

ADMIRAL SCHLEY ENDORSES PE-RU-NA.

Pe-ru-na Drug Co., Columbus, Ohio:

Gentlemen:—"I can cheerfully say that Mrs. Schley has taken Pe-ru-na and I believe with good effect."--W. S. SCHLEY--Washington, D. C.

ADMIRAL SCHLEY, one of the foremost, notable heroes of the Nineteenth Century. A name that starts terror in the heart of every Spaniard. A man of steady nerve, clear head, undaunted courage and prompt decision.

Approached by a friend recently, his opinion was asked as to the efficacy of Peruna, the national catarrh remedy. Without the slightest hesitation he gave this remedy his endorsement. It appeared on later conversation that Peruna has been used in his family, where it is a favorite remedy.

Such endorsements serve to indicate the wonderful hold that Peruna has upon the minds of the American people. It is out of the question that so great and famous a man Admiral Schley could have any other reason for giving his endorsement to Peruna than his positive conviction that the remedy is all that he says it is.

The fact is Peruna has overcome all opposition and has won its way to the hearts of the people. The natural timidity which so many people have felt about giving endorsements to any remedy is giving way. Gratitude and a desire to help others has inspired thousands of people to give public testimonials for Peruna who heretofore would not have consented to such publicity.

Never before in the annals of medicine has it happened that so many men of national and international reputation have been willing to give unqualified and public endorsements to a proprietary remedy. No amount of advertising could have accomplished such a result. Peruna has won on its own merits. Peruna cures catarrh of whatever phase or location in the human body. This is why it receives so many notable and unique endorsements.

Address The Peruna Drug Mfg. Co., Columbus, Ohio, for free literature on catarrh.

Home-Made Grain Sieve.

Where there is only a small quantity of grain to clean on a farm, a fanning mill seems to be in the nature of a luxury. Then there are often times when but a small lot of grain is to be cleaned for some special purpose. In either case the hand-made arrangement shown in the illustration will be found exceedingly useful. A box of convenient size is secured and handles fastened to either side for ease in handling. Inside this box strips are placed upon which the frames are to be run, as shown in the small cut on the right side of the engraving.

Frames of proper size and weight are covered with wire netting with meshes of various size. The upper mesh should be quite coarse and fastened into the box about three inches from the top. This is not to be taken out, but the frames below are to be made so they will slide in and out readily. It is a good plan to have

HOME-MADE GRAIN SIEVE.

more frames than slots, so that one may readily sift any grain one has. This little arrangement is inexpensive and any one at all handy with tools could build one in a short time.

Planting a Peach Orchard. Were I to set a large peach orchard I would prefer June budded trees. The roots are all in a bunch, and the tree can be easily started right and kept so. A great many persons in starting an orchard are in too big a hurry. They must have trees to come into immediate bearing, and so go to the nurseries and pick out the larger trees, overlooking the fact that the larger and older the tree the greater shock it receives. Years ago I set a large orchard from nursery rows two, three and four years old, and in five years the two-year-olds were the largest, thriftiest and best in every way. When set, the roots were all there, and the trees hardly stopped growing, while the older trees had mangled and cut roots, with too much body and limbs, and were more or less stunted. Be careful in setting an orchard, if roots are mangled, to cut them off smooth and trim most of the limbs or top.—Vevay (Ind.) Revell.

Double Saw-Horse. Unless coal is burned exclusively on the farm saw-horse such as is shown in the cut will be found a great labor-saving device. It is used for sawing both long and short pieces of wood, and if made four feet or more long it can be used by two men in operating a cross-cut saw. The two cross strips at the close ends are but fifteen inches apart, so one is able to saw strips as short as needed for any stove. This double saw-horse should be made of tough material and be braced as shown in the cut. The horse from which the

DOUBLE SAW-HORSE.

drawing was made was held together with iron bars, but the round pole, such as is commonly used in the center, would answer with inch-thick strips at the bottom on either side, if it was necessary to reduce the cost.

Over-Feeding the Horse. While most horses on the farm are properly fed, and in some cases underfed rather than overfed, there are farmers who are not judicious feeders, and when the animal gets out of order they depend upon condition powders to set it straight instead of regulating the feed. It may not be generally known that a prolonged use of condition powders will produce indigestion of a most violent type. Horses that are fed on grains largely, and who do not perform a great deal of labor, are quite liable to indigestion, and the easiest way to cure the trouble is to cut off the grain for a week or more and feed exclusively of bran mashes and good hay.

A Horse Malady. Most farmers are familiar with the horse that puffs and wheezes at his work. The disease is technically known as "roaring," and is said to be similar to asthma in humans. There is really no cure for it, but trouble may be greatly alleviated by treatment, and especially by proper feeding. If the disease is not so seated that the animal cannot do farm work, then that given it should be light and the feed should consist of little hay,

and this wet each time; feed mainly on grains. Take one drachm iodide of potassium and mix with one-half drachm nux vomica. Give this dose twice a day for two or three weeks during each bad attack, and during the period let the work of the horse be that which does not require much speed. The care and treatment indicated will relieve the animal greatly, although it is doubtful if it will ever amount to much for steady work.—Crown Point (Ind.) Register.

Selection of Young Dairy Stock. Many persons who claim to have a pretty good idea of what a dairy animal should be, still adhere to the old notion that it should be deep in the flanks, and wedge-shaped, increasing in depth and width backward. So far as mature cows are concerned, there may be something in this, if we add depth of udder; but we have to consider points that are applicable to the young calf, the undeveloped heifer, and the sire as well. Many good cows lack depth of flank, nor are all heifers of great promise and bulls noted as great sires specially remarkable for deep flanks; indeed, the reverse is generally the case. A deep flank is generally accompanied by a level of straight bottom line, so desirable in beef animals; but a promising dairy youngster is usually deep in the middle, with the bottom line from the middle running upward to the brisket, and toward the flank, which shows good depth through the middle of the body, but the reverse behind the shoulders and in front of the hips.—American Cultivator.

Good Gains From Locust Planting. The cultivation of the locust tree was recommended by Instructors Jones and Morse of the Vermont station for certain types of cheap barren land in 1897. One hundred seedling trees were set in rows four feet apart each way. At eleven years old they averaged sixteen feet in height and five inches in diameter. Encouraged by this small planting five thousand more seedling trees were planted in 1902 and 92 per cent of the trees were alive at the time of the report and making rapid growth. This planting was made at a total expense of from \$27 to \$32 per acre. Estimates are made of the possible value of the crop which it is believed at the twentieth year will be about \$256 per acre. Suggestions are given for planting, and where there is danger from attacks of insects mixed plantations are recommended in which white and pitch pines, birch, elm and box elder are believed valuable.

Value of Alfalfa. It has been demonstrated that alfalfa can be grown in nearly all of the States and when farmers, and dairymen especially, learn of its great feeding value it will be found on every farm. Once established it may be cut several times a year and for many years. It is rich in protein and when fed with corn fodder makes nearly a balanced ration, furnishing the proportion of protein needed by stock during the winter. Dairymen have long recognized the necessity of feeding grains or other fodder containing protein, but grain under the expense when the protein feeds must be bought. If alfalfa will furnish the bulk of the expensive protein, as it undoubtedly will, a chance to save considerable in the cost of feeding is offered by growing alfalfa.

Advice to the Driver. When a horse is running away it is then that the driver usually becomes as scared as the horse and the runaway is not helped much. The driver needs to keep his head at a time like this, even though he should lose it at other times. What the driver needs to do is to pull vigorously on one line and then on the other with such rapid succession as to confuse the animal so that his fear may be removed. A known runaway horse should be driven with care.

Farm Notes. The horse will be here when all the automobiles have been sold for scrap iron. The shoats that are intended for breeders should not be made to become too fat. The scarcity of help has caused people to think more and plan the work more carefully. Some farmers say that it will eventually kill alfalfa to mow it at any other than the time to cut for hay, namely, while it is in bloom. Has any one had experience that will serve to settle this question? When sugar prices are low, German farmers can hereafter utilize their crops more profitably by drying the beets for use as cattle feed. Experiments have shown this method to be feasible, and the dried beets can be easily stored. Pools of stagnant water should not be allowed to exist where hens can get to them; cover up, fill up or fence up. Poultry should have a constant supply of nice, clear, sparkling water. Wash out the drinking vessels frequently and occasionally put a drop of carbolic acid into the water. The machinery will run so much better when it is kept well oiled. Make the hired man run smoothly by a generous supply of oil of kindness. Keep him in a good humor and get more work done and the farm animals will have better care and attention. Any cow can be milked dry in a few weeks by irregular milking, sometimes at intervals of twenty-four hours and sometimes six. Separation from her usual company, a change to a new location, a strange milker and scolding voice are sources of irritation that more or less impair the milking qualities of the cow.

OCTOBER 10CTS

THE COSMOPOLITAN

The History of
The Carnegie Steel Company,
probably the most extraordinary story of a
great corporation ever written, is reviewed
in the October Cosmopolitan. The book
itself has sold—the entire edition—for
\$100.00 per copy.

On all news-stands, 10 cents

10CTS

The Utah state pavilion at the world's fair will cost \$5,700. A collection of stamps formed by G. Owen Wheeler, of the London Philatelic society was sold at auction recently for \$5,575. According to the monks of the Hospice of St. Bernard their famous dogs save on an average twenty lives every year on the mountains. Cultivate the memory, be energetic, attentive, and on the alert.

MADE BY TOWERS BROS. CO. NEW YORK

It isn't so much knowing a whole lot as knowing a little and how to use it that counts. Mrs. Wislow's SOOTHING SYRUP for children teething, softens the gums, reduces inflammation, allays pain cures colic. Price 25c bottle. "Next to knowing a thing is knowing where to look for it." The best education in the world is that obtained by struggling to get a living.

PISO'S CURE FOR
CURES WHERE ALL ELSE FAILS
Don't cough! Stop! Take Good. Use in time. Sold by druggists.

CONSUMPTION

FITS Permanently Cured. Worth of improvement seen first day's use of Dr. PISO'S Great Remedy for Cough, Bronchitis, Whooping Cough, Asthma, and all other ailments of the Throat, Lungs, and Chest.

N. N. U. 793-42. YORK N.Y.

A summer biological laboratory will be established at the Ohio State university on Cedar Point, near Sandusky, where a tongue of sand extends twelve miles into Lake Erie. Radium emits excessively minute corpuscles with such immense velocity that the energy of a single milligram of them represents about 3,500,000-foot tons. Every time a person loses his temper he finds a lot of trouble. A good memory is an excellent thing and should be cultivated. But don't forget that a little system and a five-cent lead pencil is superior to the best memory that ever existed.

PUTNAM FADELESS DYES do not stain the hands or spot the kettle, except green and purple. "Exercise is just as valuable when done as work as when performed in a gymnasium—the muscles do not know the difference between chopping wood and swinging an Indian club. I have used PISO'S Cure for Consumption with good results. It is all right.—John W. Henry, Box 642, Postoria, Ohio, Oct. 4, 1901. Courtesy is an obligation, a necessity, an indicator, an introduction, a recommendation, a passport, a reason, an influence, an opportunity, an investment, a peacemaker, and a pleasure. The man who saves one minute by writing illegibly through haste, robs the man who has to decipher his letter of double the time he saves and robs the letter of all its strength and half its welcome. "Always know more than you are expected to know."

Silk Culture in Manchuria. Considerable quantities of cocoons and skin silk are exported from Manchuria to France, where they are made into a special ribbon embroidery for the East Asiatic trade and returned to Manchuria and Eastern China. "Labor makes life sweeter. Idleness makes it a burden. "Nothing good bursts forth all at once." "Ignorance shuts its eye and believes it is right." "Opportunity generally knocks during office hours." "A good job soon gets a divorce from a bad man." "Doubt of any sort cannot be removed except by action." "To-day is your opportunity, to-morrow some other fellow's." It is expected that between 4000 and 5000 miles of railroad will be built in Africa in the next ten years. Some men never think of going to work until they have given everything else a fair trial.

W. L. DOUGLAS
\$3.50 & \$3 SHOES
UNION MADE

You can save from \$3 to \$5 yearly by wearing W. L. Douglas \$3.50 or \$3 shoes.

They equal those that have been costing you from \$4.00 to \$5.00. The immense sale of W. L. Douglas shoes proves their superiority over all other makes. Sold by retail shoe dealers everywhere. Look for name and price on bottom. That Douglas uses Corn-Cult proves there is value in Douglas shoes. (Patent) is the highest grade Pat. Leather made. For Four Years and Over \$4.00 the shoe has been in continuous production. Shoes by mail, 25 cents extra. Illustrated Catalog free. W. L. DOUGLAS, Brockton, Mass.

Many a fool gets through all right by looking wise and keeping his mouth shut.

If you always keep up, you'll never have to catch up.

If you would reach perfection follow the advice you give others.

A woman is always discovering a new corset that either will make a thin person look stout or a stout one thin.

So light is the touch of the native barber of India that he can shave you while you are asleep, without awaking you.

During a game of baseball at Bainbridge, Ga., a ball hit from the bat struck John B. Steagle in the side causing death in an hour. The victim was one of the players, aged twelve years.

Between 5 and 45 there is not one woman in fifty that does not dye her hair, and the reason she doesn't is because she doesn't have to.

One nice thing about the way women dress is that at a picnic they sit in a damp place much more comfortably than a man can.—New York Press.

Some animal tamers carry in their left hand a second whip, which is never used. It represents to the wild beast the terrors of the unknown. He has experienced the sharp, stinging flick of the whip in the tamer's right hand, but for the life of him he cannot imagine what anguish lurks in that mysterious whip in the other hand, which is never used.

ORIGIN
Of a Famous Human Food. The story of great discoveries or inventions is always of interest. An active brain worker who found himself hampered by lack of bodily strength and vigor could not carry out the plans and enterprises he knew how to conduct was led to study various foods and their effects upon the human system. In other words, before he could carry out his plans he had to find a food that would carry him along and renew his physical and mental strength. He knew that a food that was a brain and nerve builder (rather than a mere fat maker) was universally needed. He knew that meat with the average man does not accomplish the desired results. He knew that the soft gray substance in brain and nerve centers is made from Albumen and Phosphate of Potash obtained from food. Then he started to solve the problem. Careful and extensive experiments evolved Grape-Nuts, the now famous food. Grape-Nuts contain the brain and nerve building food elements in condition for easy digestion. The result of eating Grape-Nuts daily is easily seen in a marked sturdiness and activity of the brain and nervous system, making it a pleasure for one to carry on the daily duties without fatigue or exhaustion. The food is in no sense a stimulant, but is simply food which renews and replaces the daily waste of brain and nerves. Its flavor is charming, and being fully and thoroughly cooked at the factory it is served instantly with cream. The signature of the brain worker spoken of, G. W. Post, is to be seen on each genuine package of Grape-Nuts. Look in each package for a copy of the famous little book, "The Road to Wellville."

CASCARETS

CANDY CATHARTIC

THEY WORK WHILE YOU SLEEP

THIS IS A 10c BOX

GET WHAT YOU ASK FOR!

CASCARETS Candy Cathartic are always put up in blue metal box, our trade-marked, long-tailed C on the cover—tablet octagonal, stamped C O O. Never sold in bulk! Imitations and substitutes are sometimes offered by unscrupulous dealers who try to palm off fakes when CASCARETS are called for, because the fake pays a little more profit. Get the genuine CASCARETS and with it satisfaction or your money refunded under iron-clad guarantee. 10,000,000 boxes a year, that's the sale of CASCARETS today, and merit did it. They are a perfect cure for Constipation, Appendicitis, Biliousness, Sour Stomach, Sick Headache, Bad Breath, Bad Blood, Pimples, Piles, Worms and all Bowel Diseases. All druggists, 10c, 25c, 50c. Sample and booklet free. Address Sterling Remedy Co., Chicago or New York.

ADMIRAL SCHLEY
ENDORSES PE-RU-NA.

Pe-ru-na Drug Co., Columbus, Ohio:

Gentlemen:—"I can cheerfully say that Mrs. Schley has taken Pe-ru-na and I believe with good effect."--W. S. SCHLEY--Washington, D. C.

ADMIRAL SCHLEY, one of the foremost, notable heroes of the Nineteenth Century. A name that starts terror in the heart of every Spaniard. A man of steady nerve, clear head, undaunted courage and prompt decision.

Approached by a friend recently, his opinion was asked as to the efficacy of Peruna, the national catarrh remedy. Without the slightest hesitation he gave this remedy his endorsement. It appeared on later conversation that Peruna has been used in his family, where it is a favorite remedy.

Such endorsements serve to indicate the wonderful hold that Peruna has upon the minds of the American people. It is out of the question that so great and famous a man Admiral Schley could have any other reason for giving his endorsement to Peruna than his positive conviction that the remedy is all that he says it is.

The fact is Peruna has overcome all opposition and has won its way to the hearts of the people. The natural timidity which so many people have felt about giving endorsements to any remedy is giving way. Gratitude and a desire to help others has inspired thousands of people to give public testimonials for Peruna who heretofore would not have consented to such publicity.
