

TO STOP THE FIGHT

GOVERNOR GILLETTE OF CALIFORNIA ISSUES ORDERS.

TO GET RESTRAINING ORDER

State Executive Instructs Attorney General to Get Busy—Referee Rickard Says Fight May Be Held Elsewhere.

San Francisco.—Stirred to action by insistent protests from all parts of the state, Governor James Gillette took steps to prevent the championship fight between James J. Jeffries and Jack Johnson, scheduled to be held in this city July 4.

In a letter to Attorney General U. S. Webb, the governor expressed his disapproval of prize fighting in unmeasured terms, directs that the aid of the courts be invoked to prevent the match, and concludes with a positive order that in case the plea for a restraining order is not granted, and the fight is held, the attorney general shall proceed to gather evidence and prosecute the principals and those interested in the fight for violation of the penal code of the state.

The letter declares the supreme court of California has never defined a prize fight, and suggests an opportunity be given to do so.

Governor Gillette telegraphed to Attorney General Webb to take similar action in the fight between Al Kaufman and Sam Langford which is scheduled to take place Saturday, June 18.

Reno, Nev.—Reno made the first bid for the fight as soon as the Associated Press bulletins announced the action taken by Governor Gillette and Attorney General Webb were made public. Tex Rickard was sent a telegram signed by A. J. Aylesworth, manager of a local theater and representing prominent business men, stating that this city would erect a suitable arena and furnish the \$1,000 bonds required by the state law if the promoters will bring the contest here.

Appointments and Pensions. Washington.—Elizabeth M. Long of Lincoln Neb., has been appointed nurse at the Indian school at Albuquerque, N. M.

Hugh Wetherbee of Omaha has been appointed examiner in connection with the interstate commerce commission.

Nebraska pensions granted: Emma S. Crawford, \$12; Ella M. Drake, \$12; Martha E. Lewis, \$12; Mary J. Mathers \$12; Marlar Parker, 12; Helen Shehan, \$20.

The comptroller of currency has authorized the First National bank of Lynch, Neb., to begin business with a capital of \$25,000. C. E. Rose is president, T. E. Rose vice-president, Dan Melsler cashier, and J. A. Hodge assistant cashier.

Floods in Europe. Belgrade, Serbia.—Floods following torrential rains have caused havoc in the valley of the Morava river. Thirty-five lives have been lost. The towns of Chupria, Jagodina and Svilainatz have been inundated. Water to the depth of from seven to ten feet has flooded the streets. Many houses, undamaged, have collapsed. King Peter and the minister of public works has left for the scene.

Police Guard State House. Guthrie, Okla.—Police are still on duty about the state house with instructions to report at once any attempt to remove the state records in violation of an injunction issued by the court. Judge Huston of the district court said he would rule on the attorney general's demurrer to the injunction at once.

Taft Meets Rough Riders. Parkersburg, W. Va.—President Taft and one hundred rough riders, joyously on their way to New York by special train to participate in the Roosevelt reception next Saturday, passed through here Tuesday. Mr. Taft will receive the old Roosevelt troopers at the white house.

Conference on Coal Strike. Kansas City.—Thomas L. Lewis, president of the United Mine Workers of America, held a conference with Charles S. Keith, chairman of the conference committee of the Southwest Interstate Coal Operators' association, in an effort to settle the strike of the coal miners of the southwest.

Hot Weather in Chicago. Chicago.—The arrival of belated summer has announced itself with the first heat prostration of the season. The victim was an eleven year old boy who succumbed while playing with companions at a picnic.

Declare Independence. Berlin.—Advices received by the German Cablegram company from Rio de Janeiro state that insurgents in the prefecture of Jurua, in the Acre district of western Brazil, have declared their independence.

The Acre territory, where an insurrection is reported to have occurred, has an area of about 74,000 square miles and a population of about 70,000. The territory was acquired by Brazil from Bolivia in 1902. The Indian element predominates.

POULTRY

IN THE POULTRY HOUSE.

The male is half the pen—it pays to get the best you can buy. Pullets are the best layers. Old hens bring the egg record down. But of course there are always exceptions. The removal of nesting material, and refilling with clean dry nesting, is a great help in keeping down the lice.

Poultry is one of the best-paying things on the farm when properly cared for and brings in something every month of the year.

If one wants to breed from 20 to 25 hens, two males should be used on alternate days. While one is running with the hens the other should be cooped and fed extra.

One of the most difficult things for a beginner in poultry raising to learn is to cull closely, and there are others besides the beginners that need to practise this necessary thing.

A film of kerosene over the drinking water will prevent one chick's catching disease from another; also it will cure slight colds; an easy preventive and no possible harm in it.

The hens will lay better and do better every way if no males are allowed to run with them, and the eggs will not become stale anywhere near so quick as when males are kept with the flock.

A uniform flock all of one kind of fowls is more satisfactory in appearance, more easily handled and gives more uniform results, and a considerable greater profit, than a mixed lot of different kinds.

Beware of feeding new corn to turkeys or fowls you are preparing for the market. For heavy feeding for fattening purposes old grain is safest and gives much the best results. This is particularly true in regard to fattening turkeys.

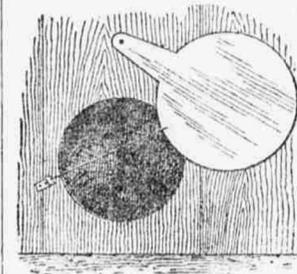

One good male and eight or ten of the best females will produce all the hatching eggs wanted on the average farm, and separate quarters should be provided for them and the run of the farm given to the main flock of laying hens and pullets.

Onions chopped fine and mixed with the hen's food occasionally will promote health. Onions are a good poultry tonic and they are relished by fowls old and young. Our fall hatched chicks tumble over one another to get to their feed when onions are mixed with it.

TRAP NESTS ARE VALUABLE

Permit Poultryman to Keep Record of Each Hen and Weed Out Poor Ones—How Used.

I presume every one knows what trap nests are by this time, and so will merely say that they are nests in which the hen that lays the egg is confined until a record is made of her achievement, when the trap is again set for another hen. I know of just two kinds of trap nests, one that closes as soon as the hen goes in and the other that is closed only after the egg has been laid. In the former kind the hen is shut in whether she lays or not, and as hens are often curious they may be caught in this way and confined unnecessarily, writes W. H.

Home-Made Trap Nest.

Warner in Orange Judd Farmer. In the other kind the hen may go in and out at pleasure, but cannot be confined until after the egg has been laid, since the egg itself is used for closing the trap.

A trap nest is to the practical poultryman what the Babcock test is to the dairyman. It gives each hen's record of egg laying. Thus the poor layers may be picked out and the good ones favored. It is better for the poultryman to get rid of these hens and their progeny as early as possible, especially where poultry are kept for eggs, and it is easier to build up a laying strain of fowl than a good milking strain of dairy cattle.

A handy trap nest is shown in the accompanying picture. It is so simple that any one can make it. It is, in fact, merely an ordinary nest with a circular or square opening in front. The door, as shown, is of very light stuff, pivoted at the top. When the nest is set, a wire runs across the opening and rests against a piece of tin projecting from the opposite hole. When the hen enters, she lifts the loose end which permits the door to drop behind her. After she has laid, she is removed and the trap set for the next one.

Provide Shade for Chicks. Provide chicks with shade and where a cool breeze can fan them in warm weather. This should be supplied, even if a temporary board roof is the only thing that can be furnished.

GOOD ALL-PURPOSE CHICKEN

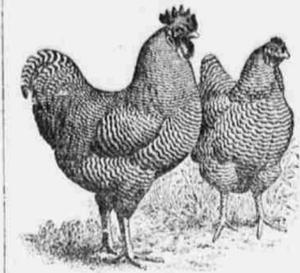

Should Possess Egg-Laying Qualities and Mature Quickly for Market—Plymouth Rock Excels.

By W. M. KELLY. The first thing to consider when selecting a breed is the purpose we desire them for.

There are some breeds of poultry that are adapted to but one purpose and that is laying eggs, among them being what poultrymen call the Mediterranean breeds, such as the Leghorns, Minorcas, Hamburgs and others.

These are very good breeds but what a beginner is after is a hen that will set and hatch some nice young chickens and take care of them in the best shape.

He will also want a breed that will be ideal for market, one that will mature early, have a nice clean color, be good layers, lay good-sized eggs, active enough to be good rustlers after

True Type of Barred Rocks.

grasshoppers and worms, be good setters and mothers, easily tamed and handled and a breed that will bear confinement well.

There are many excellent breeds of this class found among what are known as the American breeds. The Plymouth Rocks, Rhode Island Reds, the Wyandottes, and other breeds belong to this class.

The Brahmans, Cochins, Langshangs and others of the large breeds of Asiatic class are not as good layers as the smaller breeds, they are more inclined to be broody and as a rule are not as good rustlers as the American breeds and for that reason I would not advise one to select one's foundation stock from that kind of breeding.

When we look the field all over there is no breed that stands pre-eminently at the head of the utility class like the Plymouth Rocks and I do not believe that a person would go wrong if he selected stock from some good flock of that breed.

The Plymouth Rocks lay good-sized eggs that are of a nice shape and color. Of the various breeds of Rocks I would choose the White Rocks, as it is easier to breed them true to color, they dress very clean and white when killed for market.

The Buff Rocks and the Barred Rocks are excellent fowls and are fully as good in many respects as the White Rocks, but one will find it much easier to breed birds of a solid color and keep them true to type and markings than to breed the colored breeds.

For a chicken that will grow fast and mature early I know of no breed superior to the White Rocks. They have a plump body and are attractive in the market and when full grown have the weight that makes them bring home the money that it cost to grow them.

The cockerels that are to be sold in the fall make quite an important item for us to consider and the White Rocks cannot be excelled in this point.

When the hens are too old to keep for egg producing purposes it is quite an important item to have them weigh six to eight pounds.

There is an increasing demand for dressed fowls and if you have egg customers you should be able to make arrangements to supply them with dressed poultry whenever ordered and get the top price for your surplus stock.

Charcoal for Chicks.

Charcoal may be obtained from any dealer in poultry supplies at a cost of about one dollar per 100 pounds. If the reader does not understand how to burn wood for charcoal, it is perhaps cheaper to buy the prepared article. Wood may be easily converted into charcoal by getting a quantity of it to burning in a pit, then cover the top of the pit with an iron covering and leave it to smolder till the fire dies out. Pulverize the charcoal till it becomes powder and mix it with the soft feed.

Dry Picking Chickens.

Most markets require that picking be done dry. Any one can become an expert in this manner of picking with a little study and experience. As soon as the bird has been killed and while it is still bleeding, the feathers should be removed, care being taken not to tear the skin. The picker should not wait till the bird has bled, because it will become cold then and the feathers will not be removed so easily. Killing is generally done by sticking the knife in the roof of the mouth.

White China Geese Popular.

The white china geese are thought by many to be the best layers of all geese.

A good breeding goose two years old or older with good care will lay from 35 to 60 eggs in a season. Breeding geese should not be too fat, as the eggs from fat geese never hatch.

In the summer, when they can get plenty of grass, they do not need a single kernel of grain and they will thrive and keep in fine condition without it.

LAND IN CANADA AN INVESTMENT

WORK IT, AND SECURE 20 PER CENT. ON THE EXPENDITURE.

Farm lands in Canada increased in value this Spring from fifteen to twenty per cent, and as a result of this increase thousands of those who have gone there within the past few years have had that much more value added to their holdings. There is proof here that as a field for investment there is nowhere to be found a more profitable one than in purchasing farm lands in Canada. And, as a field for occupation and working the farms there is nowhere on the continent where more satisfactory return is given. The crops are always sure and the prices are always good. With railroads entering and traversing all the settled parts, there are very few districts in which the farmer will be more than from ten to twelve miles from a railway station. Roads are good, and big loads are easily handled. The price of getting grain to the primary market is low on this account, and then in reaching the world's markets the railways have their rates controlled by the Government, and what may be considered a fair deal is certain. Good prices for all kinds of grain is the rule, and if the investor has made good money by the increased value given to his unworked land, it is not difficult to understand that the profit to the man who works his land is just that much more, and there will be no depreciation. The man who holds a free homestead of one hundred and sixty acres of land, which he got for \$10 as an entry fee, has land which at its lowest estimate is worth \$10 an acre—yes, \$15 an acre—the moment he has completed his three years' residence duties. It will continue to increase in value until its earning power gives a reasonable interest on a certain sum. That is, if he takes off the land fifteen to twenty dollars per acre clear profit each year, his land is worth to him, at a fair rate of interest, \$200 an acre. If he only realizes \$10 an acre clear profit, it is worth \$100 per acre. Now, thousands of farmers are duplicating these figures. The price of land in Canada to-day is much less than its real value. The fact that the fifty thousand Americans who went to Canada year before last were followed by one hundred thousand last year offers some evidence, and good evidence, too, that there is getting to be a pretty fair knowledge that money is to be made in Canada lands. As an investment money is to be made, but more by living upon the land, secured either by homestead or purchase. The one hundred thousand of last year will be one hundred and fifty thousand this year. These comprise people from every state in the Union, and it is just being realized the asset that awaits the homeseeker in Canada. The large numbers that have gone, though, makes no appreciable difference in the supply of land. There is still left vast quantities of the best of it. But the longer a delay is made in arriving at a decision, the price will advance proportionately, and the more desirable homesteads near the railway lines become more difficult to secure. The Government publishes interesting literature, which may be had on application to any of the agents whose offices are located at different points through the States, and they (the agents) will be pleased to assist in any way possible in the choice of location.

Casey at the Jet. "What's this I hear about Casey?" asked McGinnis. "He's been trying to asphyxiate himself," said O'Reilly. "G'wan! What did he do?" "He lit every gas jet in the house and sat down and waited."—Every-body's.

Beware of Ointments for Catarrh that Contain Mercury, as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reliable physicians, as the damage they will do is too bad to be repaired. Halls' Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Halls' Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price, 75c. per bottle. Take Halls' Family Pills for constipation.

Natural. "And did your wife die a natural death?" "Oh, yes. She was talking when the end came."

Mrs. Winslow's Soothing Syrup. For curing croup, whooping cough, and all other ailments of the throat and lungs. It is a safe and reliable remedy. Sold by Druggists. Price, 75c. per bottle. Take Halls' Family Pills for constipation.

Rejected by Hobo. Weary—It's a poor rule that doesn't work both ways. Whille—G'wan! It's a poor rule to work at all.

When Rubbers Become Necessary. And your shoes pinch, shake into your shoes Allen's Foot-Ease, the antiseptic powder for the feet. Cures tired, aching feet and takes the sting out of Corns and Bunions. Always use it for Breaking in New shoes and for dancing parties. Sold everywhere. 25c. Sample mailed FREE. Address: Allen S. Olmsted, Le Roy, N. Y.

According to some it makes no difference how many dead cats you throw into the well so long as you keep the pump handle polished.

Sincerely, a deep genuine sincerity, is the first characteristic of all men in any way heroic.—Carlyle.

A CERTAIN METHOD. For curing chronic diarrhea and dysentery is by using Painkiller (Perry's Peppermint). This medicine has sustained the reputation for over 70 years. 25c. and 50c.

No Alonzo, a silver cup never runs when it is chased.

Dr. Pierce's Favorite Prescription

Is the best of all medicines for the cure of diseases, disorders and weaknesses peculiar to women. It is the only preparation of its kind devised by a regularly graduated physician—an experienced and skilled specialist in the diseases of women.

It is a safe medicine in any condition of the system. THE ONE REMEDY which contains no alcohol and no injurious habit-forming drugs and which creates no craving for such stimulants.

THE ONE REMEDY so good that its makers are not afraid to print its every ingredient on each outside bottle-wrapper and attest to the truthfulness of the same under oath.

It is sold by medicine dealers everywhere, and any dealer who hasn't it can get it. Don't take a substitute of unknown composition for this medicine of KNOWN COMPOSITION. No counterfeit is as good as the genuine and the druggist who says something else is "just as good as Dr. Pierce's" is either mistaken or is trying to deceive you for his own selfish benefit. Such a man is not to be trusted. He is trifling with your most priceless possession—your health—may be your life itself. See that you get what you ask for.

CASTORIA

THE CENTAUR COMPANY, NEW YORK CITY.

Cook in Comfort

You no longer need wear yourself out with the weakening heat of an intensely hot kitchen. You can cook in comfort.

Here is a stove that gives no outside heat. All its heat is concentrated at the burners. An intense blue flame (hotter than either white or red) is thrown upwards but not around. All the heat is utilized in cooking—none in outside heating.

New Perfection Oil Cook-stove

entirely removes the discomfort of cooking. Apply a match and immediately the stove is ready. Instantly an intense heat is projected upwards against the pot, pan, kettle or boiler, and yet there is no surrounding heat—no smell—no smoke.

Why? Because the New Perfection Oil Cook-Stove is scientifically and practically perfect. You cannot use too much wick—it is automatically controlled. You get the maximum heat—no smoke. The burner is simple. One wick with a cloth cleans it—consequently there is no smell.

The New Perfection Oil Cook-Stove is wonderful for year-round use, but especially in summer. Its heat operates upward to pan, pot, or kettle, but not beyond or around. It is useless for heating a room.

It has a Cabinet Top with shelf for keeping plates and food hot. It has long turquoise-blue enamel chimneys. The nickel finish, with the bright blue of the chimneys, makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

Every dealer everywhere: If not at hand, write for descriptive circular to the nearest agency office.
