 located in front of the barracks where the warden ordered five prisoners to "step out". This the men refused to do when it was obvious to the tightly packed group that the warden was reeling drunk. The warden then ordered "Pee Wee" Willie Bell to step out "because I'm going to kill you". When Bell refused this order the warden sent for some pick handles. A few minutes later the intoxicated warden spoke to County Police Chief Henderson, who got into his car and drove to Brunswick, sixteen miles away, returned with the machine gun, the warden reloaded in the packed prisoners "holding his pistol with both hands" to get Pee Wee. A few moments later the shooting began. The survivors insisted that the police took part in the shooting. This has been denied by the police. One investigator was certain that the machine gun had been used against the helpless prisoners.
 C. M. Moore, president of the local NAACP branch, discussing the "shot while attempting to escape" massacre, stated, "We are not upholding willful law violators, but so many rumors have been circulated since this unfortunate affair, we feel that a full sitting of the incident should be made."
 gave a considerably different picture from the NAACP findings. One of the first versions appeared in a local paper where it was reported—"When Warden H. G. Worthy of State Highway Camp No. 13 strode into a group of unruly Negro convicts at about 4:30 o'clock yesterday afternoon, Willie Bell a long-timer and reported trouble maker lunged at him. The warden shot Bell with his pistol and immediately half a dozen other armed prison guards opened fire on the convicts with shotguns and pistols.
 "A few seconds later the firing had ceased and five of the colored convicts lay dead, eight others were wounded one dying during the night at the city hospital. Bell received only a minor wound in the leg.
 "Witnesses said at the first shot by Warden Worthy, the prisoners broke in all directions, men scrambled under the nearby bunk house. Another was killed under the house and had to be dragged out, and the fifth managed to crawl under the house to a 10-foot wire fence on the other side. He was shot climbing the fence and fell dead on the outside.
 "The wounded lay where they fell, some under the bunk house building others sprawled in front of it. Fourteen of the group of 27 prisoners in the group were not hit by the bullets and crouched or lay still on the ground as guards rounded them up and herded them into the bunk house.

 instructor is supplied, together with a list of parts and tools required for a demonstration. The mechanic is then allowed to perform the service operation himself representing the "do" part of the session. Finally, a reference booklet summarizing the entire subject is supplied for the mechanic's personal reference.
 At the end of each service session, the mechanic checks his progress by means of a series of questions. Questionnaires, when filled out, are returned to the factory for review and grading and become a permanent record at the factory, acting as a basis for future awards of certificates to the dealer and his mechanics.
 As soon as a dealer enrolls, each of his mechanics is given an enrollment card and the dealer is supplied a large certificate stating that his mechanics are engaged in a program dedicated to the advancement of technical automotive service knowledge. After a dealer has carried out the prescribed schedule of training for twelve consecutive subjects, he is entitled to display a large certificate attesting to the fact that he employs in his service department have satisfactorily completed the first rroup of sessions.

 Without eyes and living underground, the earthworm senses the fall of night and wriggles to the surface of the earth.

Primitive Origin
 The universality of man's love of color was demonstrated early in antiquity. Each region and sub-region of the globe developed its own dye sources. It is estimated that nearly 1,600 different plants, vines, shrubs and trees were, at one time or another, employed for extracting dyes. However, only a few of the primitive dyes survived to ancient and medieval times.
