There is work enough in the census of 1890 to require ten years for its completion, on which a large force of clerks will be employed. Much of the data collected will be of no use, and a large part is so inaccurate and unreliable that if used it will be a source of misinformation. Even the enumeration of the population can not be accepted with any degree of confidence. Taking it as a whole, this census will be a fearful and wonderful misrepresentation of statistical facts.

If some enterprising citizen will carefully insinuate a hand full of bird shot into the cowardly anatomy of one of the skulking sneaks who prowl through the residence part of the city at night, we guarantee there will be a marked decrease in petty thievery and house-breaking at once. Try it.

Of course it is unnecessary, but we do it as a matter of custom. The reader can't fail to see J. C. Allen & Co.'s announcement in this issue. That they are in earnest you can easily determine by visiting their establishment. They have a surprise in store for you.

TO TAX-PAYERS.

[From the Inter-Ocean.]

Every person who wishes to know the ability and spirit of the Courier should read its reply to the Inter-Ocean of last week. We select only three items.

First, The Courier stated that McCook had failed to put up the bond and the Inter-Ocean admits it. The Inter-Ocean never admitted that McCook failed to put up the bond. The Inter-Ocean said the referee and reporter asked \$400 in cash or a bond for \$4,000. The cash was paid then no bond was wanted.

Second, "Prof. Smith finds fault with Commissioner Bennett, because, forsooth, Commissioner Bennett did not furnish him with his views on the case for publication." Prof. Smith never asked Commissioner Bennett for his views on the case. Prof. Smith said to Commissioner Bennett, "You know that I do not think you commissioners examined the petition as you ought to have done. I wish you would furnish me a statement of what you did do." There is nothing about views in that, we asked for facts. Third, When you heard Judge Cessa say that the petitioners must pay the costs did he not mean McCook? And you spread it thus: "This will be a source of great consolation to many who unwittingly signed their names to the petition just to help McCook get the county-seat."

Monday evening, John R. Menken's team indulged in a runaway with quite damaging results. Mr. Menken was loading at Potter & Easterday's elevator, when the animals became frightened and started away on a lively go-as-you-please. At the Arlington House they took the sidewalk and straddling a tree in front of that hostelry were stopped. The wagon was pretty badly wrecked, but the horses escaped entirely. Mr. Menken was thrown out, run over and badly bruised generally,—one of his legs receiving the worst hurt,—but his injuries are not considered serious or dangerous. He remained at the residence of his brother-in-law, W. M. Sharp of this city, until Wednesday morning, when he was taken to his farm up in Frontier county, about fifteen miles north of McCook.

N. Y. Davis says he is going to make a large reservoir on his farm in which to store water for irrigation purposes and keep a windmill pumping summer and winter and when we have a dry season like it has been this year he will irrigate his crops. We believe the idea a good one and shall devote considerable space to the subject in future. We have mentioned the subject before in regard to the storage of water on our western prairies not for irrigating purposes alone but for the purposes of aiding nature in her work of supplying us with rain and also moderating the hot winds which originate on our prairies because of lack of moisture in the atmosphere, which would be supplied by the continual evaporation from these reservoirs.—Maywood Enterprise.

There was a delightful gathering at the opera house, Tuesday evening, the occasion of the farewell dance given in honor of Mr. and Mrs. W. J. Hills and Mr. and Mrs. A. J. Welch, the estimable and popular citizens who have determined to locate in the south in the pursuit of wealth and happiness. The admirers and friends of the parties were there in numbers, and enjoyed a season of pleasure only alloyed by the thought that many moons might wane ere the honored guests would again meet with their McCook friends in a social capacity. Regret was banished, however, for the nonce, and the fleeting hours were devoted to exclusive worship at the shrine of pleasure.

The regular monthly meeting of the building and savings association was held, Saturday evening. Available funds of the association to the amount of \$600 were sold at a premium of 25 per cent. The secretary reports a brisk demand for money, inasmuch that the funds are now anticipated two or three months. Also that the members are remarkably prompt in their monthly dues payments,—there being but ten delinquents for the month of September in a total of over seventeen hundred shares.

Perhaps nothing has a more desirable effect on the genus tramp than a dose of ball and chain, on a bread and water diet, with daily exercise in the street gang. THE TRIBUNE believes that the city authorities can accomplish good results by following the above prescription. It never fails where the directions are observed to the letter. An exodus of tramps always follows.

The irrigation idea is taking firm hold on the Western Nebraska and Eastern Colorado mind, judging from the prominence given the important matter by the press. Artesian wells are suggested where streams are lacking. Nature thus supplemented would produce prodigious results.

IT WAS EMINENTLY SUCCESSFUL

And Marked an Epoch in Local Mercantile Annals.

The postponed grand fall opening announced by J. Albert Wells, occurred Saturday evening last, and was attended by marked evidences of success. Crowds inspected the large and handsome display of seasonal and stylish dry goods, millinery, etc., with evident delight and satisfaction; and Mr. Wells and his clerical force, who took great pains to show their visitors through the finest establishment in Western Nebraska, may well feel gratified and recompensed for their labors. The musical efforts of the band came in for a large share of attention and appreciation. It was a very pleasing occasion withal.

Sure Death to Borers.

Do not hunt for borers at all, says the N. E. Homestead, but just doctor them a little. Make a mixture of about one quart of wood ashes to a pail of water, and stir it well. Next make a ridge of earth around the tree a few inches from it and high enough so when you pour your mixture into the circle it will run into the holes and kill the worms. It is sure death to them and costs less than one cent a tree. I have used it for years, says the writer, with perfect success. You may have to do it twice the first year, but after that a very little care will keep your trees free from them. If you have a large number of trees, you can use strips of zinc or sheet iron about four or five inches wide and long enough to put about the tree in place of the circle of earth.

Invite Him to McCook.

Mr. Oxnard, head of the syndicate erecting a beet sugar manufactory at Grand Island, was in Fremont, Saturday, to meet a committee of citizens who wished to consult him regarding the location of a second manufactory there. Mr. Oxnard stated that it was his intention to build another manufactory in this state, but as there were several cities anxious to secure its location he was not prepared to make any promises, but would consider propositions, and that, of course, in making a decision he would consult the best interests of those he represents.

The County Fair

Closes at Indianola, to-day. As an agricultural display truth impels the admission that it has not been a marked success—and for good and sufficient reasons. The exhibit of stock is perhaps the best the county has ever made and is highly creditable. The races, however, have been the attraction. This feature drew the fair crowds that attended and contributed the chief interest of the exhibition.

Major Al Fairbrother, wearing a plug hat, a gold headed cane and a few other clothes, and looking as sleek and prosperous as a railroad president, dropped in to bid good bye to the newspaper men of Lincoln, yesterday. He went down to Tecumseh to visit relatives last evening, and in a day or two will start for his new field of labor in Durham, N. C. It is not an easy thing for a man with a wide state acquaintance and a still wider reputation as a journalist to break away from this part of the west, but circumstances make it necessary for Mr. Fairbrother to turn his back upon Nebraska for a time at least. Friends will be sorry to learn that Mrs. Fairbrother has not been well for several months and eminent physicians have warned her that she cannot live in this climate. She was reared in the south and has been at her old home several weeks. As soon as it was demonstrated that it was folly for her to attempt to reside in the north Mr. Fairbrother resigned his position on the Bee, purchased a valuable newspaper plant in Durham and will in a short time be publishing the Daily Globe in that live town of 18,000 people. If he does not succeed in infusing life into the newspaper business of North Carolina it will be a pretty sure indication that the business is in a hopeless state of stagnation. But there will be one live paper in the state, anyway.—Yesterday's Journal.
