Our National Prospects. est's Monthly for Dec

The outlook, until the crops of next year reaped, is not particularly hope-ful. Our wheat crop is over 100,000,000 bushels short compared with last year. Our corn crop is 400,000,000 bushels short of the 2,000,000,000 bushels, which was so confidentially expected early in the season. Our cotton crop will be 1,500,000 bales less than the previous year. Our external trade will consequently suffer, as we depend entirely upon our agricultural products to pay for the foreign goods we consume. There is no market abroad for American manufactured products. There business failures are very numerous. Last year the sum total of bankruptcies amounted to less than \$20,000,000, but during the year just passed the total was swelled to \$25,000,000. The shrinkage in prices, due to the adoption of the gold unit of value, is increasing the number of bankruptcies all over the modern commercial world. This is a matter which the United States alone cannot rectify, as it will require the united action of the leading states of Europe to re-establish bi metalism.

Uncle Sam's Navy.

In a commun cation published in the Army and Navy Journal, Commander J. B. Coghlan, U. S. N., states that the consultations of eminent naval and other surgeons, respecting his rheumatic attack, failed to afford him the slightest relief. By advice of Dr. Hoyle he used St. Jacobs Oil, which wrought a complete and, as he says, wonderful cure. John Carr Moody, Esq., lawyer at Vallejo, Cal., was likewise cured of a severe joint trouble.

Nothing better for Asthma than Piso's Cure for Consumption. Sc. per bostle.

Origin of the Word Mississippi. Magazine of American History.

The Mississippi is a good instance of the variations through which some names have passed. Its original spelling, and the nearest approach to the Algonquin word, "the father of waters," is Mache Sebe, a spelling still commonly used by the Louisiana Creoles. Tonti suggested Miche Sebe, which is somewhat nearer to the present spelling. Father Laval still further modernized it into Michispi, which another father, Labatt, softened into Misispi, the first specimen of the present spelling. The only changes since have been to overload the word with consonants. Marquette added the first and some other explorer the second "s," making it Hississipi, and so it remains in France to this day, with only one "p." The man who added the other has never been discovered, but he must have been an American, for at the time of the purchase of Louisiana the name was generally spelled in the colony with a single "p."

Toccoa CITY, GA.-Dr. J. P. Newman says: "Brown's Iron Bitters are very popular and their use always results satisfactorily.'

One of the New Haven Malley boys is to go on the stage.
