YOUR EYES WILL TELL.

When you need glasses. They'll give you warning you will readily understand if you don't choose to ignore it. Here are few of the hints: Headache, dizziness, aversion to bright light, sleepy feeling while reading, blurring of objects either at close range or distance, frowning or squinting, smarting or burning sensation in or around the eye, fatigue or requirement of stronger light when reading, dark spots floating or bright flashing before the eyes. These are but few of the many symptoms. When your eyes suggest a visit to me I can assure you the best glass and within the reach of human knowledge, at modern price.

True Economy

The difference of cost between a good and a poor baking powder would not amount for a family's supply to one dollar a year. The poor powder would cost many times this in doctors' bills.

Royal Baking Powder may cost a little more per can, but it insures perfect, wholesome food. In fact, it is more economical in the end, because it goes further in leavening and never spoils the food.

Royal Baking Powder used always in making the biscuit and cake saves both health and money.

You cannot, if you value good health, afford to use cheap, low-grade, alum baking powders. They are apt to spoil the food; they do endanger the health. All physicians will tell you that alum in food is poisonous.

These are "Good as new." Prices from 5 to 20 dollars. Celebrate the 4th at Broken Bow and call and see these bargains. Edwin F. Myers, Bicycles, Sundries and repairing.
