Building operations continue unimpeded of J. Frost's child approach. Don't buy a foot of lumber until you have seen Bulard and learned his figures.

Local to social artists have found it necessary to raise the price on their democratic customers to twenty-five cents, for a shave. A fact!

Oh, it was a genuine landslide, and the noise thereof is severely less loud than the wails of an over-rendent democracy.

Driftwood precinct nobly sustained her reputation by casting 35 straight republican votes—but one republican ballot in the precinct being scattered.

To the Democrat greeting: Rufus Moses, mutton chops and all, and Justin A. Wilcox, the muzzi-d (?) man, captured the persimmons by handsome majorities.

For a number of nights THE TRIBUNE rosters have firmly and persistently refused to go to roost.

Mr. Mike Adams, post, and editor-in-chief of the Democrat, will probably have an effusion of a somewhat pathetic nature in this issue of the more or less disguised religious journal.

The regular Teachers' Examination will be held at Indiana, Saturday, Nov. 17th. Mrs. C. L. NUTTLETON, County Superintendent.

The ladies of the Catholic church will hold a festival in Mullan's Hall, November 15th. Supper will be served from 5 to 10 o'clock.

THE Augusta national exposition will open to-morrow and will continue until December 16. It is the first venture of the kind undertaken by the city, unaided by the government of the state. There will be a complete display of the varied resources of the south and the industries of that section will be fully represented. The building is the largest in the south, and the exhibit will greatly exceed in extent and variety all southern expositions with the exception of the world's fair at New Orleans. It will afford travelers and pleasure seekers an admirable opportunity of visiting one of the most attractive and enterprising cities in the country, and one which exemplifies, in the largest degree, the progressive spirit of the new south.

For three successive years have the farmers of western Kansas lost their corn crops by drought, and the consequence is that they are in a state of extreme poverty verging on actual destitution. It has been suggested that drought may be prevented by tree-planting, because it is caused by hot winds, and the force of these would be broken by rows of trees in sufficient numbers. It is true that tree planting has been found efficacious in Nebraska, as a remedy against these burning winds that blow from the American desert that stretches from the west to the foothills of the Rocky mountains.

LATER indications from West Virginia indicate that the republicans have broken the solid south by carrying that state. The entire congressional delegation is claimed, as well as the legislature, which gives republicans another senator. If you contemplate building be sure to consult M. A. Libbee. He guarantees his work to be the best and his prices the lowest.

Strasser has two of the finest offices in the city for rent. Front rooms with bay windows. Call at once if you want to secure elegant office quarters. The Union Labor vote in this county fell far below what was expected. MEKKER carried the 67th by a nice majority.

Barbecue and Dance. The republicans of Southwestern Nebraska will hold a grand barbecue, in this city, Tuesday afternoon next, commencing at 1 o'clock. In the evening a free dance will be given in the opera hall. Everybody invited. This will be the grandest ratification ever held in this portion of the state. Don't fail to attend! GEO. W. ROOPER, County Clerk.

The idea that men do not have to die but owe death to their follies is not new but has always been derided except by the visionary. Dr. William Hammond, the great physician, starts the public with a reassertion. He says that dying is unnecessary. He says that the human machinery is kept in proper condition by the proper quantity and quality of fuel that is fed to the furnace.
