MERCHANT TAILOR.

MAIN STREET,

McCOOK, NEBRASKA

REPORTS from Wyoming and Montana indicate that the loss in range cattle will be heavy. Severe weather and heavy snows are doing their deadly work.

THINGS are not exactly right. A careful political economist closely calculates that women, in this country, might annually save \$3,000,000 in ribbons, which the men might spend for cigars. And still women, some women, crave "equal rights."

In view of the recent decision of the Supreme Court of Washington Territory, to the effect that their law of 1885 granting female suffrage is unconstitutional, we anticipate that there will be a lively season of weeping, wailing and gnashing of teeth among the long-haired men and short-haired women of the realm.

THE inevitable result of the late horrible railroad accidents and holocausts, in the east, will be an imperative demand, by the traveling public, upon the railroad companies of the land, for different methods of heating passenger coaches and greater protection against fire in case of accidents.

A COTERIE of Cambridge business men have incorporated a Loan and Building Association, with a capital stock of \$100,000, divided into shares of \$100 each, and payable in monthly installments. The institution commences business, March, 1887, and continues 25 years. The incorporators are: Messrs. W. H. Failing, E. R. Bee, J. R. Shaub, C. W. Knights, James John, J. W. Pickle, C. M. Brown, F. R. Warren and F. M. Rathburn.

THE prohibition movement, like John Brown's spirit, goes marching on. Way down in the Lone Star state, a prohibition amendment has passed the lower house of the legislature by a vote of 80 to 21; while the state senate of loyal Tennessee has just recently passed a similar bill by a vote of 31 to 2. The legislature of Nebraska has ample opportunity, and the imperative duty as well of immortalizing itself in the same manner. Well she don't?

A NEW device for heating passenger cars is being experimented with on the Pennsylvania railroad, in which the special object sought is lessening the danger of fire in case of accident. The greater portion of the apparatus is placed underneath the floor in the center of the car. It is so securely shut in that it is difficult, if not impossible for any of the burning coals to escape. It is heated by hard coal, which generates steam. Two steam pipes extend along each side of the car a branch extending under each chair. The hot air is also utilized, and passes through a register in the floor of the car. In case of an accident the burning coals, being on the outside of the car, could be easily removed or extinguished.

At a dinner party in Washington the other day Henri Watterson, the fiery editor of the Louisville Courier-Journal, was called upon to reply to the toast, "The Administration." He arose, announced that he was a democrat born and a democrat bred; that he always had and always would defend democratic administration, right or wrong, and thought it the duty of every true democrat to do the same. If one could not say anything in favor of the president, out of respect to the party that elected him, one should say nothing at all. Then Mr. Watterson, in the most comical way, began a pantomime exhibition, showing some very graceful gestures and keeping his lips in motion, but without uttering a sound. After keeping this up for about five minutes, while the guests roared with laughter, Mr. Watterson concluded with the words: "Such, gentlemen, is my opinion of the president of the United States."

Beggs' Cherry Cough Syrup

Will relieve that cough almost instantly and make expectoration easy. Acts simultaneously on the bowels, kidneys and liver, thereby relieving the lungs of that soreness and pain and also stopping that tickling sensation in the throat by removing the cause. One trial of it will convince any one that it has no equal on earth for coughs and colds. McMillen & Weeks have secured the sale of it and will guarantee every bottle to give satisfaction.
