The Call Of The Coast

The Seattle Exposition invites you. The Pacific Coast country, in the development of its marvelous civilization, solicits you to journey through that land. The melting snow of the mountains is a magical resource, shaped to the genius of electrical and horticultural wizards; those mighty forests are the last of their kind left standing in this country; there are no such orchards, orange groves or floral landscapes in the world—nor have there ever been. On a tour of the Coast you pass through an empire, where the romance of the Spanish past has been merged with the human activities of the new West.

See your own country; see the West with its fast growing wealth, population and incomparable cities, and learn what a future it may offer to your sons; this 5000 mile journey is a broad education. 1909 offers much to tempt you.
