SURE CURE FOR HOG CHOLERA

Dr. Melvin Tells Mr. Pollard He Can Save Afflicted Herd.

Washington dispatch to the Omaha Bee: During the hearings before the agricultural committee recently Dr. Melvin of the bureau of animal industry made the statement that they had discovered a cure for hog cholera. Mr. Pollard asked Dr. Melvin: "Are your scientists able to go into a lot of hogs that are infected with this malady and by applying this remedy prevent the continued mortality of the herd?" "Yes, sir," was the reply, "they have done that."

"After it has broken out?" "Yes, sir; not only our own men, but in some of the states."

"What percentage can you save in a herd of that kind?" "I do not know definitely. I think I would be safe in saying 98 per cent. We have gone into herds where the disease was prevalent and treated one-half of the herd and left the other half untreated, and nearly all the untreated hogs would die and the others would survive. That was done in a number of instances."

Upon learning that no co-operative work along this line had been undertaken in connection with the Nebraska station, Mr. Pollard took the matter up with Prof. E. A. Burnett of Lincoln and has just received word that Dr. Melvin has recently been in Lincoln and discussed the matter with Prof. Burnett and Dr. Peters of the Nebraska station.

The method requires an expert to administer it, but it is hoped that a system can be arranged whereby it will be possible for the farmer to handle it himself.

Mr. Pollard says that if there were any epidemics of hog cholera existing in the First district he will be glad to take the matter up with the department with the view of having an expert sent to the neighborhood who will be prepared to administer the treatment to the diseased herds if the existence of such epidemic is brought to his attention.

Stock Shippers Complain.

That if the shipper had to go to the town for something to eat he frequently returned to find the train gone, and he always has to run the risk of being injured by Burlington trains in crossing tracks.

"My baby niece was suffering from that terrible torture, eczema. It was all over her body but the worst was on her face and hands. She cried and scratched all the time and could not sleep night or day from the scratching. I had her under the doctor's care for a year and a half and he seemed to do her no good. I took her to the best doctor in the city and he said that she would have the sores until she was six years old. But if I had depended on the doctor my baby would have lost her mind and died from the want of aid. But I used Cuticura Soap and Cuticura Ointment and she was cured in three months. Alice L.
