Some watches run when hanging up, but stop on their backs. Some watches "run in any position, but keep time in none. Some watches are like some people—you must humor them. Such people and watches are not desirable companions. A watch that is not reliable, consistent, faithful and timely at all times, under all conditions, in every climate and in all positions, needs treatment. Let me see the face of your watch. The hands may be on a strike because of over-work.

A Correction.

In the report of the republican county convention in the list of delegates to the representative convention, the name of J. E. Cooney appears, where it should be J. E. Cavence. It was a typographical error that we missed in proof reading and did not discover it until we had run the inside of the paper, which contains the report.
