BREAKFAST PARTY.

Last Friday morning at eight o'clock Mr. and Mrs. J. B. Heister gave an informal and farewell breakfast in honor of Prof. and Mrs. McIndoo. Only a few of the neighbors were invited to this early morning feast.

INFORMAL RECEPTION.

A pleasing feature of the Chautauqua week was the delightful and informal reception tendered Mr. and Mrs. Lou J. Beauchamp, by the ladies of the Presbyterian church at their tent, Tuesday afternoon, immediately following the afternoon's instructive entertainment. Quite a few ladies and gentlemen availed themselves of the opportunity of meeting the distinguished guests. Orange punch and little cakes were served by Mesdames Hunter, Mair and Brenizer, assisted by several young ladies.

PIANO RECITAL.

Last Saturday afternoon at 3 o'clock the students of Mrs. Frank Taylor gave their mid-summer recital. These recitals by the pupils of Mrs. Frank Taylor have become quite popular. There was a large attendance of relatives and friends. The pupils, as usual, acquitted themselves with much credit. Dainty refreshments consisting of punch and ice cream cones were served.

COUNTY FAIR TO BE A HUMMER.

(Continued from front page.)
Last year, without driver or rider, was 2:18 which has only once been equaled in the history of this association by horses driven. To see the wonderful performance of this mare is alone worth the time and cost of attending the fair. To see her

perform is to realize that the horse has almost human intelligence.

NOVELTY RACES.

The novelty races to be given this year will far surpass any heretofore given. The three-mile relay race by lady riders and their partners, each riding alternate half miles, has always, when given heretofore, pleased the crowd immensely. A new feature in this class of races is another race in which both ladies and gentlemen may participate. This is a mile and a half race without changing horses. The first half mile the horse walks, the second the horse trots, single-foots or paces and the last half mile the horse runs. It is expected there will be many entries in this race and that it will prove very entertaining. It is hoped by the management that at least twenty of Custer county's best equestrians, both ladies and gentlemen will take part in this race. Then there will be still another relay race of a mile and a half, each rider to use three horses, each horse to go but half a mile, the rider to change saddles with each change of horses. This race should draw large entries from Custer county's boys and young men. Liberal premiums will be paid for winners of these various relay races.

However, the greatest sensational free attraction witnessed for the first time west of the Mississippi river will be given by Prof. Sorenson, of Berwyn, Nebraska, who, in making his first experiment a few weeks ago at Berwyn, by mistake had constructed his aeroplane too light, and when five thousand feet from the ground the same broke in two and by a miracle he was not injured though falling the great distance of five thousand feet. He is now constructing a new aeroplane and will give exhibitions at the County Fair, entirely new in the history of air navigation. This is not a mere balloon ascension but will be an exhibition with an aeroplane truly navigating the air. This time it is believed he will not meet with another accident and not experience another such fall as he met with a few weeks ago. Let everyone put away toil and care for a few days and come to the County Fair and be royally entertained and instructed.

Woman Is Man's Equal, Not His Toy.

By the Rev. WILLIAM O'BRIEN PARDOW, Famous American Jesuit Preacher.
WOMAN IS NOT MAN'S TOY, TO BE THROWN AWAY AT WILL. SHE IS NOT MAN'S SLAVE, TO DO HIS WORK, BUT HIS HELPMATE.

She is not merely meant to take care of the flowers of the garden of Eden, but to HELP HIM through his INTELLECT AND HIS HEART. And to do this she must be in some way his superior.

It is sad that man has not understood how woman was to be his helpmeet. Through the development of his emotions he has MADE HER A TOY. Sometimes women help on this idea, and we find them sinking lower and lower.

Perils Which Endanger
The Peace of the World.

By Professor JOHN W. BURGESS, Dean of the Columbia School of Political Science.

THE GREATEST DANGERS TO THE PEACE OF THE WORLD SPRING FROM TWO SOURCES—NAMELY, THE SUSPECTED PURPOSE OF ENGLAND TO ISOLATE GERMANY AND CRIPPLE ITS COMMERCE AND THE SUSPECTED FUTURE PURPOSE OF JAPAN TO CONTROL CHINA AND MIDDLE ASIA AND CLOSE THEIR DOORS TO FREE COMMERCE WITH OTHER NATIONS.

The German nation within the German empire numbers some sixty-five millions of the most intelligent, moral, capable, peace loving and enterprising people in the world, inhabiting a territory of less than two hundred and ten thousand English square miles, sixty thousand square miles less than the single state of Texas, and seeking to provide for these teeming millions not by any policy of territorial aggrandizement, but by a policy of PEACEABLE TRADE AND COMMERCE with the world, conferring thus benefit as well as receiving it.

Any successful attempt to restrict this sound development, sound both from a national and a world point of view, is bound to result in AN EXPLOSION WHICH WILL ROCK EUROPE FROM ONE END TO THE OTHER AND THREATEN THE WELFARE OF AMERICA. Again, China and middle Asia, with a population of six hundred million people, have now appeared at the threshold of modern civilization and are about to open their doors to free commerce and intercourse with all civilized nations, for the welfare and advantage of all concerned.

ANY SUCCESSFUL ATTEMPT BY JAPAN ALONE OR BY JAPAN, ENGLAND AND RUSSIA IN LEAGUE TO BAR THE WAY OF THIS DEVELOPMENT WOULD BE NOT ONLY A MORTAL AFFRONT TO CHINA AND MIDDLE ASIA, BUT A CHALLENGE TO ALL OTHER NATIONS AND WOULD INEVITABLY PRODUCE A STRUGGLE BETWEEN THE ORIENT AND THE OCCIDENT, IN WHICH THE POWERS OF THE OCCIDENT MIGHT BE THEMSELVES DIVIDED.

No more perilous situation to these United States of America and the civilization of the modern world could be imagined than this.

The central feature

No matter how well planned or how carefully furnished, houses are not made home-like where there are unevenly warmed rooms and cold halls.

AMERICAN & IDEAL
RADIATORS & BOILERS

for Hot Water or Low-Pressure Steam cost more to put in, but the outfit will last a lifetime. The house is warmed throughout at exactly the temperature you prefer. Radiant heating is the central feature of importance to successful home-making. If you increase the size of your house (statistics show that 65% of all buildings are remodeled) you can at any time get extra parts, as IDEAL Boilers and AMERICAN Radiators are made on the unit or sectional plan. Estimates cheerfully furnished. Ask for book.
