Don't Kill the Birds.

Some people, doubtless do not regard it out of the way to kill a quail, sparrow or prairie chicken occasionally, provided they can do it without being apprehended. Such people doubtless do not know that the violation of the law is not their great crime. These birds and fowls are of incalculable benefit to this country as bug and insect destroyers. One farmer informs us that he saw a prairie chicken that had been found near the rail road recently, half hour after sun up that contained 95 cut worms and but one grain of corn. This indicates the immense amount of good those birds and fowls are doing and shows the great harm it is to the country to kill one of them. Don't do it.

After seeing the magnificent sights and hearing the work of the state experiment station fully explained the guests to the number of 140 enjoyed a banquet served in one of the rooms of the buildings. Tuesday night the members were given a reception by the state officers in the Representative Hall where a very pleasant and social time was spent. Wednesday evening the members of the society were entertained at the rooms of the State Historical Society and refreshments were served at the close.

At the close of the business session it was decided to hold the next meeting of the association at Omaha at the time of the national association next year. The exact time has not yet been fixed.
