It isn't the material that goes into your repaired watch that results in a perfect job, it is the know how.

that does the business, any bungler can buy the fine kind of material that I use in repairing; but skill is the most valuable material that can be used in watch repairing; and the bungler can't buy it. I sell my skill for what it is worth and it will cost you less than bungling at lower prices.

As she cannot make good cake with bad eggs, no more can she make cake that is light, delicious and dainty with inferior baking powder.
