One of the most important offices to be filled at the election is that of assessor. Everybody who has property is interested in having a man of experience, good judgment and absolute fairness to have charge of the assessments, one who has no friends to reward or enemies to punish. He is one of our old residents and as deputy assessor of Victoria township has been so accurate in listing the values of property that the board of equalization have found it unnecessary to change his assessments. You cannot elect a man better fitted for the position or one who will discharge the duties thereof more honestly, faithfully or conscientiously. Will Prove a Valuable Member.

The present is the age of young men, and recognizing this fact the republicans have nominated one of the brightest young men in the county for supervisor of the sixth district. Herbert E. Myers is strictly a Custer county product, and every voter of his district ought to give him a chance to show what kind of stuff he is made of. Mr. Myers left a Custer county farm to obtain an education in the state university. He graduated with high honors, and was accorded one of the very brightest students in that great institution of learning. He is splendidly equipped in every way for entry upon almost any business or profession, but like a hard headed, sensible young man, he has returned to the farm and is proud to be known as a farmer in the best county in the best state in the union. He has made good in every position in which he has been placed and there is no reason to doubt, that if elected as a member of the board of supervisors, he will be one of the most valuable members of that body, and make a record for which none will need to be ashamed. The taxpayers of Custer county contribute their share towards the support of the state university and the only way they can get value in return for the same is to get it out of the boys who are thus enabled to get a college education. Farmers' boys all over the state are coming out of this institution fitted for all professions, and particularly for the profession of farming, the one great industry of this state, and the old methods of farming are giving way to the scientific farming which requires brain as well as muscle. Those who may be inclined to make light of Herbert Myers, because he is a young man and a college graduate, do not know him. Added to his natural ability, he inherits good business sense, and has had a training and discipline which will insure success in anything he undertakes, and by electing him a member of the board of supervisors the taxpayers of the sixth district will be acting for their own best interests.
