**"ELONGATED DIMPLES."**  
Sometimes on led wrinkles, seen on the faces of many of the young, are often due to eye strala. Many people, especially younger ones, put off wearing glasses and suffer untold misery with eye aches and head, because they cannot afford big fees. In this connection I would state that I do not examine eyes as commonly done, but offer thorough ophthalmic examination that would cost you at least ten dollars elsewhere, absolutely free of charge.  
After the examination you may buy glasses or not, according to your needs and wishes. If you buy, my charges shall be moderate; services considered extremely so.

A cordial invitation is extended to all to attend both services.  
**E. A. KNIGHT, Pastor**.  
A fine rain visited this vicinity Monday and Tuesday night. As nearly everybody had their wheat sown this rain came in a most opportune time. It will not only bring the wheat up at once, but will greatly improve the pasture for cattle. The value of such a rain at this season of the year can not be estimated. Last year the shortage of the small grain crop was principally on account of the lack of rain in the early spring, which prevented the seed from sprouting. The outlook at the present time is very favorable for a big crop of wheat in Custer county.

# ROYAL Baking Powder

The strongest, purest, most efficient and wholesome of leavening agents. Not lowest in price, yet the most economical; indispensable to all who appreciate the best and most healthful food.  
Our country is enjoying prosperity almost unsurpassed in its history.  
For every one there is money enough to buy that to eat which is pure, sound, good, wholesome.  
Why should we use cheap, impure, unhealthful articles of food? There is no economy in them; they endanger the health, they may cost life. There are reported almost daily cases of sickness caused by eating cake, puddings or biscuit made with the cheap, alum baking powders.  
In all articles for food buy and use only the best. The good health of the family is of first consideration.

Alum is used in many baking powders because it makes them cheap. It costs less than two cents a pound. Alum is a corrosive poison. Think of feeding it to children! Yet the manufacturers of well-known alum powders are actually denying that their goods contain it.
