"SHAKE HANDS."

Close friendships follow introduction to my glasses. They will aid you in many conceivable ways in the performance of your daily duties. Let me introduce you. Don't postpone this meeting. Procrastination is the thief of good eye sight. The constant dripping of water will wear away a stone. A slight eye strain impairs health because it is constant. The strain which first manifests itself as a slight discomfort should be promptly remedied by the use of glasses—PROPER GLASSES—the kind and the only kind I fit.

Every farmer who attends the fair this year, should take something to help out the dispay. Put in a few ears of corn, a peck of wheat, samples of big potatoes, melons, or something of that kind. C. L. Gutterson returned last Thursday night from a two weeks visit at his old home in New York with his mother and brother. He says that the farmers in that locality are having better times than they have had for twenty-five years. They are all prosperous and every body that will work, finds employment at good wages. He says the farmers among whom he mingled gave the republican administration credit for the good times they are enjoying. Under the former administration, the farmers only got from four to six cents for their cheese, while now they get from nine to eleven cents. He says there are no pops there. They are either republicans or democrats.
