**PAT PUTS ON STYLE**

ASTONISHES SPOUSE BY PURCHASE OF SUIT OF PAJAMAS.

Indignant Irishman Berates Merchant Who Failed to Explain How Night Garments Were to Be Worn.

When Pat McCaffery got a boss' job he thought it due to his advancement in society to sport a new suit. While at the men's furnishing store he noticed some pajamas. "An' w'at be ye askin' fer thim summer outin' suits?" he asked the clerk. "Those," smiled the young man, "are the latest style in pajamas."

"Pajamas, is ut? An' w'at bes the use at thim?" "Why, gentlemen who pretend to any fashion wear them when they retire."

"Retire fr'm bizness, ye mane?" "No. When they retire for the night. Go to bed."

"Ah-h, me young feller, that's it, is ut? Well now, Patrick McCaffery's not goin' short anything av a fashionable way av shlapin'. O'll take a suit av 'em."

"Yes, sir. What size of shirt collar?" "Sixteen an' a half."

So the clerk put up the purchases and Mr. McCaffery went happily home. He had a little scheme to astonish Mrs. McCaffery. Going straight upstairs, he put on his new suit, hid the pajamas in the closet, and went down stairs again, where he displayed the new clothes to the delight of Catherine.

"Ah-h-h, but," thought Pat to himself, "wait till ye see me pajamas."

A little before his usual hour for going to bed Pat said: "Well, Katie, darlint, O'll go upstairs and lay away me garments."

Mrs. McCaffery finished the socks and mittens she was mending, and then followed Pat. When she got to the bedroom door it was fastened.

"Pat w'at bes ye doin' w' th' dure locked?" she called.

"Whisht, Katie, O'll let ye in in about a minit. O'm gettin' up a little sprish fr' ye."

Two or three minutes passed but Pat did not open the door. Katie got impatient and thumped on it. "Pat McCaffery, let me in. What divelment are ye up to, anyways?" A smothered voice spoke from within: "Just wan moor second, Katie."

Another minute passed, then Katie kicked the door and shouted: "Patrick McCaffery, is ut crazy ye are? Open th' dure, or O'll schrame fr an officer." The door was opened, and there stood Pat. He surprised her, all right. The pajama trousers had fallen down over his feet, he had on his nightshirt, and the pajama shirt over that. His hair was in his eyes and his face red with anger.

Mrs. McCaffery screamed. "Howly hivens, Pat! Are ye havin' a fit?" "Fit, is ut? Divel a fit can OI get. The dommed little Jew niver towled me if the pajamas go on over th' night shirt, or varsa verry."

Unnecessarily Alarmed. A young lawyer was taking his dinner out at a moderate priced restaurant the other evening. The room was filled, but there was a couple of vacant seats at the table at which he sat. A big, flashy-looking man took one of these seats. He ordered ham and eggs, and proceeded to give a finished performance of the art of sword swallowing. There was a pat of butter in a dish, with ice all around it, in the center of the table. The flashy-looking man didn't pay any attention to his individual butter dish. The young lawyer looked at his vis-a-vis disgustedly.

"Look here, my friend," said he, finally, addressing the man across the table, "do you expect other people to partake of that butter after you have excavated around it in that way?" The sword swallower looked up at the man with the greatest good nature in the world.

"Naw," said he. "I'm a-goin' to eat all o' that butter myself."—Cleveland Plain Dealer.

The Roar of China's Ducks. Tourists in China are always surprised by the number of ducks they see. There are more ducks in China than in all the rest of the world. Their voices are a familiar sound in every town and country spot of the sea coast and the interior of the vast empire. Even in the large cities ducks abound. They dodge between the coolies' legs. They fit squawking out of the way of the horses. Their indignant quack will not seldom drown the roar of urban commerce.

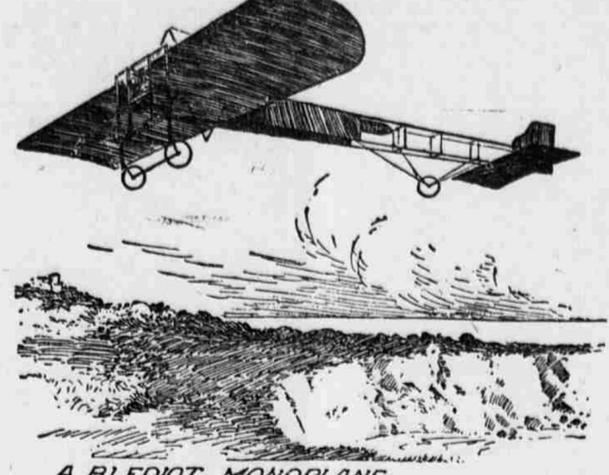

Children herd ducks on every road, on every pond, on every farm, on every river. There is no backyard without its duckhouse. There is no boat, little or great, without its duck quarters.

All over the land there are great duck hatching establishments, many of them of a capacity huge enough to produce 50,000 young ducks every year. Duck among the Chinese is a staple delicacy. It is salted and smoked like ham or beef.

Firm of Purpose. "This is the third alarm clock you have bought in the last two weeks."

"Yes," replied the man with good intentions. "I set them to ring at intervals of half an hour each. I believe in facing the truth and knowing just how much I am oversleeping myself."—Washington Star.

**AERIAL NAVIGATION NOW A REALITY**

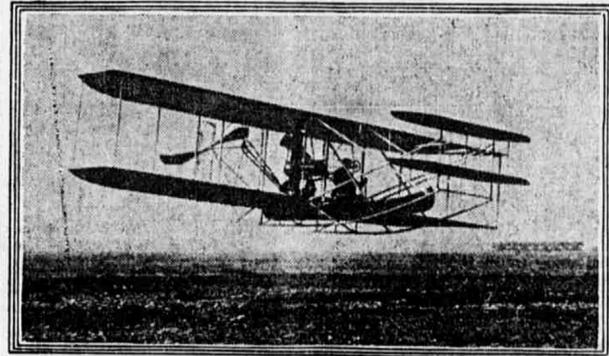

A BLERIOT MONOPLANE

THE problem of aerial navigation has appealed to the mind of man for centuries. In no branch of scientific investigation has man been so enthusiastic, so daring and so willing to risk his life to demonstrate the validity of his theories, whose unsoundness has been proved, in many cases, by the injury or death of the misguided theorist. The evolution of aeronautics, from the winged flight of Daedalus and his son Icarus to the triumph of the Wright brothers, is a history full of failure and discouragements that tells the story of man's unceasing and stubborn fight to conquer the elements.

The men who devote their lives to the study of aviation have met with many and various obstacles which tend to place them in the eyes of the public as visionaries held in the spell of a foolish dream. The deception of the public by charlatans, the impossible claims of cranks, the use of balloons and parachutes for spectacular leaps for life to attract the bucolic multitude to country fairs and circuses, together with the failure of many projects of real scientific value, have, until the last decade, caused the generality of thinking mankind to look somewhat askance on aeronautics as a science.

The scientific investigation of aerial conditions has been one of the main factors in the success of aerial navigations and the epoch-making researches of the late Professor Langley, which in 1891 he published in a book entitled Experiments on Aerodynamics, have been the foundation upon which our present day system of aerial flight is based. Aerodynamics as a science is yet in its infancy and has not emerged from the experimental stage, while the theory of air pressures and resistances on moving surfaces is little understood. The problem of maintaining

A WRIGHT AEROPLANE

stability in artificial flight has been only approximately solved. First Efforts to Fly. In ancient times it was believed that to fly was, by divine decree, impossible. The Greeks and Romans held that the power of flight was an attribute only of the highest and most powerful divinities. During the middle ages there were many myths and fables in circulation of certain favored individuals who had flown for great distances on wings. Frair Bacon claimed that he had discovered the art of flying and Albertus Magnus, the noted philosopher, in his work, Mirabilis Naturae, gave a recipe for aerial navigation. From the sixteenth to the eighteenth century there were numerous enthusiasts who, thinking they had discovered the secret that would render them masters of the air, flew forth from the tops of buildings only to be dashed to their death. Efforts to fly by means of flapping wings were the chief causes of the slow progress of the flying art. Once the idea of soaring through the air—a theory arrived at by Professor Lillenthal in 1891—was discovered to be productive of success the science of aeronautics advanced by leaps and bounds. The first successful attempt at aerial flight was made in the eighteenth century by a French marquis, who endeavored to fly across the Seine from an upper window of his house in Paris. He succeeded in getting almost to the opposite bank when he fell into a boat and was rescued.

In the seventeenth century Borelli calculated the strength of the pectoral muscles of birds and laid down the postulate that it was impossible for man to fly by use of his muscular strength. This doctrine seems to have been accepted, and no attempts at artificial flight were made until toward

they constructed a machine and during their summer vacation on the coast of North Carolina they began experiments with a gliding aeroplane. In 1903 they added a 16-horsepower motor to their glider and in December of that year succeeded in making flights of 850 feet in 59 seconds against a 29-mile wind. In 1905 they made a flight of 24 miles in 38 minutes and from that time on were hailed as the first real conquerors of the air.

A New Era. The year 1909 will go down to posterity as the beginning of a new era in the art of aviation. The records made show an enormous advance in lengths of flights, heights and feats of daring. In this country Curtiss flew for 67½ minutes in July, and at the official trials at Fort Myer, Orville Wright remained in the air for one hour and 21 minutes, covering 50 miles with a passenger. Curtiss won the Bennett speed contest at Rheims, bringing the contest this year to this country. Blériot made his historic cross-channel flight on July 25, making a distance of 31 miles in 37 minutes. Farman made a duration flight of four hours, 17 minutes and 35 seconds, covering 137 miles. Orville Wright, Latham and Paulham reached altitudes exceeding 1,500 feet.

The events of this year are so fresh in the memory that it is unnecessary to recall the numerous and almost daily conquests that occurred during its span. The wonderful achievements accomplished in this year were due not so much to a more perfect mechanism in the aeroplanes but to the increased confidence and skill of the aviators. During recent aviation meets the mile point in altitude had been reached by the skillful and daring Brookings.

SUPPLY ALWAYS KEPT UP.

If babies come down from heaven, mamma, There's one thing that's sure, I declare— There's so many babies that come down each day, There can't be race suicide there.

**REST AND PEACE**

Fall Upon Distracted Households When Cuticura Enters.

Sleep for skin tortured babies and rest for tired, fretted mothers is found in a hot bath with Cuticura Soap and a gentle anointing with Cuticura Ointment. This treatment, in the majority of cases, affords immediate relief in the most distressing forms of itching, burning, scaly, and crusted humors, eczema, rashes, inflammations, irritations, and chafings, of infancy and childhood, permits rest and sleep to both parent and child, and points to a speedy cure, when other remedies fail. Worn-out and worried parents will find this pure, sweet and economical treatment realizes their highest expectations, and may be applied to the youngest infants as well as children of all ages. The Cuticura Remedies are sold by druggists everywhere. Send to Potter Drug & Chem. Corp., sole proprietors, Boston, Mass., for their free 32-page Cuticura Book on the care and treatment of skin and scalp of infants, children and adults.

A Logical Landlord. Many a tenant will sympathize with the man in this story, from the Philadelphia Record. He was renting a small house which the landlord had refused to repair. One day the owner came to see him.

"Jones," he said, "I shall have to raise your rent."

"What for?" asked Jones, anxiously. "Have taxes gone up?"

"No," the landlord answered, "but I see you've painted the house and put in a new range and bathtub. That, of course, makes it worth more rent."

No Hurry. "What are you in such a rush about?" "Promised to meet my wife at three o'clock down at the corner."

"Well, there's no hurry. It isn't four o'clock yet."

Lewis' Single Binder, the famous straight 5¢ cigar—annual sale 9,500,000.

Anything left to be done at your leisure seldom gets done.—S. Martin.

For Sprains

"Gave Me Instant Relief" "I fell and sprained my arm and was in terrible pain. I could not use my hand or arm without intense suffering until a neighbor told me to use Sloan's Liniment. The first application gave me instant relief and I can now use my arm as well as ever."—Mrs. H. B. SPRINGER, 921 Flora St., Elizabeth, N. J.

**SLOAN'S LINIMENT**

is an excellent antiseptic and germicidal—kills—kills cuts, burns, wounds, and contusions, and will draw the poison from sting of poisonous insects.

25c., 50c. and \$1.00 Sloan's book on horses, cattle, sheep and poultry sent free. Address Dr. Earl S. Sloan, Boston, Mass., U.S.A.

The par excellence of all razors Gillette KNOWN THE WORLD OVER

**MEN AND WOMEN** Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased. For good results use Dr. Kilmer's Swamp-Root, the great kidney remedy. At druggists. Sample bottle by mail free, also pamphlet. Address, Dr. Kilmer & Co., Binghamton, N. Y.

**PARKER'S HAIR BALSAM** Cleanses and beautifies the hair. Promotes a luxuriant growth. Never fails to restore Gray Hair to its original color. Cures scalp diseases, hair falling out, and \$1.00 at Druggists.

W. N. U., LINCOLN, NO. 44-1910.

**W. L. DOUGLAS**

DOUGLAS, 145 Spark Street, Brockton, Mass.

**That Cold Room**

on the side of the house where winter blasts strike hardest always has a lower temperature than the rest of the house. There are times when it is necessary to raise the temperature quickly or to keep the temperature up for a long period. That can't be done by the regular method of heating without great trouble and overheating the rest of the house. The only reliable method of heating such a room alone by other means is to use a **PERFECTION SMOKELESS OIL HEATER** Absolutely smokeless and odorless which can be kept at full or low heat for a short or long time. Four quarts of oil will give a glowing heat for nine hours, without smoke or smell. An indicator always shows the amount of oil in the font. Filler-cap does not screw on; but is put in like a cork in a bottle, and is attached by a chain and cannot get lost. An automatic-locking flame spreader prevents the wick from being turned high enough to smoke, and is easy to remove and drop back so that it can be cleaned in an instant. The burner body or gallery cannot become wedged, and can be unscrewed in an instant for reworking. Finished in Japan or nickel, strong, durable, well-made, built for service, and yet light and ornamental. Has a cool handle. Dealers Everywhere. If not at yours, write for descriptive circular to the nearest agency of the **Standard Oil Company** (Incorporated)
