SOME FACTS WORTH MENTIONING

(By Dr. Caldwell)

Several years ago, while in private practice, I thought it wrong to advertise, simply because I had been told so and had not had experience enough to know better. After a while I discovered a valuable plan of treatment in certain cases, and fortunately obtained a large number of patients, enough to fully test my plan and prove its success. I there-upon prepared a lengthy paper upon the subject and read it before the state medical society. What was the result? A half a dozen members took the floor to say what the treatment had been for a hundred years back, and to claim that the old treatment, though unsuccessful, should be continued, notwithstanding that the new treatment had been successful. I thought differently and continued to use the new method, and made remarkable cures of cases that had been pronounced incurable. My business increased rapidly as each person that I cured told some friend, who came in turn and was cured. Each patient advertised me a little. What then? In that large city there were not more than 400 cases of the kind. I cured ever case that came to me and then had nothing to do except the ordinary business of a local physician. I knew there were hundreds and thousands of others elsewhere, who might be cured if they only knew; and I advertised. Cured hundreds of others, and have advertised ever since. I have relieved more suffering, cured more patients, made more people happy, and done more good generally because I have told the people what I can do, and I shall go on with the good as long as my strength will permit.

I advertise because I have something worth advertising. I have made myself competent by years of special study and experience, and by the expenditure of large sums of money. By advertising I place before the people the facts which enable them to know what I can do. I thereby reach thousands, who, given up by local physicians or unsuccessfully treated, give themselves up as incurable. I cure them and thereby enlarge my field of usefulness. By no other way than advertising could these people have known that they could be cured. Every thrifty and prosperous business in life, save those of law and medicine, advertise freely. Lawyers do not, for they only use in their business what others have made for then years before. They only do what has been written. "Regular" doctors do not advertise for the same reason. They have nothing new, nothing which some one else has not written or told them of, they get their knowledge from the books. A man may read medicine until he is blind and then know nothing of it. To be successful he must apply his own mind. Make his own researches, and to that he must have room and opportunity. He must have cases hundreds of them, and compare results. If he does not do this he is a machine without novelty, skill or ingenuity, still plowing with a wooden plow, still traveling on foot or horse-back, and ignoring the advantages of steam, living but not learning. The same is true of a lady doctor.

Below you will find published the names and addresses of some of the recent cures that I have made. These people's affliction were, under the ordinary physician's care, considered hopeless, and no prospects for a cure:

Sophia Kran, Albion, Neb., cured of a bad skin disease.

Mrs. Lulu Towsley, David City, Neb., cured of female trouble and female weakness.

Mrs. C. W. Killian, Wakefield, Neb., cured of female and nervous troubles.
