it is entitled to sympathy. There is no objection to a woman's having a great command of language if she knows when not to use it.

Hist! Hist! Has any Europeon power been talking about the Monroe doctrine behind its back lately?

The pronouncement of a St. Louis judge that the hatpin is a legitimate weapon of female defense is supererogatory.

"Why do people persist in living so near the deadly Mont Pelee?" asks an exchange. They don't. They die by the thousands.

They say King Edward now has the look and bearing of an old man. This, however, is not remarkable. Edward cut his eye teeth quite a while ago.

A girl in Oklahoma won a \$50,000 prize in a land lottery, and at once received an offer of marriage, which she accepted. Thus does one lottery beget another.

The lady who started to clean her gloves with gasoline is now pondering seriously whether the saving on a pair of 50-cent gloves can be set off against the loss on a \$10,000 building.

A bald-headed scientist has figured out that the world will be froze solid in 1,000,000 years. Under Brother Baer's contract with Divine Providence there will still, however, be plenty of anthracite coal, so that the outlook is not so bad after all.

Russia has three different armies. In Murope her men are five years in the active army, thirteen in the reserve, and five years in the second reserve. In Asia they are seven years in active service and six in the reserve. In Caucasia they are only three years in the active army and fifteen in the reserve. Not as easy as in this coun-

The advertising given the Missouri mule in South Africa has brought him into so great prominence that recently 500 of his brethren left their happy home in Missouri for Bombay, British India, where they will educate the heathen Hindoo in the art of appearing to work when the weather is not too hot. The true mule can hear the dinner bell fifteen minutes before it rings and it is often a draw race between him and the colored "pusson" as to which one gets there first. The Hindoo is very quiet and simple in his tastes, but after he has driven the American mule a few times, he will sigh for a few hours of quiet repose in Nirvana.

There is a vast amount of attitudiniz ing in the world. The trouble is that people are conventional in mannersthat is essential for any sort of rational society. But they are conventional in thought. They seem to fear to lead their own mental life-to be frank with themselves. Their ideas are always in evening clothes, with white cravat and patent leather shoes. Many persons, for instance, profess to regard prize-fighting as a tremendously demoralizing and brutal sport. Yet they read accounts of famous fights in detail. The truth probably is that they really don't believe a quarter of what they say against pugilism. They say it because they know it is expected of

Long ago the sceptre passed over from King Cotton to King Corn. Every year the demand for the great American cereal is expanded by the discovery of new uses to which it can be put. The New York World has compiled a list of products extracted from corn, most of them discoveries of the last forty years: Bicycle tires, rubber shoes, cornstarch, laundry starch, confeetloners' starch, mucliage, corn oil, "pure" olive oil, filler for oleomargarine, lager beer, grape sugar, glucose, wall paper paste, gum drops. toilet soap, ink, salad dressing, fancy table syrup, table grits, health foods, popcorn, healing saive, several patent medicines, British gum, pearl hominy, hulled corn, canned corn, canned soaked corn, maizena samp, degerminated samp, corn meal, flour adulterant, pancake flour, quick malt, brewers' grits, husks for battleships, pepper adulterant, alcohol, bourbon whisky, brewers' meal, frumentum, flaked hominy, gum paste, vulcanized corn oil, gluten food, brewers' sugar, confectioners' paste, candy, rubber erasers, corn oil cake, naper box glue, buggy tires, rubber we know it.

sheets, linoleum, albuminoids called HOW NICKELS AND PENNIES GO. filler, envelope sticker, army poncho rubber heels, hot water bags, cattle food, gum arabic, stamp sticker. That is all to date. In forty years more the list will probably be more than doubled. Besides this growing demand more and more corn is being exported every year. When it is remembered that the area for corn growing is limited it is not difficult to account for the Even the pessimist is momentarily unprecedented rise in the price of corn

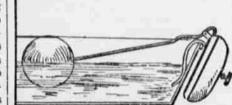

> about their age who was dressed as if Sam has turned out 1,100,000,000 cents. she were about to "go to a party." The 340,000,000 nickels, 100,000,000 dimes rompers asked her to join in their 200,000,000 quarters and 150,000,000 well as for keeping out flies. The plan might soil my new gown. (Yes, she are 119,000,000 big copper pennies said gown, and was only 10 her last What has become of them is a mystery birthday.) I am dressed for the after, for, barring a few in the hands of colenjoying a game of puss in the corner, knows where, ceased their play and crowded near, eager to examine the white fluffy fabric, the lace that had been sewed on of those over 3,000,000 are still out by hand and the ribbons used in dec. standing. The same is true of the nick oration, "Mamma bought this at --in New York," and the child mentioned 900 are unaccounted for. Slot machines the name of a house famous the world have greatly increased the demand for over. "We buy all our dresses there. Mamma wouldn't have me wear anything that came from any other estab popular in dry goods shops. Cents and lishment." The others crowded nearer nickels wear out pretty rapidly, bestill and the flush on their cheeks told cause they are passing constantly from of envy. "This gown cost \$50," the hand to hand, and the immense num child continued, "and I must be very bers of them that pour into the treas careful for I can't have another first best one until fall." Now it's dollars over for the purpose of sorting our to doughnuts that little Sally Ann, those which are too much damaged to dressed in a 5-cent-a-yard calico, mixing mud ples over in a back yard will is only four or five years. make a better woman, a fonder mother and a more useful member of society than this pert little miss who thinks of nothing but her clothing. Sally Ant and that is why the treasury has to go is learning domesticity even if her on turning out new ones at the rate of school be an inverted wooden box, her 60,000,000 to 90,000,000 a year. At the dishes cracked and discarded pieces of treasury they say that the cent is crockery and the material she kneads barometer of business conditions. During periods of duliness look to others. Her ideas of life are false and her ambition may prove to her a curse. The wrecks along life't late rapidly again. Anybody who wants pathway are not made from Sally Anns. But one should not blame little to the superintendent of the mint, who Miss Society for her thoughts and her will ship them at the expense of the sayings. She is not responsible. It is her parents who are at fault and some day they will regret bitterly having sown such seeds in her mind. They have taught their little one to think of herself as a peacock thinks; to strut about and call the world's attention to her fine feathers.

WARNS OF OVERFLOW.

A Device for Use with Refrigerator

Dripping Pans. Nearly every housewife knows the extra work and damage entailed by th overflow of the waste water pan which catches the drip from the melting ice in the refrigerator, and as it is an easy matter to forget o empty the pan at regular intervals, this accident s apt to occur several times in a house hold in the course of a summer.

It has occurred to two Massachusetts inventors that it would be a good idea to introduce a mechanism which would

ALARM FOR REFRIGERATOR PANS.

give an alarm when the receptacles was nearly full. The device consists of a spring motor, mounted on a base adapted to clamp on the side of the refrigerator pan, with a float at the end of a rod extending out into the pan, and a gong to be sounded by the motor. To put this device into position for use it is only necessary to clamp it on the side of the pan as shown with the float resting on the water.

When the latter rises to the danger point it lifts the float and trips the motor mechanism, which, of course rings the gong for a considerable two to twenty-six pounds length of time, only ceasing its clatter when the spring has run down or the pan is emptled. The inventors are Philip Yon and Louis Laprise, of North Adams, Mass.

Food, Drink and a Penny. Not many tourists who have visited England, even among those who made Portugal, Italy and North Africa. a point of visiting out-of-the-way cor ners, ever heard of a curious old monas tery that stands back of Twyford, a lit tle town near Southampton. It is a very old place, with an old and thick stone wall around it. In this wall there is a wicket gate, and by this gate a monk is always stationed. The monk is there to halt every traveler that goes by, and having halted him, he gives him a cup of ale, a crust of bread and a penny Centuries ago, it seems, some one died and in his will left to the monastery ar endowment that was to ease the way of other Japanese cities. The insects seil them on the table, if you please, at freshment and a small coin. As long therefore, as the monastery stands monk will stand by its wicket gate, and every traveler who passes will be cheer ed with a drink, a bite and a penny.

The people are becoming so advanced that you occasionally find a man these days who knows what alls him before he asks the doctor.
