What the Sea Cast Up.

BY ARTHUR L. MESERVE. It was a bleak December night, and and a great gale was abroad over sea and land.

Huge waves threw themselves with mighty force against the great jagged cliffs as though they would force them from their foundations, as for ages they had been trying to do.

On the land the wind had better success. Great trees were uprooted, had been wisps of straw.

I twas a night long after remembered by the people a longthe coast and spoken of as the great storm. That night in an old, large, rambling house some half a mile from the shore, two people were seated on the hearth, listening apparently to the warning of the elements without, for some time had elapsed since a word had passed the lips of either.

The house seemed somewhat unstable, and with every blast it shook and trembled as though it were about to come tumbling down about the heads of its occupants.

Strange and uncanny sounds were heard coming from the room in other parts of the building, as though unseen guests were holding high revel

The fire on the hearth burned fitful. Sometimes it would leap high up the broad open fireplace as if it would escape on the wings of the wind, and then it would fall down and well-nigh disappear, save the bed of glowing embers scattered over the hearth. The pranks of the fire sent strange

grotesque shadows dancing upon the wall, taking all they were holding high carnival

The two figures before the fire sat speechless and without motion. They

with years. His hands clutched a had disappeared. were fixed on the glowing embers as the door he called to her. though he saw something which fas- "What is it?" she said, coming out cinated him among them. His face to the spot where he was seated. his shoulders.

His companion was a girl of not mime." more than twenty years even if she had seen as many. She was beautiful 'father." as it was, but she would have been ed, weary look upon her face. It was Oh, the viper. How I wish that I a discouraged look, as if all the hopes | could crush him beneath my foot. of her life had fled away forever, and But alas, it is he who can do the what she saw before her was only a grinding now." dismal blank.

papers that showed my title to this She knew that her grandfather house and lands which I had from would need her now, and so with her his father. They had never been put burden clasped in her arms she at on record, as they should have been, once made her way towards the and the lawyer who drew them, and house.

them. All this time he has let usstay here for an evil purpose of his own. He has seen you grow up into a beautiful woman and he has meant to have you for a wife. But, my girl, you have your grandfather's spirit. Better that we should beg from door to door than that you should con-

sent to his wishes.' The girl shuddered.

"I could not do it, grandfather, even for your sake. It would be a living death to me. I can work my fingers to the bone, but to be tied to that man would be horrible."

"You shall not my child. I would not have you comply with his wishes and the air was filled with flying for what little of life that is left to me. branches wrenched off and carried Still I can't help thinking and speakalong on the blasts as though they of it sometimes, and when there is such a night as this, the impulse to do so is more than I can understand, but we will say no more about it tonight. Let ustry and talk of some thing more cheerful."

And then Nellie, humoring his whim, did her best to lead his thoughts in another direction. It was a hard task, as the firelight showed when it illuminated her face; but the old man did not see the look of pain thereon and how bravely she bore up trying to carry the burden that had been imposed upon her young shoulders.

The hour for retiring came at last and after she had seen him comfort ably tucked up for the night, she went into her own room. But it was a long time before sleep came to her eves. The house again and again shook beneath the fury of the blast as though it meant to level it to the earth. But it was not this nor the roar of the ocean that kept her awake. It was the thought of her grandfather, and what she was to do when Simon Grover turned them out from beneath the roof that had sheltered her ever since her eyes had first seen the light of day.

But at last she slept, and when she awoke, the low, slanting rays of the sun, as it arose from its ocean bed, shone in through the window. The storm had ended during the night, and the only sound that met her ears was the still angry roar of the ocean manner of uncouth shapes as though as it dashed upon the jagged coast as if loath to give up the assault it

had so fiercely made upon it. She gave a weary sigh as she thought of the long day before her, saw not the strange pranks and the and the future that stretched out so liberty the firelight was taking with blank and dreary before her. Then them on the wall. the box, but at last it was accomplished. Therein was a package of papers stained by water, but considerably well wrapped in oiled silk. Not a paper was missing, and the box contained beside quite a sum in

The day on which Simon Grover ame to take possession of the premses was a day of triumph for the old man and his granddaughter. A lawver had been sent for, and their enemy brought one with him. It took the two limbs of the law but a few moments to see how matters stood with Simon Grover, and at a whisper from his lawyer he departed, never to set foot in the old house again.-Yankee Blade.

The Bride's Outfit.

I remember the time when no farmer's daughter in the Mohawk Valley was allowed to leave her father's home for another without her dozen of sheets, pillow-cases, table-cloths, towels, etc., and a goodly supply of bedding, feather bed and pillows. To these was added a cow, and sometimes also a horse and a few sheep. Of course it often required some forethought and good management when the family was large and the farm small, but it was no little pleasure in such cases for the girls, as fast as they advanced to a marriageable age, to appropriate a calf or some motherless lambs, and by care and coddling raise them in readiness for the possible event of their marriage. Likewise did they have their pluckings from the geese to make ther beds and pillows, and the quilting-frame and spinning-wheels helped them to the rest. These were truly homely preparations, but in a sense that is of far better significance than ordinary bric-a-brac and embroidery, which constitutes chiefly a bride's belonging to these days. I dare say that not many months elapse before most young housekeepers wish their finery, which was thought so important at the time of the wedding, could be transformed into blankets or some other useful articles. In a nome there must always appear a complete background of the necessaries to make ornaments show to advantage; and where provision is not first made for the musthaves, there is a small chance of their receiving proper attention .-American Farmer.

Counting the Motes in the Sanbeam.

Counting the dancing motes in a bar of sunlight sounds like one of those hopeless, never-ending tasks with which malignant fairies delight to break the spirit of little heroines n the German folk stories. Something more than this, however, has been achieved by modern science, which is now able to count the particles floating in any given portion of the atmosphere, and determine what proportion of these are dangerous zerms and what are mere dust. Dr. Frankland's curious experiments nave shown us how to count the micro-organisms, and now Altken, of Falkirk, by a totally different method, as been enable to take stock of the nore harmless but hardly less interesting dust motes. Thirty-thousand such particles have been detected by aim in the thousandth of a cubic inch of the air of a room. In the outside atmosphere in dry weather, the same neasurement of air yielded 2,119, whereas after a heavy rainfall the number was only 521. That this power of prying into atmospheric secrets will eventually yield very important results must be obvious to all. Among the most curious disoveries already made is the direct relation between dust-particles and iog, mist and rain.

He Brought Back the Candle.

Cincinnati has the champion absentminded man. A gentleman living in the suburbs went in a store on Walaut Street to make a few purchases. The only light in the store was a candle standing on the counter near the money drawer. After making his purchases he handed the proprietor a bill, and, after returning him the change, the proprietor walked to something, when suddenly he was left in the dark. He started toward hereabouts, where I can get work to | Evidently it had been thrown up | the counter, and, groping round on do at home, and we shall be happier from the bed of the ocean by the it, found, not the candle, but the change. It struck him then that probably the man, in a fit of absent There was a pained and bitter look | sight and she looked about her to | mindedness, had taken the candle inupon the face of the old man. It was find some spot where she could de- stead of his change. He started out after him, and catching up with him, he saw that he had the bundle in one hand and the candle in the other. After apologizing for the mistake the stranger took his change and gave back the candle.

Signs of the Millennium. From the New York Sun.

In eleven years from this time we shall be living in the twentieth century of the Christian era. Some of the Christian interpreters of the Biblical prophecies have tried to prove by them that the millennium would dawn in the twentieth century, and that mankind would then enter upon the enjoyment of a thousand years of universal peace and happiness. It may be so, though the signs of it are not yet obvious to the unprophetic

Mrs. Whittlesey's Luck.

stores in town.

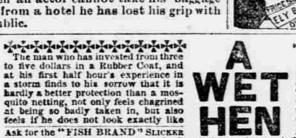

Whatever is said to the chemist he ought always to be ready with the proper retort.

Edwin Forrest's Secret. The great tragedian, Forrest, had a seeret which everybody ought to learn and rofit by. Said he, "I owe all my success to the fact that everything I have undertaken I have done thoroughly. I never neglect trifles." That's the point, don't neglect trifles. Don't neglect that hacking cough, those night-sweats, that feeble and capricious appetite, and the other symptoms, trifling in themselves, but awful in their significance. They herald the approach of consumption. You are in danger, but you can be saved. Dr. Pierce's Golden Medical Discovery will restore you to health and vigor, as it has thousands of others. For all scrofulous diseases, and consumption is one of them, it is a sovereign remedy.

Mrs. Cannon, wife of the Illinois congressman, is an expert seamstress.

Your Friend Committed Suicide. You never suspected it, none of his friends dreamed of it, he did not know it himself, but it is exactly what he did, nevertheless. Do you remember his sallow to complain of headaches and constipation? "I'm getting quite bilious," he said to me one day, "but I guess it'll pass off. I haven't done anything for it because I don't believe in 'dosing.'" Soon after that you heard of his death. It was very sudden, and every one was greatly surprised. If he had taken Dr. Pierce's Pleasant Purgative Pellets he would be alive and well to-day. Don't follow his example. The "Pellets" are easy to take, mild in their action, and always sure.

When an actor cannot take his baggage away from a hotel he has lost his grip with

LONGFELLOW'S MAIDEN,

"Standing, with reluctant feet, Where the brook and river meet, Womanhood and childhood fleet !"

is a type of thousands of young girls who are emerging from the chrysalis stage

of their existence, as they enter upon their "teens." Nervous, excitable, irritable, stirred by strange, unknowable forces within them, each a mystery unto herself, our girls need the tenderest care, the most loving, patient oversight, and the aid of Dr. Pierce's Favorite Priscription, to safely carry them through this critical period, during which, in too many lives, alas, are sown the seeds of distressing forms of diseases peculiar to the female sex. But this boon to womankind will prevent all such diseases, or cure them if they have already seized a victim. Woman owes it to herself, to her family, and to her social station, to be well and strong. Let her then not neglect the sure means of cure. "Favorite Prescription" is a legitimate medicine, carefully compounded by an experienced and skillful physician, and adapted to woman's delicate organization. It is purely vegetable in its composition and perfectly harmless in its effects in any condition of the system. Sold by druggists; \$1.00, or six bottles for \$5.00.

Copyrighted, 1888, by World's DISPENSARY MEDICAL ASSOCIATION, Proprietors.
