A Full Page Ad is Worth Four Times as Much as a Half Page--
According to "Advertising Arithmetic!"

There are some stores in this town that would be great stores—hustling, bustling success—

If they Were Advertised Just Twice as Much as They Are Now!

Of course, if a particular store were to begin at once to double its advertising in amount, it would more than double its effectiveness. This is one of the vagaries of "store-arithmetic." Two columns of space are worth more than twice as much as one column—in store-advertising. A full page is worth four times as much as a half page—but, of course, is not charged for on that basis.

It's important for you to find out whether your store may not be one of those that ought to be advertised just twice as at present.
