Mr. White, the land examiner of the McCook Loaning and Banking Co., was in town the first part of the week. He says that most of the loans are now given on the optional plan which allows the borrower to pay off a part of the loan at any time when interest is due. This system is one which the Faber has earnestly contended for, for a long time, and we are pleased to note that a great many of the companies have at last commenced to adopt it, and we believe that in the near future all of them will follow suit.—Stockville Faber.

He is, however, rapidly recovering and will shortly be ready for duty again.

The Pennsylvania Railway Company, after several years' trial, has concluded to abandon all kinds of advertising except that in the regular newspapers. For over two years past the passenger department has been experimenting to ascertain if a given sum of money expended in posters, flyers, hangers, etc., for an equal sum in newspaper advertising brought about the best results. In every case the company has found that the newspaper advertising brought about the best and most satisfactory returns for the money invested, and that it was read by more people than in any other way. Hereafter the Pennsylvania will confine all its advertising to the newspapers, through which medium it will reach the great masses of the people.
