6. The whole science of war has changed with the release of atomic energy,-and the atomic bomb. Trained specialists,-not manpower, will be the basic of aggressive as well as defensive war.

Page J

Use of force to restrain aggression, must be limited to an international police force, which makes large national armed forces a menace,-not a protection.

WATSON'S SCHOOL OF BEAUTY CULTURE N5WS

The enrollment Monday, Feb. 20 was satisfactory and Mr. V. V. Watson (instructor) was happy to have Rev I. C. Wade of Salem Baptist church join in the celebration in giving God the praise as Mr. Watson so often re-

fers to as the secret of his success. With so many encouraging remarks each student feels the future holds a wonderful blessing.

There are no opiates in Pinkham's Compound. It's made from Mother Na-ture's own wholesome roots and herbs plus Vitamin B. It HELPS NATURE. Mr. Watson is especially thankful for the greetings coming directly from the Usher Board of Pilgrim Baptist church of which he is a member. Those present are as follows: Miss Lydia E. Pinkham's Florence James, Mrs. James Allen, Mrs. Jones, Mrs. Ed Jackson, Mrs. Flora Pinkston, Mrs. Catherine Mason, Mrs. Gussie Harris, Mrs. Hortense Chambers, Mrs. Margaret Yancey, Mrs. Birdie Wheeler, Mrs. Rose Murrell.

Mr. and Mrs. Charles E. Singleton, Miss Velma Murrell and Rev. J. C. Wade

FBI men in Portland, Oregon,

ownership of property.

Sales tax and other consumption taxes are not needed. All Government spending, and high prices, increase land values. The selling price of land has increased about \$25

billion during the war. A 1% tax upon present selling price of land,-with a low exemption for small home and farm owners,-would yield nearly \$750 million.

3. The Post-War Committee of the U.S. Department of Agriculture states: "The agricultural production of the United States should be adjusted to national requirements. with due regard for export demand, and desirable profits" Farmers as a whole, are getting their highest income, but the first of April.

one-half get about 85%.

Direct Government payment to marginal farmers is the most practical way to get needed farm products.

In Britain all processors and distributors of farm products are agencies of the Government, and all farm production is directed, by Government.

4. The cost of living, under present policies, will probably increase about one-third, in a year or so.

CHESTER BOWLES, Price Administrator warns:-

"Unless we can win the fight in the next few months, we shall condemn America.... to a brief period of false boom followed by a shattering smash-up that will shake our economy to its foundations."

JOHN W. SNYDER, Director of Reconversion, told a Senate Committee:-"We have to stand off inflation, which remains a very real danger, and the false promises of inflation are a danger just as great."

Nearly a seventh of America's family units can increase their dollar income only slightly,-if at all, so-

holding the price-line, and quality is a part of price, is vital to them, ~ "我我不能不能不能。"

The Department of Labor reports the cost of living has increased about one-third during the war. It must be held there, and can be reduced.

The Office of Price Administration must be continued for at least two years, with adequate appropriations.

Increased prices compel small income folks to pay much of the war debt.

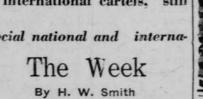

5. War can be prevented only by social ownership of all basic industries, and international controls of natural resources and other basic materials, of ocean borne commerce, war equipment, markets and currencies.

The British Labor Party is committed to major social ownership at home, and an Association of Nations, "the collective authority of which must transcend in the econom ic sphere, the rights of separate nations."

Eight corporations out of eighty-five affiliated with in ternational cartels, indicted by the Department of Justice for violation of anti-trust laws, have assets of about \$5.650 million; one-tenth of assets of all manufacturing corpor ations.

International government by international cartels, still threatens.

The practical alternative is social national and interna-
