## An Electronics Partnership

An ultrasonic generator is tested by Dr. Leslie Gulton and his wife, Edith, at their laboratory in Metuchen, New Jersey. More than sixty electronic items are made by their company.

Working as a team in their electronics business, as well as their private family life, this husband and wife combination, Mr. and Mrs. Leslie Gulton, each holders of Ph.D.'s in pure chemistry and noted research experts in the field, head a staff of engineers at their Metuchen, New Jersey, laboratories, which is engaged in furthering this country's guided missile program. In addition to their guided missile work, the Gultons are responsible for significant developments in such unrelated fields as heart

research, the harnessing of ultrasonics for industry, micro-miniature electronic components and current-emitting ceramics. Gulton Industries, in their plants at Metuchen, New Jersey, Albuquerque, New Mexico, Culver City, California and Gananogue, Canada, pioneered piezoelectric ceramics, which opened up many new areas for industry, including bringing the perfection to high fidelity reproduction which made America's present hi-fi boom possible. **FNS**

## Star Christens Largest U.S.-Made Tanker

**LOVELY MADELEINE CARROLL** lends a hand at building the newest Niarchos tanker. Here the famous actress and friend of the Merchant Marine is seen making the first weld at the keel-laying of the 46,000-ton giant. Unique ceremony honored largest tanker yet built in America. Christened by Miss Carroll at its launching this January, the liner-sized ship will be big help in Suez oil crisis. **(ANS)**

## New Kit Encourages Young Sculptors

These youngsters are all set to bake a portrait bust they molded themselves following the simple, step-by-step instructions of Transogram's new Sculpt by Number kit. Each kit contains complete equipment for molding the portrait bust of a famous president, offering a choice of Lincoln, Eisenhower and Washington.

The modeling material, unique in itself, is Transogram's "Pyrocon"—a wonder plastic that bakes to lasting hardness in 15 minutes in an ordinary kitchen oven at 325-350° F. When cooled, it becomes practically unbreakable and can be gilded or decorated with plastic paint. In forming the bust, slabs of clean, white "Pyrocon" are rolled, cut and shaped from numbered patterns, and stacked into position, layer on layer. Professional tools are provided for finer surface details, and a round plastic stand for the finished bust. The newest idea in modeling kits, Sculpt-by-Number is available in the presidential series at leading toy counters at \$2.98.

## Georgia Watts

Georgia Ann Watts, age 3 months, of 2860 Menderson St., expired Saturday afternoon, January 26 at a local hospital. She is survived by her parents, Mr. and Mrs. George A. Watts; two brothers, Steven and Dennis Watts; sister, Mary Louise Watts, all of Omaha; grandmother, Mrs. Mary Francis Williams of Chicago, Ill.; great grandparents, Mr. and Mrs. Alex Wilder of Omaha; five uncles, one aunt and a host of great aunts, great uncles and other relatives. Funeral services were held Wednesday, January 31 at 10:00 a.m. from the Myers Funeral Home Chapel with Rev. Charles Myers officiating. Interment was at Forest Lawn Cemetery. **Myers Brothers Funeral Service.**

Today's profits are yesterday's good will, ripened.

## Artist Of The Ice Cube

Take one cake of ice—about 400 pounds—in the center of the room were the main conversational items. They were representative of Beetz in his finest kitchen form.

Place ice on low table and move to room of low temperature, preferably about 20 degrees, to prevent melting. Using ordinary wood chisel of medium width, add a dash of patience, great quantities of imagination and skill, and after two to four hours of chipping and carving a beautiful objet d'art will emerge. All this may impress as a weird type of recipe, but sculptor, or rather assistant chef, Fred Beetz—of the world-famous Chateau Laurier Hotel in Ottawa, will tell you different.

Of course Beetz' concoctions are not meant to be eaten, but they nevertheless grace the tables of the Chateau Laurier at many private functions. At one of these recently, a beautiful vase, a loving cup and a gay dancing girl all carved from ice and standing side by side on a table 250 when carved. **FNS**

## Cherries Are Red for Winter Holidays

**FEBRUARY'S A MONTH FOR PARTIES**... and this easy-to-make cherry coconut pie may be decorated with hearts for Valentine's... with cherries or hatches for a Washington's Birthday party... or with cut-out pastry flags for Lincoln... which make this pie as versatile as it is delicious!

In addition, this excellent cherry pie lives up to the familiar rhyme "She can bake a cherry pie, quick as a cat can wink her eye"—and with tender-thin coconut flakes to enhance both flavor and color, it's sure to be a holiday favorite.

### CHERRY GLAZED COCONUT PIE

- 1 cup Baker's Angel Flake Coconut
- 2 tablespoons butter
- 1 package vanilla pudding and pie filling mix
- 2 cups milk
- 1 baked 9-inch pie shell
- 2 teaspoons gelatin
- 1 cup cherry juice and water
- 1/4 cup sugar
- 1 3/4 cups drained canned red sour pitted cherries, packed in heavy syrup
- 2 teaspoons lemon juice

Saute 1/4 cup of the coconut in butter in saucepan until golden brown, stirring constantly. Add pie filling mix and milk; blend well. Cook and stir over medium heat until mixture comes to a full boil. Cool only about 5 minutes, stirring once or twice. Pour into pie shell. Chill.

Combine gelatin and 1/4 cup of the cherry juice. Heat remaining juice and dissolve gelatin and sugar in hot juice. Add cherries and lemon juice. Chill until thick, but not firm. Turn onto chilled pie filling. Sprinkle with remaining 1/4 cup coconut. Chill until firm.

**Valentine Pie.** Use recipe for Cherry Glazed Coconut Pie. Cut small hearts from leftover pastry. Bake hearts in hot oven (450° F.) about 10 minutes, or until done. Arrange mounds of coconut on cherry topping to resemble lace and place hearts on coconut. **(ANS)**

## THAT'S A FACT

**FATAL BLUNDER**  
THE ACTUAL CAPTURE OF THE BRITISH SPY MAJOR ANDRE, WAS ACHIEVED BY THREE MI-JACKERS WHOSE FIRST INTEREST WAS IN ROBING HIM. THE YOUNG ENGLISHMAN, IN SEARCHING HIM, THEY FOUND INCREDIBLY RICH PAPERS WHICH PROVED HE WAS A SPY. THE MI-JACKERS THEN TURNED HIM OVER TO THE AMERICAN ARMY.

## HEALTH HORIZONS

### New Hope For The Arthritic

No chronic disease is more widely spread on the North American continent than arthritis. Fortunately, the majority of the victims represent moderate or light cases only but, nevertheless, they are often severely handicapped and suffer considerable pain. It is, therefore, exciting to learn that specialists describe a new drug as "of great value in the mild to moderate arthritic."

The preparation, Cordex, combines one of the oldest anti-rheumatic drugs, aspirin, with the most recently discovered and most powerful of all the hormones which have proven to have an effect on arthritis and the related rheumatic diseases. This substance is prednisolone, a derivative of one of the hormones secreted by the adrenal glands.

From Arthritis Clinic of St. Elizabeth Hospital in Youngstown, Ohio, Drs. M. M. Szucs, Vitalij Holonko, K. M. Forster, and Dario Nalagan reported a collaborative study in which the drug was employed in 400 patients. In describing their findings in the Ohio State Medical Journal, the physicians wrote that the treatment resulted in "notable improvement... with a minimum of side effects." In no group of patients did the therapy fail. Results were described as "fairly good" in rheumatoid arthritis, and "good" to "very good" in those forms of the disease which are called osteoarthritis—very widespread in older people—gouty arthritis, and non-specific arthritis.

Cordex, the physicians explained, represents a "new therapeutic approach to the treatment of arthritis" which combines the traditional efficacy of salicylates, such as aspirin, with the advantages of modern hormone therapy. "The ad-

vent of this combined therapeutic approach," they continued, "has given the physician a new tool in the treatment of the many cases of mild and moderate rheumatic diseases not adequately controlled by salicylates alone."

The specialists also have begun to use another preparation, Cordex-Forte, for the more serious cases of arthritis, in which the dosage of prednisolone is tripled. In 100 trials with this drug, "a marked improvement was noted with minimal side effects." Both Cordex and Cordex-Forte used in these studies were supplied by The Upjohn Company.

## Advice to the Airborne

**Getting tired of the grey winter days? Want to escape to the Sun country? Maybe Arizona is the answer to your needs.** You can get in a quickie vacation by arranging a stopover in your coast to coast flight. Since TWA serves both Tucson and Phoenix, many women have asked me what to wear for an Arizona holiday.

Like most women, you'll probably want to travel in a suit. Perfect for a plane trip. Remove the jacket and relax as soon as you board your flight. You'll want a stole or light top coat for those pleasantly cool mountain evenings that follow the incredibly sunny days.

The remainder of your wardrobe will depend on the place you stay. For example:

**Dude Ranch**  
If you visit a dude ranch you will spend most of your time outdoors. Be all set for horseback riding, swimming, square dancing, and those wonderful moonlight "chuck wagon dinners" prepared and served by the cowboy. Your wardrobe should be well equipped with bluejeans or jodhpurs, and shirts for riding, big cotton skirts and blouses for square dancing. Blouses and shirts to be worn with "salmims," slacks, or shorts for relaxation. Sun back dresses with their own little jackets, flat-heeled shoes, and a stole or sweater will all be useful.

**Hotel Clothes**  
Some of the most elegant hotels to be found anywhere are located in Arizona. Your hotel will quite likely have its own swimming pool and it is a good idea to take not only your swim-suit, but a robe to wear over it when leaving your room. Although sports clothes will be an important part of your wardrobe, it is wise to

## Women Have A Hand In New Home Plans

Out of the recent Women's Congress on Housing, held in Washington, D. C., have come new home building plans such as this one, designed to meet the demands of today's family living. As one of the designs sponsored by the National Retail Lumber Dealer's Association, it provides those features especially stressed by the Women's Congress such as: space, privacy, storage facilities, and separate areas for activity and quiet.

In this tri-level design included in the Celotex Book of Today's New Homes, the home is divided into various "zones": lower level for recreation, informal entertaining, and family-group activities; ground floor level for busiest area—kitchen, dining room, living room; and upper or sleeping level with three bedrooms and bath.

Indicated in the floor plan is the lavatory on the main level near the rear entrance—another of the features strongly recommended by the Women's Congress. In addition, generous closet space has been planned throughout, including "twin" storage areas in the entrance hall. "Today's New Homes," featuring this and other homes incorporating recommendations of the Women's Congress on Housing, is available through local lumber dealers.

It is also available by sending direct to The Celotex Corporation, Department L-36, 120 South LaSalle Street, Chicago 3, Illinois, enclosing 25 cents in coin.

## Prompt First Aid Will Keep Tiny Hurts From Becoming Big

Preventing small hurts from turning into big ones is the chief purpose of home first aid. A skinned knee, a scraped elbow, a cut finger are seldom serious in themselves, but if neglect is permitted to open the door to infection, the result can be serious, indeed.

The tried and proved formula for safeguarding small hurts against infection is an easy one to follow:

1. Cleanse the hurt and the area around it with soap and warm water, applied with a soft, sterile cotton ball.

2. Cover the hurt with a soothing cream that reduces pain, fights germs and speeds healing.

3. Protect the hurt against the entry of dirt and germs by covering it with a sterile bandage.

There have been a lot of recent developments in medicine cabinet supplies that have made home first aid easier, quicker, safer and more effective. This is particularly true where small children are concerned, and every

mother knows that treating small children's small hurts constitutes about 90 per cent of all home first aid.

Cotton balls, already formed, completely sterile and ready for use, are designed to fit on the medicine cabinet shelf. These sterile, white balls are conveniently sized for cleansing the hurt and the perhaps grimy skin around it.

A healing first aid cream that contains a stinging, long-lasting antiseptic solves a problem for mothers of children who resist first aid because they dread being hurt a second time when an antiseptic is applied. Finally, there are the colorful, star-decked adhesive bandages that makes wearing a protective bandage a positive pleasure for the five- to ten-year-old.

## Which One's Real?

**THREE BUDDIES**, 18-month-old Stephen Pennington and his bulldog pals, look all the world like they could be tough on a moment's notice. Steve's English Bull, Lady Candive, is known in dog-world social circles, including the National Capital Kennel Show in Washington where this photo was taken. Answers to "Which are Real?" are given below.

**THESE LITTLE DOLLIES** walk and talk, but only one eats ice cream. Answer below.

**WHITE FROST**, a miniature pedigree white Pekingese from Cobham, England, romps with a toy playmate. Puppy was seven weeks old and weighed one pound when photo was taken. Which is White Frost? See answer below. **(United Press Photos)**

**TOY TRACTORS** too, are modeled after real ones like above, but there's no mistaking which is real and which is toy as Richard Behr and his father from Dubuque, Ia., prepare to drive away on new 1957 Farmall 450 tractors. Answers: Top—Real Lady Candive is at right; Center right—White Frost is at left; Center left—The dolly on the left is a real live girl.
