It is rumored the porters (chair car) will soon have a new time card whereby more trains will increase their number, although brakeman and car repairers have yet failed to acknowledge their approval. The addition of trains 3 and 6 between this point and Denver being the important change they would suggest.

Heavy rains on the Southern Division caused No. 15 to be about five hours late, Saturday last; therefore making no connection with No. 1.

Conductor Kane will soon come down from his perch on the hill and reside on Main St. He having purchased a lot from Frank Harris preparatory to moving his cottage.

Delegations were in attendance from Beaver City, Orleans, McCook and Holdrege, and a banquet was served at the Burlington & Missouri dining hall.—Beaver City Times.

Railroad employes have recently been advised by a state commissioner of transportation to wear gaiters rather than buttoned or tied shoes in order that they may more easily extricate themselves from wrecks as well as from switch frogs. It is apparently a matter of no great consequence, but after all the advice is sound. A fireman who went down an embankment with his engine in the recent Westfield wreck found himself caught and his foot held against the fire box as if by a vice. He had on an elastic shoe and managed to extricate himself, whereas he would have been slowly roasted to death had his foot gear been of any other pattern. It would not be a bad idea for railroad men to form the habit of wearing gaiters. Like a revolver in Texas that kind of shoe may not be needed very often, but when it is wanted it is "wanted mighty bad."
