#### A Commendable Enterprise.

Every public enterprise established in a community has a tendency to enhance the value of all other property of the vicinity as well as to the increase the business of all others to a greater or less degree, in proportion to its magnitude.

It is because of this fact that every citizen should feel an interest in every business institution or enterprise located in the vicinity. No town ever attained great prominence in the business world or in population that was inform us that they have taken was devoid of public spirited men and public institutions.

Both are indispensible to the success and prosperity of any thrive without them.

We are pleased to note that Broken Bow can boast of more than one institution in which not Dec. 8, 1903, by Prof. Lucian only the proprietors are succeed- from contact with explosive Edgar Follensbee in one of his ing financially but in which the matter. public is being benefitted.

It is with commendable pride Husking mittens, gloves, hus- our citizens point to the magnikers wrist bands, furniture of all ficent telephone system built up oil tank and engine, so as to rekinds, stoves, tinware, granit- in our midst by one of our enterprising citizens.

The Business and Commercial College is an institution of private enterprise, that sheds a benign influence over the vicinity and fayorably affects the business interest of all.

But we have another enterprise that has recently been establish-Dec. 12, 1903, their skimming ed in our midst supplying a long station camplete consisting of lot felt want, that is indispensible to public convenience and comfort, that possibly has not re-this enterprise. Then its use of cancers and tumers. They separator. Sale to take place at ceived due credit from the public will be as indespendishble as the simply because attention has not telephone is now. been directly called to it.

The Broken Bow Gas and Fuel plant, which has recently been established in our city by some of our enterprising citizens, is an enterprise in which the community may well take pride.

Those who a few short months ago remember how inconvenient it was to go about the streets at before them are now in a position to appreciate the plant founded by the Broken Bow Light and Society meets at the Church. Fuel Co. Especially is this true since the city has had erected on several prominent corners 500 candle power gas lights that reflect their soft and penetrating Heaven to a Heart in the Desert' will be rays for several rods distant and serves as "beacon lights" from almost any part of the city. For giving night proved quite a suc- a time after the plant was inaucess financially. The attendance gurated the public regarded it was large. The management only as an experiment and the only as an experiment and the business houses were loth to put A. T. Sims and family, who in the lights and its growth was slow and the plant was operated at a loss.

The owners however had implicit confidence in the project and patiently bore the expense until now, up-to-date business houses cannot get along without per, Wyoming, in which he was the gas light. The lights furn-stokholder. From reports it ap- ished are not only superior, but ished are not only superior, but are so much more convenient and and easier manipulated than the land. Mr. Weston being in the ordinary gasoline lamp that when state at the time the bank closed once installed no one is satisfied to return to the old way.

The company is now employing several hands in the work of enterprise of considerable importance to the city as it furnishes employment for labor.

The mains now cover nearly service have been supplied.

Until recently we were not excuse for it to have happened. The Lincoln Daily Star desires aware of the fact that we had a to give away free to the boys of plant here that was particularly different or superior to other

But a few days ago a gentlehave to pay any money to get man from a neighboring city by the engineer on the rear seccalled at our office, after spendyour name and address and we ing a couple of days in the city collision. and remarked that we had the Address Watch Department, ing for the past two years, that friends.

did not furnish as desirable a light as ours and that the equipment was very unsatisfactory, and up to this time the plant is

being operated at a loss. He went on to explain that he had gained much valuable information from personal inspection of our plant and conversation with the management which would aid him in making material improvements in their plant.

He commended our plant and the management very highly.

The proprietors of our plant great precaution in the past to prevent damage from explosion and that now they have taken further precaution by sinking a community. No community can tank into the ground. After putting the steel barrel of oil in, the tank is filled with water wholly covering it, which makes an explosion utterly impossible

The company has planned to build a brick basement, in the spring with cement vault for the move all possible danger and do away with the noise from the street created by the machinery when in motion.

This will remove any occasion for apprehensions and will materially enhance the value of the plant, as well as prove highly satisfactory to the public.

Not until our people have these lights placed in their residences for both light and fuel will they be able to appreciate the value of

### Church services.
