There are many newcomers locating in Broken Bow. There would be more if new enterprises could be established. Every new business means more families, and more families mean an additional pay roll and more money to spend for rents and supplies. The advantages of such things are obvious. Why not all get together and land something in the manufacturing line that will build up the city? Of course we have "Knockers" who will say this is impossible, but it is not—if the "knocker" will subside and all others pull together.
