OPPOSED BY BARTON.

State Auditor Against Selling of Insurance Stock.

State Auditor Barton is opposed to insurance companies selling stock through agents whose pay is taken out of the money paid for the stock. Along the same line he will ask for legislation making it illegal for any insurance company to transact business in Nebraska whose capital stock has not been fully paid up and to prohibit any insurance company hereafter formed to do business in the state if the cost of its organization and stock sales has exceeded 5 per cent of the total sum contributed by the stockholders.

The state auditor believes the practice of insurance companies putting age yield per acre this year was 25.7 | stock salesmen out on the road selling bushels. That the hot weather in stock and paying these salesmen out of the money they secure from the as estimated is shown by the fact stockholders is not only bad practice, that last year's bumper crop was but augurs well for someone to lose money. For that reason he intends to bushels per acre. The acreage this fight the practice if such is the pracyear was slightly in excess of that of tice in Nebraska, and he warns the people against buying stock in such companies.

This question was taken up at the meeting of the insurance commissioners from many states and a resolution was adopted asking all the states to enact legislation along the lines above set out.

It was brought out at that meeting that from 20 to 30 per cent of the stock on the market and that per cent, therefore, of the capital stock never reached the treasury of the company.

## FOR UNIFORM CODE

MORE FREE TIME IS GRANTED

Members of National Association of Railway Commissioners Arque Question-Fail to Embody Demurrage Rule.

Washington-Despite opposition to the forty-eight hour free time rule, and the failure to embody a reciprocal demurrage rule, the national association of railway commissioners, in convention here Wednesday adopted a uniform code of demurrage rules, to be applicable alike to state and interstate transportation. This code was incorporated in a report of a committee, headed by Commissioner Lane of the interstate commerce commission.

Instead of allowing only forty-eight hours free time for loading or unloading cars with all commodities, as rec ommended by the majority of the spe cial committee, three minority members reported in favor of seventy-two hours on cars containing more than 66,000 pounds. W. P. Hall, chairman of the Massachusetts commission, said that the custom in the six New England states was to allow ninety-six hours free time, and he asked that the association go slow in recommending forty-eight hours only. To this Commissioner Lane said that when Mr. Hall had been a member of the commission which drafted the report he had never attended a meeting.

R. H. Burr of Florida contended the states should be left to fix the length of free time without interference. One of the most determined advocates of limitation to forty-eight hours was C. F. Staples of Minnesota.

"I have often wondered why our farmers could not get cars in which to ship our grain," he said. "Now I have found out that it was because you fellows in New England and in Florida were keeping them ninety-six hours for unloading."

In supporting a reciprocal demurrage amendment, Chairman R. R. Prentiss, of the Virginia commission, said that the big shippers could get cars on account of volume of business, but it was the little shipper that needed protection.

On the other hand, H. D. Loveland of California stated that the people of his state were ready to repeal their reciprocal demurrage law, although it had been in operation only eight months.

In spite of all arguments, however, the report of the committee, including

Arguing that car shortage and service methods of unlawful discrimination for the benefit of favored shippers are to be remedied most quickly by a uniform code of rules of demurrage, a hung for the murder of G. L. Munroe special committee, headed by Commissioner Lane of the interstate commerce commission, recommended to the convention the approval of a code it had drafted.

The shippers' point of view of transportation problems was laid before the convention. This task had been assigned to J. C. Lincoln of the traffic bureau of the merchants' exchange of St. Louis, who addressed the convention.

Here are some of the amendments regulations which he said were required by shipping interests.

Giving to the interstate commerce commission the power of temporary injunction over proposed increases in Giving to shippers the right of rout-

ing. Making the giving of erroneous quotations of rates by carriers' agents a

misdemeanor; giving the power to some body to award damages to shippers as a result of such errors. Enactment of a law allowing car riers to meet and confer as to tariffs

rates and regulations without violating the law of the land. Creating of a special court to have exclusive and final jurisdiction over

questions arising from the orders of the interstate commerce commission except in such instances where constitutional questions would necessitate an appeal to the supreme court of the United States.
