**The Jackson Model "C"**  
is the best car for the money  
that is made in the automobile world to day. This car is famed for hill climbing, famed for taking care of the hard propositions, it is simple in its construction, big in its engine equipment, handsome in outline, and big and comfortable in its proportions.  
Come in and let me prove this is true.  
**John S. McGraw**

**THE STRAIGHT-LINE-DRIVE**  
Power cannot be carried around a corner without great loss, due to friction. In the ordinary automobile much energy is wasted in transmitting the power from the engine to the rear axle through universal joints, or, in other words, around corners.  
In the Rambler the driving shaft, when the load is in the car, is in direct line with the crank shaft and the angle found at one of the universal joints in most other driving systems is eliminated. The drive is thus accomplished in a direct line.  
The Rambler straight-line-drive delivers the maximum power—saves energy—prevents wear—reduces cost of upkeep.

**Rambler**  
The Car with the Offset Crank Shaft

THE GREAT ECONOMY AND EFFICIENCY OF THIS CAR IS DUE TO SUCH EXCLUSIVE RAMBLER FEATURES AS THE OFFSET CRANK SHAFT, STRAIGHT-LINE-DRIVE, SAFETY SPARK RETARDER, RAMBLER SPARE WHEEL, ETC. Let us prove this to you. Call and we will explain these Rambler features in detail, and by actual demonstration; no obligation on your part whatever.  
Seven Passenger Model, forty-five horse power with offset crank shaft, \$2500.  
Other models, \$1150 to \$2500.
