

PUBLICATION NOTICE.

George Leland, Emma Leland, L. L. Hubbard, James S. Brown and Mrs. James S. Brown his wife, Henry G. Brown and Mrs. Henry G. Brown his wife, James Neale and Mrs. James Neale his wife, defendants, will take notice that L. M. Leach, plaintiff herein, has filed his petition in the district court of Red Willow county, state of Nebraska, against said defendants, the object and prayer of which is to foreclose a certain mortgage executed by the defendant George Leland and Emma Leland to the Western Farm Mortgage Trust Company upon the following described real estate, situated in the county of Red Willow and state of Nebraska, to-wit: Commencing at the southeast corner of lot number seven, block number nineteen, original town of McCook, thence north eighty feet, thence west twenty-five feet, thence south eighty feet, thence east twenty-five feet, to the place of beginning, and being a part of lots seven and eight in said block nineteen, to secure the payment of the eleven promissory notes of said defendants, George Leland and Emma Leland, one of said notes being for the sum of \$400.00, dated the 1st day of March, 1892, and ten notes being for the sum of \$15.75 each, maturing respectively September 1st, 1893, and March and September first 1894, 1895, 1896, 1897 and March 1st, 1898; that said notes were duly assigned to this plaintiff, and there is now due plaintiff from said defendants George Leland, Emma Leland, L. L. Hubbard, James S. Brown, Henry G. Brown and James Neale on said notes and mortgage the sum of \$525.63, with interest on \$30.63 thereof from the second day of May, 1892, and fifteen cents per cent. per annum from the first day of March, 1892, at the rate of ten per cent. per annum, and plaintiff prays for a decree that the defendants be required to pay the same or that premises may be sold to satisfy the amount found due.

SHERIFF'S SALE.

By virtue of an order of sale directed to me from the district court of Red Willow county, Nebraska, on a judgment obtained before J. E. Cochran, Judge of the district court of Red Willow county, Nebraska, on the 11th day of December, 1891, in favor of the Western Investment Company as plaintiffs, and against Jennie Walters and John Green et al, defendants, for sum of one hundred and forty seven dollars and sixty-seven cents, (\$147.67) & cost at twenty-nine dollars and seventy-eight cents, (\$29.78) and accruing costs, I have levied upon the following real estate taken as the property of said defendants, to-wit: The northeast quarter of section 31, township 3, range 30, west of the 6th P. M., in Red Willow county, Nebraska, will sell said land subject to Charles E. Yates, mortgagee of \$500. This mortgage having been assigned to Charles E. Yates by plaintiffs. And will offer the same for sale to the highest bidder, for cash in hand, on the 6th day of June, 1892, in front of the south door of the court house in Indianola, Nebraska, that being the place wherein the last term of court was held, at the hour of one o'clock P. M., of said day, when and where due attendance will be given by the undersigned.

THINGS IN GENERAL.

WHITE mules are in great demand in the south on account of their docility.
NEVADA, Mo., has a citizen named De Spair, and with name he got married recently.
In eastern Oregon the coyote keeps up the price of eggs and chickens, and many counties pay a liberal bounty for his extinction.
In a suit over six geese in Stamp Creek, Ga., when the cost had amounted to about seventy dollars, the matter was compromised and settled by dividing the geese.
The first ship's doctor on record is believed to have been St. Luke, who is shown by recent research to have been a physician in the Troad when he first met St. Paul.
An owl flew down one of the circuit courtroom chimneys at Palmyra, Mo., recently, perched himself in the unused pipe hole and listened as if he had been admitted to the bar.
The biggest bat on record outside of tropical countries was killed near New Castle, Del., the other day. It weighed five pounds and measured sixteen inches between the tips of its wings.
Moose are so very plentiful in northern Maine that, as a sportsman can legally kill but one in a season, it is something of a disappointment to throw away the only chance on an undersized or lean animal, or one with poor antlers.

STRANGE AND CURIOUS.

THERE is a doctor by the name of Miller in nearly every town in Missouri.
The Fresno county (Cal.) jail is said to be invaded by spooks, who keep up no end of a row and rapping at night.
JERRY WALLACE, a farmer of Riverdale, Ga., was carrying a sack of apples from his wagon to a store, when the sack overbalanced and broke his neck, killing him instantly.
The baya bird of India ingeniously illuminates its nest. It catches fire-flies and, without killing them, with moist clay sticks them to its nest. On a dark night the baya's nest is like a bright beacon.
In the reform school at Jamesburg, N. J., there is a phenomenon, in the person of a six-year-old boy named Herman Hoffer, who has a heavy mustache, and is so strong that he can lift two hundred pounds.

VALUABLE LINES.

CENT coins are a legal tender only in sums of twenty-five cents.
The number of presidential electors on the new basis will be 444.
The consumption of water in New York city is very large—averaging one hundred gallons a day for each person.
The oldest capital in the United States is Santa Fe, which was the seat of government in New Mexico as far back as 1640.
ELI TERRY founded the manufacture of clocks in 1793, and the centennial is to be celebrated in less than eighteen months in Terryville, Conn.
MELONS were first called canteloupes from being cultivated at Canteluppi, a village near Rome, where they had been introduced from Armenia by missionaries.
At the meeting of the American Pomo- logical society in Washington it conceded that the fruit exhibited from the extreme north was much brighter in color than that from the middle and southern states.

FOR YOUR HEALTH'S SAKE.

Try snuffing powdered borax up the nostrils for catarrhal cold.
Try walking with your hands behind you if you find yourself becoming bent forward.
Try taking your cod-liver oil in tomato catsup if you want to make it palatable.
Try a cloth, wrung out from cold water, put about the neck at night for a sore throat.
Try an extra pair of stockings outside of your shoes when traveling in cold weather.
Try a saturated solution of bicarbonate of soda (baking soda) in diarrhoeal troubles; give freely.
Try a newspaper over your chest, beneath your coat, as a chest protector in extremely cold weather.—Health Monthly.

UNKNOWN PEOPLE.

A MAN in Concord, Mich., makes a living by raising English sparrows and selling their heads for the bounty.
AN Arizona farmer has a tame rattlesnake to guard his premises instead of a dog. The report does not say whether the snake sleeps in the farmer's boots.
A JERSEY CITY pawnbroker thinks he will become rich soon enough without availing himself of the full profits of his business; he therefore charges his patrons only half the legal interest.
WESTERN WASHINGTON loggers tell of an immense log, recently floated down the Snoqualmie river, which five oxen had difficulty in hauling. It was a fir log thirty-two feet in length and eighty-nine inches in diameter at the largest end.
THE SOUTH SEA ISLANDS.
It is still possible to purchase land in New Zealand at 10s. the acre, or to rent an acre at 6d per annum.
THE natives of the Friendly islands spend most of their time in the water. They are great swimmers and divers.
SINCE Lord Onslow has been governor general of New Zealand he has had a son born, to whom he has given, among other names, the Maori name of "Hui-a."

HOUSES WITHOUT NAILS.

The Queerly Constructed Homes of the Carib Indians at Mosquitia.
On the coast of Mosquitia, a recently created department of the republic of Honduras, there are few houses better than the watta of the Carib or the Waika Indian, says the New York Journal. The frame of the watta rests upon eight or more posts firmly set in the ground and are usually of Santa Maria wood, which resists decay.
In the short crotch at the top of the post lies the pole, five or six inches in diameter, which is the "plate" on which rests the long, slender rafters, which meet high above the ground. The rafters are held in place by light poles, which run around the ends and sides of the roof. Cross pieces serve to strengthen the whole.
Not a nail, not a bit of iron of any kind, is used in building this cottage, but the whole frame is held together by bajucos or tie-tie vines, which are found in unlimited quantities in every forest, and which, when green, can be used as easily as cords could be for lashing the pieces together. As they dry they shrink and bind the whole most firmly.
While the men are putting up the frame of the house the women are preparing the covering, which is made of a kind of leaf called "monkey tail." This they attach to strips some ten feet long and an inch wide, split from bamboo, the whole making a fringe about sixteen inches wide. Beginning at the lower ends of the rafters, those fringes are lashed firmly in rows extending entirely around the edge of the roof. The second row laps over the first and the third over the second, and so on, until the house is covered by a thatch which will turn the heaviest rain, and will last eight or ten years.

Refined Luxury.

Ladies, it is said, have long worn diamond buckles on their garters. Now the refinement of luxury is carried a step further, and precious stones are lavished on linen underwear. Monograms set with small diamonds are prepared, to which tiny rivets are attached, and these may be placed on any garment, and even on a pocket handkerchief. It is usual to provide for this costly innovation by having the monogram also embroidered on the material, little eyelet holes for the rivets being worked in the design so that the diamond letters have a firm base. Small flowers are made in the same way for ladies who prefer an emblem to a monogram.
While it may be necessary to the comfort of some to know that their under-clothing is studded with valuable jewels, there are those, and it may be said with safety that they are in the majority, who prefer to wear their jewelry over their clothing. There are still others who are glad of the clothing.

A Cruel Bondage.

There are more bondages than the bondage of sin. Take the conformist, the person who is afraid to make a single step in life without reference to a manual of correct behavior; the person who is always tormenting himself with the question: "What will people say?" No old African slave in dread of the lash, writes "Amber," in the Chicago Herald, was ever under crueler bondage than he. What do you suppose it will matter to you or to me, a dozen years from now, what people said about this or that we did that was off the regulation? Gossip is the honey that stocks the hives of human bees, but it is ephemeral stuff—it doesn't last over one season.

THE LICORICE TREE.

Its Home in Asia Minor—The Black Licorice Made in Spain.
Most of it comes from Asia Minor, where it is found growing in great abundance all along the flat, uncultivated and almost uninhabited lands of the rivers Tigris and Euphrates. It is a small shrub not more than three feet high, with a light foliage, and is never found far from the water.
The season for collecting the roots is generally during the winter, although it is possible all the year round. When the root is first dug it is full of water and must be allowed to dry, a long tedious process, often taking a year. It is then sent to Baghdad, where it is pressed into bales and shipped to London, and from there to America, quantities of it being used in this country in the manufacture of tobacco.
The black licorice stick or rolls which we see in the confectionery and drug stores come mostly from Spain, and are made of pure juice mixed with a little starch, which prevents it from melting in warm weather, and before packing each stick is wrapped in bay leaves.
The word licorice means "sweet root," and is of Greek origin.—Harper's Young People.

A Novel Bull-Fight.

Cayetano, the famous Spanish torero, once was strolling across the meadow, with a couple of friends, when their attention was attracted by an old and infuriated bull, which was galloping toward them with lowered head and erect tail. Cayetano had no weapon, not even a cane, but he seized a dust-coat, which one of his friends was carrying over his arm. As soon as the bull got close to them, Cayetano bade his companions make their escape while he engaged the animal's attention. Using the coat as a cape, he drove the bull crazy with fury, stepping aside with the deftest agility at each of the animal's charges. In this manner, he caused the bull to turn sharply in the midst of its onward rushes, until, finally, an ominous crack was heard, and the bull fell in a heap, with its backbone broken by the sudden wrench given by the animal's abrupt swerve.—Argonaut.

Chamberlain's Eye & Skin Ointment.

A certain cure for Chronic Sore Eyes, Tetter, Salt Rheum, Scald Head, Old Chronic Sores, Fever Sores, Eczema, Itch, Prairie Scratches, Sore Nipples and Piles. It is cooling and soothing. Hundreds of cases have been cured by it after all other treatment had failed. It is put up in 25 and 50 cent boxes. For sale by George M. Cheney.

MANY SAY

"Why does DR. HUMPHREYS continue to advertise his specifics, every body knows about them." Do you use them? No. Then that's why. Try them.
Is your FARM for sale? If so give description to S.H. Colvin.

Not a nail, not a bit of iron of any kind, is used in building this cottage, but the whole frame is held together by bajucos or tie-tie vines, which are found in unlimited quantities in every forest, and which, when green, can be used as easily as cords could be for lashing the pieces together. As they dry they shrink and bind the whole most firmly.
While the men are putting up the frame of the house the women are preparing the covering, which is made of a kind of leaf called "monkey tail." This they attach to strips some ten feet long and an inch wide, split from bamboo, the whole making a fringe about sixteen inches wide. Beginning at the lower ends of the rafters, those fringes are lashed firmly in rows extending entirely around the edge of the roof. The second row laps over the first and the third over the second, and so on, until the house is covered by a thatch which will turn the heaviest rain, and will last eight or ten years.
The walls of the house are made of the trunks of papia palms, three or four inches in diameter. These are set upright and close together in a trench and tied with bajucos or poles running from post to post; or bamboos cut in pieces of suitable length are flattened into broad sheets or "crickeries" and fastened upright to the frame, thus making a smooth, clean and attractive wall, through which the refreshing breezes draw steadily from morning until night.
The daughter of a New York judge has for more than two years made her home in such a watta, the walls being draped with muslin and the ceiling with pink mosquito bar in plats radiating from the center. The Japanese decorations—harmonized with the walls and the shelves of bamboo filled with choice books. Moreover, there is a floor of pine lumber, pictures on the wall, an easel in the corner and tables whereon baskets of oranges, mangoes, bananas and other luscious fruits in their season tempt the visitor.
