Fiber is got from the stems of many kinds of bananas. The most valuable straw. The Chicago man sprang to his is the "manilla hemp" of commerce, which holds the chief place for making white ropes and cordage. Old ropes made of it form an excellent-papermaking material, much used in the United States for slout packing papers. The manilla hemp industry is a large one. About 50,000 tons of fiber, valued at £3,000,000, are annually exported from the Phillippine islands. The ma- higantic hoke, but I don't. Many articles are made from manilta bemp-mats, cords, hats, plaited work, lace handkerchiefs of the finest texture, and various qualities of paper. At Wohlau, in Switzerland, an industry has been started for making lace and materials for ladies' hats from it. By a simple process it is made into straw exactly resembling the finest wheat straw for plaiting.

Aluminium Skates.

One of the most important aluminum novelties of the year is the invention of a New Yorker. It is a racing skate that is almost without weight and at the same time sufficiently strong to stand the tremendous pressure brought by skaters ambitious to break Denoghue's record of a mile in 2:12 1-5. The skate is composed of a steel runner eighteen inches long, one-sixteenth of an inch a knife. The blade is supported by a pecultar shaped aluminum support, on top of which is a light strip of mahogany, making a beautiful and artistic skate. One of the greatest problems skate manticable.

CLEARED HIS CLIENT.

How a Western Lawyer Overcame the Preponderance of Evidence.

From the San Francisco Call: "My first case," said a well-known attorney, "was the defense of a negro preacher in Missouri who had been arrested for them on the north side of the peak a stealing wood from a railroad company. The vote in the House-215 to 90 -against the free coinage substitute for the House bond bill makes it cerrain that whether the Senate passes as the Reed tariff bill, and that brings forward the question, what is this Congress going to do anyway? they walked along the principal street It looks now as though the republied to passing regular appropriation bills in making moves for or against he various presidential candidates, "That's so?" an- and that the final result of the session would be the appropriation bills.

THE clever saceming and maniputing that is going on among repubtican politicans, indicates in no oncertain manner, the fact that they are not so confident of victory as year ago they were loud in proclaimplaying such extreme confidence today. A year ago republicans contemplated making the tariff and foreign policy of the democratic administration the main points of ittack. The suddent revulsion of popular feeling overwhelming in favor of President Cleveland's conduct of foreign affairs has removed one object of criticism and censure. The importance that the money juestion has assumed in the political field has completely relegated the tariff question to the background. Thus the republican thunder has been cruelly destroyed. Which party is safest on the financial question? Republicans realize that the policy of heir party relative to this question a s been weak and vacillating It oa, displayed an unwillingn as to commit liself either way. Hence the club was here we'd do some huggling f wling of distrust that characterizes heir leaders as they enter the approaching financial confli t. It is democracy's opportunity. Let the porty make the most of it by adopt ing a platform that will win. The events of the last week have demonstrate cl arry that the people endorse the sound financial policy of the administration, that they are strongly in favor of the gold standard and are malterably opposed to the free cointge heresies of silver mine owners.
