

Peruna Secrets You Should Know

Golden Seal Root.
Golden Seal, the root of the above plant, is a very useful medicine. Many people gather it in our rich woodlands during the summer. Few people know how valuable it is in dyspepsia, catarrh, and as a general tonic.
Many thousand pounds of this root are used each year in the famous cathartic remedy, Peruna. This fact explains why everybody uses Peruna for catarrh.

For Lame Back

An aching back is instantly relieved by an application of Sloan's Liniment.

This liniment takes the place of massage and is better than sticky plasters. It penetrates—without rubbing—through the skin and muscular tissue right to the bone, quickens the blood, relieves congestion, and gives permanent as well as temporary relief.

Here's the Proof.

Mr. James C. Lee, of 100 9th St., S.E., Washington, D.C., writes: "Thirty years ago I fell from a scaffold and seriously injured my back. I suffered terribly at times; from the small of my back all around my stomach was just as if I had been beaten with a club. I used every plaster I could get with no relief. Sloan's Liniment took the pain right out, and I can now do as much ladder work as any man in the shop, thanks to

Sloan's Liniment

Mr. J. P. Evans, of Mt. Airy, Ga., says: "After being afflicted for three years with rheumatism, I used Sloan's Liniment, and was cured sound and well, and am glad to say I haven't been troubled with rheumatism since. My leg was badly swollen from my hip to my knee. One-half a bottle took the pain and swelling out."

Sloan's Liniment has no equal as a remedy for Rheumatism, Neuralgia or any pain or stiffness in the muscles or joints.
Price, 25c., 50c. and \$1.00

Sloan's book on horses, cattle, sheep, and poultry is sent free. Address Dr. Earl S. Sloan, Boston, Mass., U.S.A.

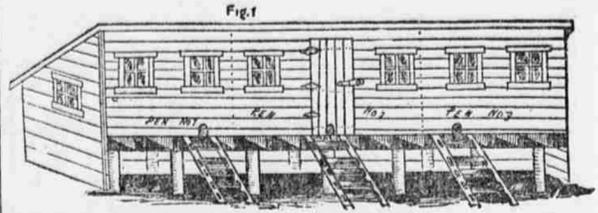

POULTRY HOUSE PLAN WITH SCRATCHING PEN

Best Located on the Side of a Hill to Avoid Standing Water During the Rainy Seasons—By John Sorham.

This is a poultry house which I think will stand the test of all climates. I think it well adapted to the cold climate of Alaska, or the hot climate of Australia, as well as all temperate regions, writes John Sorham in the Poultry Tribune.

It is best to first select a side hill on which to build, so that the water will not be standing around or under the house during rainy seasons. I have mine built on level ground, but shall remodel it soon, digging away about 12 inches of ground from under the house and replacing it with coarse sand. I shall also dig a trench around and close to it, two feet deep,

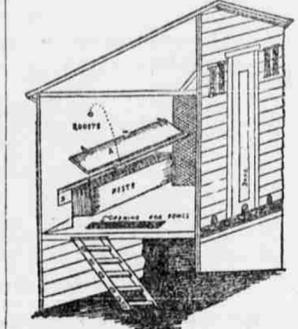

in the floor through which the hens may pass up and down. The step (B) is hinged at the back, with a hook in front so it can be hooked up, completely covering the opening in the floor; each pen is arranged this way. The floor is built two feet from the ground and the hens are fed in this under story in winter. On this basement floor there should be at least six inches of scratching material to keep the fowls busy. This scratching shed under the building is closed up on all sides excepting the front. Each pen is 8x24 feet, making 192 square feet of floor space in which can be kept a flock of 60 hens. In summer I

Poultry House with Sub-Scratching Pen.

one foot wide, and shall fill in one foot of loose stones, covering with one foot of ground. Tile would be much better than stones to keep the ground dry around the house.

The house which I have planned is 8 feet wide, 36 feet in length, consisting of three pens (although it can be divided into any number of pens) each pen being 8x12 feet. The house is 8 feet high in front and 6 feet at the back, and is built with a cheap grade of lumber which is not painted, but a layer of building paper is tacked on, over which is placed a two-ply roofing material. The roof is covered

Section Through Interior.

the same way, excepting the paper is covered with three-ply prepared roofing. The floor is double, with a two-inch dead air space, which contains also a layer of building paper; the lumber is good shiplap or tongued and grooved lumber. There is an opening

take out the litter and when it rains the fowls all go under the house for shelter.

I have two windows in every pen (above the floor, of course), and when but one pen is built, I also have two windows (one on each side), on the sides. The windows should all be hinged at the top, so as to admit fresh air all over the house when needed, and there should also be a shutter for every window, to be shut on winter nights. These shutters should be made of tongued and grooved lumber and hinged with loose pin steel butts so they may be taken off in warm weather and put out of the way. I always like to have plenty of light and sunshine in the cold winter days, but you know the more windows in the poultry house the colder it is at night, thus you see here is where your shutters come handy. There is also another point in this house which should not be overlooked, that is, the covered roosts. A hinged hood projects over the roosts which keeps the fowls' combs from freezing in severe cold weather. This hood is fastened with loose pin hinges like the shutters and may be taken off in the spring. The hoods are also supplied with hooks and may be hooked up in day time if desired. The roosts (C) are above the nests, between which there is a large dropping board, which also makes a covered passageway (D) for hens to enter the nests. This passageway is open at both ends.

You will notice that in my plan I have only one entrance, this is in the middle pen, while the other pens have a small door for the hens to pass in and out. If you like you may have a door into each pen from single door at the end of the building.

Corn and Pork.

The farmer who has a number of spring pigs ready for the fattening pens should devote a little time to the study of feeds and their influence on the quality of meat produced. When it is desired to produce pork, or rather fat, one kind of feed is necessary. When the desire is to have lard hogs for the market, no other kind of feed should be used.

Corn is pre-eminently a fat-forming feed, and when the feeder wishes to produce an animal with a great deal of fat to supply the lard trade nothing is better than corn. When the desire is to produce animals for meat alone nothing can be a poorer feed than corn.

The influence of corn on the percentage of fat should be borne in mind and the ration mixed to accomplish the best results.

Manure Currants.

Were you dissatisfied with the size of your currants? Let us whisper a secret. You can improve the fruit greatly by heavy manuring. Now is a good time to apply it. The wood is ripe and is going into its long rest. You may pile straw manure about the bushes so heavily that the grass and weeds, if any, will be smothered, and all the better for the currants. This fruit needs mulching enough to keep the surface cool.

Need of Cream Separators.

With average cows and using the cream separator it is estimated that from \$50 to \$75 per year can be saved in butterfat with ten cows. This amount will about pay for a good cream separator, and its usefulness will last for many years, making the buying of one a good investment. Being able to sell the cream without hauling the milk to the creamery also saves much time and labor.

Value of Potato.

On account of the starch they contain, potatoes are valuable as food. The potato tuber consists mainly of a mass of cells filled with starch and encircled by a thin, corky rind. As stated, the chief value of the potato as an article of diet consists in the starch it contains, and to a less extent in the potash and other salts. The quantity of nitrogen in its composition is small.

BIBLE NOT ETHICAL

Thirteen Chicago University Professors O. K. the Statement.

Holy Book is Neither the Compendium of Truth Nor Theology, Declares an Official Editorial in the Biblical World.

Chicago.—The divinity school of the University of Chicago gave the world another startling bit of advanced theology when the 13 editors of the Biblical World put their O. K. on the statement that the Bible is not a compendium of ethics and never was intended to be.

The argument appeared in the form of an editorial in the magazine, of which Prof. Ernest DeWitt Burton, D. D., head of the department of New Testament literature and interpretation, is the editor-in-chief. The associate editors are members of the faculty, and their unanimous approval is necessary before an editorial goes to the printer. Often two or three collaborate on an article.

The editorial makes the argument that the ethical methods of Jesus were ideal in that they were elastic and adjusted to fit conditions as they were found.

In an interview Dr. Burton elaborated on the presentments made in the editorial in a manner to emphasize what many persons had read between the lines, viz., that Sunday baseball and other personal enjoyment of the Sabbath were not necessarily sinful, in the minds of the 13 professors. Dr. Burton did not mention baseball in his discourse nor did he mention saloons, but he left room for some very plain inferences. As did the editorial, he held that the Bible was not an iron-clad depository of truth and arbi-

Prof. Ernest D. Burton.

trary rules of conduct, but a historical record. And no less an authority than Jesus himself was cited in support of his position.

"The Bible is not a compendium of truth, nor even of theology," said Dr. Burton. "It is a record of religious and ethical experiences rather than the last authority and a composition of all theological truth, such as it is held to be by most churches."

"Taking the Bible at the beginning and following it through, we find it ever-changing, according to the conception of the times. We cannot take it as a compendium and opening it say: 'There is the law; there is the truth.'"

Parts of the editorial read as follows:

"What shall we say concerning the commands of Jehovah in the Old Testament to exterminate the women and children of a vanquished foe? How shall we account for the fact that the Old Testament heroes indulged in polygamy, forbidden by our modern laws? How can we teach total abstinence from a Bible which represents Jesus as partaking of wine at feasts, and which even tells how he miraculously produced wine from water on one occasion when the supply fell short?"

"How, for example, can a Christian gain in intelligent understanding of the issues at stake in the modern conflict between capital and labor if he simply confine himself to a reading of the Bible? How shall he gain defensible moral convictions concerning the ethics of child labor if he confine his attention to a literature which never dreamed of the possibility of modern factories and machinery?"

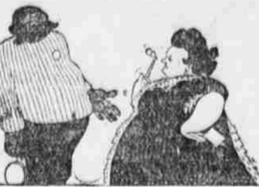

"When one turns to the Gospels one cannot fail to be impressed with the way in which Jesus taught morality directly from life rather than by the methods of the scribes. He determined what was right in any instance by examining the situation itself. When sickness needed to be healed the interests of suffering humanity were of more importance to him than the Jewish legislation concerning the Sabbath."

"Is it not true that we should cease to apologize for this method of Biblical study which has been universally adopted in our seminaries?"

Cure Effected by Radium.
The latest use of radium was upon a case of filariasis, or blood worm disease in Paris. In this mosquito-caused disease the blood at night swarms with millions upon millions of microscopic maggots plugging up and inflaming and swelling the vessels in the armpits. A short course of radium in the armpits cured the swelling and made the worms scarcer in the blood.

A secret that is worth keeping is, of course, doubly worth telling.

THE CAT OUT OF THE BAG.

Mrs. Bauer—Tell my son-in-law that I thank him for his invitation, but am unable to accept it.

Servant—Good. He promised me half a dollar if you weren't able to come.

The Steady Man.

We'd like to write a little rhyme about the steady man, who keeps on pegging all the time and does the best he can; the man who early goes to work and doesn't get home till late; nor ever try to shirk in order to be great. There are some fellows who will try to do their business tricks and have a finger in the pie of city politics; they try to put on lots of style and play a heavy role, and in a little bit of while you find them in a hole! I like the man of steady pace, his system I admire; he has no wild desire to place more irons in the fire! —Los Angeles Express.

Government Sanatoria.

The United States government operates three tuberculosis sanatoria, one for soldiers and officers of the regular army at Fort Bayard, N. M.; one for seamen in the merchant marine, and others employed in coast service of the government, not in the navy, located at Fort Stanton, N. M., and one for officers and enlisted men in the navy at Las Animas, Col. The first hospital is conducted by the department of war, the second by the United States public health and marine hospital service and the latter by the navy department.

Never Opened His Mouth.

"Not infrequent rays of unconscious humor illumine the otherwise impossible stories that come to my desk from amateurs," says a reader for one of the magazines. Recently I chanced upon this choice bit:

"John, the husband, and Grace, the wife, ate on together in silence. There was indubitably an ill feeling between them. The husband devoured a plate of soup, half a fish, an entree or two, a piece of roast beef, together with a sweet, without ever once opening his mouth."

A Resemblance.

Canon Hensley Henson, at a dinner in New Haven during his Yale lectures, condemned the ugliness of the English archbishop's attire.

"One of our archbishops," he said, "preached in a Kansas church in his panoply of knee breeches, gaiters and apron, and the leading paper of the town concluded an admirable report of his sermon with the words:

"The archbishop wore Highland dress."

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Paste, the antiseptic powder. It makes tight or new shoes easy. Cures swollen, hot, sweating, itching feet, ingrowing nails. Always use it to break in new shoes. At all Drugists, 25c. Don't accept any substitute. Trial package FREE by mail. Address Allen S. Olmsted, LeRoy, N.Y.

Nature helps every man to become that which he desires to become. If he put forth no effort Nature assumes he wishes to be a nobody, and grants his prayer.—Elbert Hubbard.

The U. S. Government has bought 25 Gross (3,000 boxes) of Rough on Rats to send to the Panama Canal Zone, because it does the work. The old reliable that never fails. The unshakable exterminator. 15c., 25c., 75c.

The Reason Why.

"I wonder why men don't take more interest in the primary?"

"Possibly because it is a secondary consideration."—Baltimore American.

Stop guessing! Try the best and most certain remedy for all painful ailments—Hamlin's Wizard Oil. The way it relieves all soreness from sprains, cuts, wounds, burns, scalds, etc., is wonderful.

Do You Know Him?

"What sort of a chap is he?"

"Well, he's one of those fellows who think that anything mean is a joke if it isn't on him."

Pettit's Eye Salve Restores.
No matter how badly the eyes may be diseased or injured. All druggists or Howard Bros., Buffalo, N. Y.

Only a disinterested third party is able to realize that there are two sides to a question.

LOSE NO SLEEP
through a nagging cough or irritated throat. Allen's Lung Balsam will heal the affection quickly and beautifully. All druggists, 25c. per bottle.

The bravery of some men is like that of bulldogs; they haven't sense enough to be afraid of anything.

HAD A BETTER SUGGESTION

And, Coupled with the Unchaining of the Dog, It Was Carried Unanimously.

"Well!" demanded the stern-faced woman as she leaned over the red-handled broom, "what do you want?"

"Lady," said the wayfarer, with the long beard and matted hair, "I'm an actor by profession and in hard luck."

"Well, what have I to do with that?"

"Why—er—I was thinking if you could spare me a quarter to get a shave and a hair cut I could get a job in the role of 'Virginius.'"

"Oh, that's a poor excuse," she said, with a curl of her thin lip. "Go up to the town without a shave and a hair cut and get a job in the role of Rip Van Winkle."

And before he could say another word she started to unchain the dog.

Experiences.

Non-Com. (to recruit)—I don't suppose you ever smelt powder, have you?

Recruit—Oh, yes. I was in a drug store before I enlisted.

AFTER SUFFERING ONE YEAR

Cured by Lydia E. Pinkham's Vegetable Compound

Milwaukee, Wis.—"Lydia E. Pinkham's Vegetable Compound has made me a well woman, and I would like to tell the whole world of it. I suffered from female trouble and fearful pains in my back. I had the best doctors and they all decided that I had a tumor in addition to my female trouble, and advised an operation. Lydia E. Pinkham's Vegetable Compound made me a well woman and I have no more backache. I hope I can help others by telling them what Lydia E. Pinkham's Vegetable Compound has done for me." —Mrs. EMMA INSE, 883 First St., Milwaukee, Wis.

The above is only one of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which prove beyond a doubt that Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, actually does cure these obstinate diseases of women after all other means have failed, and that every such suffering woman owes it to herself to at least give Lydia E. Pinkham's Vegetable Compound a trial before submitting to an operation, or giving up hope of recovery.

Mrs. Pinkham, of Lynn, Mass., invites all sick women to write her for advice. She has guided thousands to health and her advice is free.

SICK HEADACHE

CARTER'S LITTLE LIVER PILLS.
Positively cured by these Little Pills. They also relieve Distress from Dyspepsia, Indigestion and Bowel Complaints. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They regulate the Bowels. Purely Vegetable.

SMALL PILL. SMALL DOSE. SMALL PRICE.

NO STROPPING NO HONING
Gillette
KNOWN THE WORLD OVER

Dr. Pierce's Favorite Prescription

Is the best of all medicines for the cure of diseases, disorders and weaknesses peculiar to women. It is the only preparation of its kind devised by a regularly graduated physician—an experienced and skilled specialist in the diseases of women.

It is a safe medicine in any condition of the system. **THE ONE REMEDY** which contains no alcohol and no injurious habit-forming drugs and which creates no craving for such stimulants. **THE ONE REMEDY** so good that its makers are not afraid to print its every ingredient on each outside bottle wrapper and attest to the truthfulness of the same under oath.

It is sold by medicine dealers everywhere, and any dealer who hasn't it can get it. Don't take a substitute of unknown composition for this medicine or known composition. No counterfeit is as good as the genuine and the druggist who says something else is "just as good as Dr. Pierce's" is either mistaken or is trying to deceive you for his own selfish benefit. Such a man is not to be trusted. He is trifling with your most priceless possession—your health—may be your life itself. See that you get what you ask for.
