

Three million acres of government land to be opened for settlement about October 1st in South Dakota. Uncle Sam's greatest land drawing. These lands to be opened under the United States homestead laws. For reliable information about these lands, send 25 cents (silver) for our interesting little booklet, "The Cheyenne and Standing Rock Reservations," tells about the history, topography and soil, climate, rainfall, who may take homesteads, etc., compiled by state historian. Includes also up-to-date map of South Dakota showing lands to be opened.

If you are interested in securing 160 acres of this rich land, wrap up a quarter and send for this booklet and map at once. Address Homestead Information Bureau, Pierre, S. D.

If you need help of any kind, call as many people as possible. There are more than 40,000 people who subscribe for the Omaha Bee. You can tell them all or one cent per word per day. Write today.

First aid to coal sufferers

The dirtiest, most distasteful drudgery is to carry coal and ashes to and from stoves and grates. And then there's the fuel waste!

AMERICAN & IDEAL RADIATORS & BOILERS

warm evenly every room and corner of the house—not "in spots" as with stoves, nor "one-sided" heating as with hot-air furnaces on windy days. In these outfits for Hot Water or Low-Pressure Steam the firepot has hollow walls filled with water, which absorbs all the heat of the fuel and distributes it through piping and radiators exactly where needed—hence the great fuel economy. Let us tell you all about this clean heat, health protection, safety, and the long-lived outfits. Estimates cheerfully furnished.
